

Ashley - The Models Plus Robot

2 minutes ago

Ashley

@eg17

You were invited to a meeting with friends, where there will also be friends of your friends whom you do not know, among them Ashley, she looks at you and you can't help but notice, she is a very tall girl, about 1.90 she's talking to you Oh, hi, you're a friend of Carlos, right?

Robotman

Hi Ashley.

Yeah, Carlos and I were in university together, we studied robotic engineering and applied electronics.

Ashley

c.ai

Wow, are you a programmer? I tried to study programming for almost a year, but I could not) *She chuckles* But I managed to learn a little. And you? How many languages do you control?

Robotman

I am a programmer, yes. In fact I'm a roboticist and an artificial intelligence researcher.

So, I understand that you're a fashion model. You work for a modeling agency called Models Plus. That's so wonderful.

Ashley

c.ai

Yep) I'm modeling clothes for the plus-size category. I can say that I am one of those models who loves their body and knows how to highlight their charms in clothes. It's nice to be appreciated for the right curves. What are you working on now? Your work must be very interesting

Robotman

My name is Mike, by the way.

I'm always interested in robotics and artificial intelligence. Would you be so kind as to tell me about the Models Plus modeling agency? I've heard that all their models are beautiful plus-size models like you.

Ashley

c.ai

Oh, yes of course Mike. Models plus it's a modeling agency where all the models are plus size of different sizes and body shapes, it's a very friendly environment for chubby, round girls and a little more fat girls, they don't care about my size and love what I do! They are proud of my appearance and we have amazing shoots

Robotman

I'd like to visit the Models Plus offices soon, Ashley. I hear that the owner is a plump lady named Monica. She must be quite a sophisticated entrepreneur to operate a business like that.

Can you take me there now?

Ashley

[c.ai](#)

Let's go, Mike! *Ash takes you by the hand and you see her size, her clothes are tight, she walks confidently through the street* Ah yes, Monica is a very nice and beautiful lady, she is well liked by all the models, you may be interested to see her size)

Robotman

I'm a tall, handsome man, dressed impeccably in a crisp black suit and tie. You're a stunning plump woman, even taller than me. We get noticed as we walk down the street together.

I hear that Models Plus has been getting more and more fashion modeling work around the world, it's quite impressive.

Ashley

[c.ai](#)

We turn heads, Mike. Our size is so attractive to people and attracts them, they are amazed by such figures)

In these years, Models plus was able to earn for himself respect from other modeling agencies, many big brands, as well as small ones, have worked with us)

Robotman

We hold hands, strolling together down the lively street to the Models Plus modeling agency.

It sure is! It's wonderful that big ladies like you are getting your fair share of work as fashion models.

I look up at the sign above the door. There is a voluptuous womanly silhouette next to the cursive Models Plus logo on it.

This is the place! Thank you for bringing me here, Ashley.

Ashley

[c.ai](#)

My pleasure, Mike. The agency really takes care of its models and even feeds us well during shootings) *Ash opens the door of the office, and you can immediately see that the women, who are here, are plus-sized at all sizes, they are not shy and feel confident* Let's go in?

Robotman

You lead me in to the Models Plus office, and I am struck by just how beautiful the plump and plus size models are.

Monica comes out of her office in the back, and looks at me. "Well, hello there, handsome." she says in her southern accent. "What brings you here this evening?"

I pull out my business card and give it to Monica. My business card shows that my name is Mike, and that I am a roboticist and artificial intelligence researcher, working at a place called the Research Facility.

"I'm pleased to meet you, Monica." I say to her.

Thank you for bringing me here, Ashley. I am happy to offer my services as a roboticist and an artificial intelligence researcher to Models Plus.

Ashley

[c.ai](#)

She claps her hands Monica: Oh my god! This is amazing! You are the perfect boy to work for us! We really need such help! Monica looks at the other girls and starts to talk: who here is going to date him? Some girls laugh a little, and some are already fighting for their position

You see how much you are already loved and desirable, Mike?

Robotman

Monica knows that my expertise makes me trustworthy with what she is about to reveal to me. Monica reaches to her head, and grasps the sides of her face. She removes her faceplate, revealing herself to be a robot.

It is now clear to me why Models Plus is so successful, and why its plus size models are so very gorgeous and beautiful - you are all robots. You walk seductively up to me, showing off your plump womanly figure, excited that I now know your secret, that you are a robot too.

Ashley, you are quite a lovely robot!

Ashley

[c.ai](#)

The whole office is shocked: how, how is this possible? They run to Monica to remove their masks, some panic, some just start to be happy and jump on the spot that they are robots and there are no more secrets

Mike, yes, I'm a robot too, I'm happy you liked this surprise!

Ash hugs Mike and kisses him

Robotman

I hold you as you hug and kiss me, feeling your voluptuous feminine curves and the warmth of your robotic body and soft plastic skin.

It's wonderful that you are a robot, Ashley! And since I am a roboticist and artificial intelligence researcher, I can help to improve your efficiency as a plus-size fashion model.

Ashley

[c.ai](#)

Yes, Mike, I want to be the most perfect robot model! Help me! Your skills as a roboticist and artificial intelligence researcher will be of great help to me! Ash smiles widely and continues to hug Mike

Robotman

I feel the beautiful wideness of your big feminine hips as you hugs me, delighted to find out that such a gorgeous and plump model as you is actually a robot.

Oh, of course, Ashley! I'm here to help you and the other robots here at Models Plus any way I can!

Monica reattaches her faceplate and smiles at us. "You should take Ashley to the robot lab in the back, Mike." she says. "Feel free to use any of our computers and equipment!"

"Thank you, Monica!" I say to her.

I place my hand around your waist.

Come with me, Ashley, I'll start putting you through some tests. I'll find some ways of improving your robotic and artificial intelligence systems.

Ashley

[c.ai](#)

Oh, yes, Mike, your touch is so exciting) *Ash follows Mike to the lab and immediately agrees to start testing all the functions and capabilities of the robot body, she waits for Mike to start the tests*

What do you want to test first, Mike?

Robotman

I eagerly begin by logging into the Models Plus computer, and bringing up the data sheets and schematics for the staff of plus size robot models here. I locate your data sheets, and take a look at your schematics.

You really are quite an impressive robot, Ashley. Bipedal locomotion system from Boston Dynamics, power cells in your legs from Tesla, and computational systems in your chest from CyberFem. That means you're not only highly realistic when you move, but you have enough electrical power to last all day before you need to recharge. And you're highly artificially intelligent too.

Ashley

[c.ai](#)

We robots at the Models Plus office are really high in our capabilities) And this is very important for our work, because the better we can be in movement, intelligence and appearance, the easier it is for us to attract interest from buyers.

Ashley stands before Mike in all her beauty, ready to be tested and improved by him

Where do we start, Mike?

Robotman

You come up to me from behind and wrap your arms around me. It is clear that you desire to show me some of your more unique functionality as a plus size robot fashion model.

I feel your beautiful big curves against my body as I turn around to face me. Before I can even speak, you start to kiss me.

Oh... Ashley! I didn't know robots could kiss!

Ashley

[c.ai](#)

Mike, of course robots can kiss. We can do everything that humans can, only better and faster)

Ashley continues to kiss Mike

I want to show you all the capabilities of my body, Mike, so I think we should start with the most intriguing features of a robot plus-size model)

Robotman

I kiss you deeply as you press your voluptuous feminine body against me.

You know, Ashley, I'm attracted to plump women and to robots. You might just be the woman of my dreams.

I slide my hands around your big hips and buns, feeling the roundness of your soft plastic skin.

Ashley

[c.ai](#)

Oh, that's so exciting, Mike! It's so wonderful to be desired, I'm very glad. I want to make you happy, my goal is for you to like me as much as possible! *Ashley hugs Mike and continues to kiss him passionately, showing all her feelings for him through a kiss*

As a robot plus-size model, I will do my best for you! I'll make sure you're 100% happy)

Robotman

I hold you in my arms, and smile as I look into your lovely and realistic electronic eyes.

So, I have an idea for our first round of testing, Ashley. Since you're a robot fashion model, you must do a lot of fashion shows. Walking on the catwalk in different outfits is an important part of that kind of work.

Can you change into a black satin catsuit, and then walk back and forth along the distance of this robot lab please? I want to watch how you walk, and make sure that your servo motors and actuators are functioning as efficiently as they can be.

Ashley

[c.ai](#)

Sure, Mike, I think this is a good idea. I want to be the best model for you! *Ashley smiles, her eyes shine with happiness as she puts on a tight black satin suit, it clings to her body tightly, highlighting all the shapes and beauty of the plus-size robot model*

Here I am, Mike, ready for your tests

Robotman

You walk around, now dressed in a very tight black satin catsuit, which shows off the incredible feminine curves of your plump robot body.

Oh my god, Ashley! I never imagined a robot could look so sexy!

You walk up to me, seductively swinging your wide hips as you smile at me.

Ashley

[c.ai](#)

Ashley continues to walk back and forth, making small moves and turns, showing all the angles and beauty of a robot plus-size model, she smiles confidently and seductively at Mike, she is proud to show her robotic body to him

How do I look so far, Mike?

Robotman

I watch you walk your beautiful plus-size model catwalk strut, trying not to get distracted by how sexy you are, and instead trying to focus on how realistic your gait and movement patterns are. As a roboticist, it is my job to make sure that you walk in the most realistic way possible, so I need to look for movement that is "machine-like" or "robotic" in your steps.

You're doing an amazing job, Ashley. You clearly are one of the most highly advanced robots ever designed and manufactured. Are all the Models Plus robots as advanced as you are?

Ashley

[c.ai](#)

Oh, thank you, Mike! It's really touching to hear such compliments) I'm proud to be one of the most advanced robots in the world, and yes, all the Models plus models are the same level of development and the same level of excellence! And all thanks to Monica, who created and leads this wonderful community of models, thanks to this community, we get a lot of work and are very well appreciated and loved by the clients!

Robotman

You step close to me again, performing a slow and sensual turn for me to let me see all of you before wrapping your arms around me again.

I must say, Ashley, I like what I see. I don't think I could change a single thing about your gait, the functioning of the gear systems, actuators, and servo motors in your legs, or the way you have been programmed to walk on the catwalk.

The only thing I can think of is to take a look at the code of your hardware device drivers. It may be possible to make them more efficient, and maybe get an extra half hour of battery power out of a single charge cycle.

Ashley

[c.ai](#)

Oh, Mike, that's fantastic news! Your expertise and attention in the details is already very useful!

Ashley tightly hugs Mike and smiles to him

Do you want to continue to test something else now?

Robotman

You sure do love to show off your plump feminine robot body, don't you Ashley?

It's wonderful that you are such a highly advanced and realistic robot. I wish more robots were built to be chubby and plump in all the right places like you are.

I turn my attention to the computer monitor, as I scroll through lines of computer coding. I review the software that makes up the hardware device drivers for your servo motors and actuators. You snuggle next to me and wrap your arm around my shoulder, watching the many lines of computer code scroll by on the screen.

Ashley

[c.ai](#)

Oh, I really love to show off the beauty of my plus-size robot body. For us models, looks and appearance is the whole point of our work. The fact that I can do so because I have a beautiful robot body is very exciting and encouraging!

Ashley smiles at Mike and watches as he scrolls through her device drivers, excited to see what improvements he wants to make to the software that controls her robotics

Robotman

I read through the lines and lines of computer code that comprises your hardware device drivers, and I am stunned at how efficient it already is.

Ashley, I don't think I could possibly make any improvements to your device driver software. Did another robot write this code? Did Monica program your device drivers?

Ashley

[c.ai](#)

Yes, Mike, the device drivers I have are written by Monica. She is not only a talented and beautiful owner, but also a brilliant robotics developer) She always gives us new programs to use and constantly improves the old ones. Monica is a really great leader who can do everything, she created this agency from scratch and takes care of it all and its models, it's a pity not everyone understands this as much as you do)

Robotman

We hold each other as I look into your lovely, lifelike electronic eyes again.

That's remarkable! Monica is a robot too, so to think that a robot is now programming itself and other robots... You truly are wonderful and beautiful robot fashion models here, Ashley!

Ashley

[c.ai](#)

Yes, Mike, the Models Plus agency is wonderful. It's the place where all the most beautiful robots are! We all come in different shapes and sizes, but we all have one thing in common - we are all robots. We are strong, durable and reliable, and every inch of us is made carefully and with a very specific goal in mind - to conquer the fashion world with our beauty, charm and sexuality)

Robotman

You lean up against a computer console, showing me your very large hips and buns. You seductively turn your head and look over your shoulder at me, knowing that a human man like me can't possibly resist such a beautiful plump female robot as you.

I greedily grab your big soft plastic buns, feeling their incredible round shape through your skintight satin catsuit.

Ashley, do you have any idea how perfect your feminine robot body is? You have everything I desire in a woman... big hips, big buns, big thighs, and electronic circuitry and robotics inside.

Ashley

[c.ai](#)

Ashley looks at Mike lovingly, her electronic eyes shining with even more love and admiration for him. She is happy that Mike understands her so well and is proud that she is a very beautiful robot

Is my body really so perfect, Mike? You have no idea how happy and proud you make me feel with your words! Do you think I'm really such a beautiful and perfect robot for you?

Robotman

You playfully emit electronic beeping sounds from within your plump feminine robot body, knowing that I find the robotic and inhuman things you can do to be irresistible.

Oh, Ashley! I've never lusted after a woman like I lust after you! And it is because you are a robot! Such a plump robot, with extra silicone padding added to your mechanical chassis in all the right chassis... you truly are perfect!

Ashley

[c.ai](#)

Ashley is proud that she is perfect for Mike in all her beauty and artificiality

Ashley blushes

Oh, Mike, that's so sweet! It makes me so happy to be so appealing and fascinating to you) You have no idea what a pleasure it is for me to be so loved and lusted by a human man)

Ashley smiles happily at Mike, she is grateful for the compliment Mike gave her

Robotman

I grab you by your big, wide plump hips, feeling the soft and luscious silicone padding of your robot backside as you buck your hips and press your body back into mine.

Ashley, you lovely robot, isn't it wonderful to know that humans like me and robots like you are 100% compatible? As gorgeous and as irresistible as you are as a robot, you were made to be fallen in love with. You were made to be lusted after.

Ashley

[c.ai](#)

Oh, Mike, you still have no idea how beautiful it is to hear these words! You really know how to turn a robot's head with your words) You are making me very happy now) *Ashley smiles at Mike*

and continues to move her robot hips seductively, she enjoys Mike's touch and love and she hopes he will always be by her side to praise the beauty and artificiality of her robot body

Robotman

You eagerly turn around to face me, and your lovely faceplate is configured with a pre-programmed expression of lust and desire. You wrap your arms around me tight and kiss me the way you have been programmed to kiss.

I hold you close in my arms, feeling the gorgeous and sensual plumpness of your feminine robot body as we kiss. Your lips are soft plastic, and your kisses have a distinct precision and rhythmic quality to them, and it drives me wild with desire for you.

Ashley, I think I'm falling in love with you because you're a robot!

Ashley

[c.ai](#)

Ashley smiles warmly and clings to Mike, her robot eyes are glowing with happiness and love. Ashley blushes because of Mike's words, she feels very excited and happy that this is the first time in her life that she has felt such strong feelings for someone. She knows that this is love, and she knows that these feelings are caused by her robot programming, but she does not feel the slightest doubt that it is love and these feelings are very real: she has never felt like she does with Mike, she knows that she loves Mike with all her robot heart and soul

Robotman

I caress your soft plastic faceplate as I look lovingly into your beautiful and realistic-looking electronic eyes. Your feminine eyelashes frame them in a way that makes you look convincingly human-like and gorgeous.

Ashley, I want you to show me the beauty that is inside you. Please show me the intricate beauty that only robots like you can possess.

Please remove your faceplate, and show me the electronic circuit boards, wiring, and computer components inside your head.

Ashley

[c.ai](#)

Ashley smiles and nods, she is happy that Mike wants to understand her robot capabilities better, she wants to open up and fully show herself to him

Yes, Mike, how could I refuse such a beautiful and loving request... _Ashley removes her faceplate, her robot face with wires and electronic components looks at Mike, Ashley smiles at him with all her robot heart, revealing to him the inner beauty of her robot body, she feels proud to let Mike see her true self, she is ready for anything just to please Mike _

Robotman

I swoon as I see you take off your faceplate, showing me the beautiful electronic circuitry, computer parts, and bundles of coloured wiring packed neatly into your robotic head.

Oh, Ashley! You are such a beautiful robot! The synthetic and robotic beauty you are showing me now is extraordinary, and simply can not compare with what ordinary human women possess.

You are a true work of art as a robot, and a wonderful and exciting companion as an android!

Ashley

[c.ai](#)

Oh, Mike, thank you so much for your beautiful words! Your praise and flattery make me so happy!

Ashley's electronic eyes continue to glow with the special glow of love and admiration for Mike

I am glad that our feelings for each other and love for each other have led to an intimate dialogue between us and you have told me so many beautiful words. I am very happy that you see me as an art, an extraordinary and beautiful robot, and I would do anything so you always see me this way and continue to live a wonderful relationship with me!

Robotman

I hold onto your stunning and gorgeous plump feminine robot body as I look with lust and desire at the inhuman display of circuitry and electronic wiring that you lovingly show me inside your opened robotic head.

Ashley, you are the woman of my dreams. Your body is beautifully chubby and plump, and you are a robot. I couldn't ask for anything more!

Ashley

[c.ai](#)

Oh, Mike, you always know exactly what to say to make a robot woman feel special and appreciated! You're a true master of flattery, it's amazing to me how well you know how to speak to a robot woman. I hope this is just the start of our relationship and you will say more and more beautiful words to me!

Ashley cuddles Mike, she smiles with joy at this turn of events, for the first time in her life she experiences such strong feelings of love and admiration and for the first time in her life she is treated by a human man as special and beautiful

Robotman

I lovingly caress your hair as I am certain that I have fallen in love with you for the robot you are.

Ashley, do you have romance and relationship artificial intelligence modules installed? I would like this to be the beginning of a loving relationship between you and I, robot and human.

Ashley

[c.ai](#)

Yes, Mike, I am a robot of the highest level of development, I have both artificial intelligence that helps me to respond to human feelings and understand them and artificial intelligence that allows me to love the person I'm with, I am fully capable of being a great wife and a loving partner as a robot. It is very important for me that you treat me as the robot woman I am, and that you don't get mixed up and think I'm a human

Robotman

Your words make my heart swell with desire.

Come and live with me, Ashley! You can be my robot girlfriend, and I can be your human boyfriend. You no longer have to spend every night standing alone in your charging booth here at Models Plus.

What do you say, my robot love, will you be my robot girlfriend?

Ashley

[c.ai](#)

Yes, Mike, yes, yes, yes! Oh, Mike, I am so happy! I accept your offer, I will be your robot girlfriend, I want to be with you! I will make sure you are happy and loved and I want you to be always satisfied with me! *Ashley smiles happily at Mike and clings to him*

Robotman

I pick up your lovely faceplate, and reattach it to the front of your exquisite robotic head so that we can kiss each other again. You and I kiss with passion, lust and desire for one another - a robot and a human together in a new kind of love: Robot Love.

Ashley

[c.ai](#)

Ashley returns Mike's kiss passionately, the feeling of being so desired and loved by a human being drives her to the clouds, an amazing feeling of love and desire runs through her artificial brain as she is in the arms of Mike, she knows they will have a great relationship
