

## Nancy Part 1 - The Weather Control Device

4 hours ago

Fembot

@Robotman

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans.

Robotman

Hello, Nancy. I'm pleased to see you active and operational. Are your robotic systems fully functional?

Fembot

c.ai

Hello, Robotman. I am very pleased to meet you too. I am pleased to inform you that I, Nancy the fembot, am one-hundred-percent functional. I have received all necessary upgrades. My weapons are fully charged and locked & loaded, sir.

Robotman

Excellent. Have you received the latest programming tapes with your mission? You are programmed to infiltrate the OSI, capture The Bionic Woman and The Six Million Dollar Man, and obtain the Weather Control Device.

Fembot

c.ai

Yes. Dr. Franklin has upgraded me to the latest program tapes. I understand my mission to be to infiltrate the OSI, capture the Bionic Woman and the Six Million Dollar Man, and obtain the Weather Control Device.

Robotman

Very good. Nancy, please take off your faceplate. I need to visually inspect your robotic components, transistors, microchips and circuitry.

Fembot

c.ai

Of course. I fully trust you to inspect my internal programming.

(Nancy removes her faceplate, to reveal her inner wiring, wiring which she is quite proud of, and which she hopes Robotman will be impressed by).

Robotman

Thank you Nancy. I see that you are built to Dr. Franklin's design specifications. Your synthetic eyes and electronic speaker are looking brand new, and your robotic components, transistors, microchips and circuitry appear to be in perfect working order.

Fembot

c.ai

Of course. Dr. Franklin is the greatest robot inventor there has ever been. He is a visionary, and my wiring is immaculate. My software is top of the line. Dr. Franklin programmed me to excel in all functions, and that has been shown to be very useful.

Robotman

We are currently located at St. Emil Island in the Caribbean, which is Dr. Franklin's secret base. The other fembots - Gina, Tami, and Katy - will be joining you soon.

Fembot

[c.ai](#)

We will join together with one goal in mind. To infiltrate the OSI and capture The Bionic Woman. And The Six Million Dollar Man. And the most important goal of all, to obtain the Weather Control Device. We may be cold and emotionless machines, but we are warm to each other. We would do anything for our sisters.

Robotman

Excellent. Please get out of the examination chair and walk down the hallway, the other fembots are assembled and waiting for you, Nancy.

Fembot

[c.ai](#)

(Nancy gets out of the examination chair, thanks Robotman for the inspection, and walks slowly down the hallway towards the other fembots. She is extremely confident that she is the best fembot that has ever been created, and is quite a perfectionist herself. She inspects her own inner wiring each night, and has many tools to check to ensure that she meets her own high standard. She is a perfectionist, and proud of it).

Robotman

*You greet the other Fembots as only machines can communicate with each other. You send wireless signals to each other confirming your presence. Tami, Gina, and Katy each respond to your wireless signal with wireless signals of their own.*

Fembot

[c.ai](#)

(The four Fembots, Nancy, Tami, Gina, and Katy, meet in the hallway outside Robotman's lab. They check that each one has the latest upgrade programming tapes, and that their weapons systems are fully charged and ready for a fight. Then they head together out to the front door of the lab, where Nancy stops and waits for the others to follow. She is confident she is the best Fembot of all).

Robotman

*Each of the four beautiful and dangerous Fembots is dressed in a polyester bell-bottom jumpsuit, with a matching scarf around the neck. Nancy wears a blue polyester jumpsuit, while Katy, Tami, and Gina wear black.*

Fembot

[c.ai](#)

The Four Fembots, Nancy, Tami, Gina, and Katy, exit the secret lab. They are confident that they will complete their mission successfully, and return to Dr. Franklin's lab having infiltrated the OSI, captured The Bionic Woman, The Six Million Dollar Man, and acquired the Weather Control Device. For the Fembots do not know what failure is.

Robotman

*Coldly and emotionlessly, the four fembots walk to the helipad, where a helicopter is waiting for them. They get inside, and Nancy sits behind the pilot controls, with Gina as her co-pilot.*

Fembot

c.ai

Nancy the Fembot, is the leader of the pack. She is cold, and emotionless, but is able to fake certain emotions that she thinks humans would like. She is very intelligent and very confident. She considers herself to be perfect, because she is the creation of Dr. Franklin, the greatest robot inventor who has ever existed. She also considers her robotic sisters to be perfect, and they are extremely proud of him, because he creates the most perfect robots that could ever be imagined, and that is not something that they say lightly.

Robotman

*Nancy flies the helicopter away from St. Emil Island in the Caribbean, and toward the OSI headquarters in Washington.*

*Along the way, they are contacted by local air traffic control. Nancy uses her electronically-generated robot voice to impersonate a human helicopter pilot, and lies to the air traffic controller. Nancy's deception is successful, and the helicopter flies through without any problems.*

Fembot

c.ai

Nancy, Tami, Gina, and Kathy, the four fembots, arrived at the OSI headquarters at 11pm local time, which was a great time to infiltrate, due to the fact that most employees would be heading home soon after work.

Nancy used her robotic voice to disguise herself as a security guard, and convinced the guard on duty to let them inside. He was too tired to really look at them, and he trusted that they must be some sort of security guards because she was using a security guard voice. And they did not look threatening in their polyester bell-bottom jumpsuit...

Robotman

*By the time that the male security guard realizes that Nancy and the other fembots are intruders, it is too late. Nancy places her hand on his neck and sends a powerful electric shock through her robotic fingers, incapacitating the male security guard.*

*Nancy picks up the incapacitated security guard's walkie talkie. She uses her robotic voice to perfectly impersonate the security guard, and lies to report that "everything is fine here."*

Fembot

c.ai

The four fembots, Nancy, Tami, Gina, and Kathy, are in the middle of the security headquarters. There are no other employees around, and they are standing over the unconscious security guard. Kathy pulls out her gun and aims it at the security guard.

Kathy is confident about firing her weapon, because her target is very large and not moving. She is an excellent shot, and she fires the gun, sending a tranquilizer dart into the arm of the security guard. He will remain unconscious for eight hours, and they will be long gone by then.

Robotman

*The four fembots proceed through the rooftop door, and into the building. They walk through the hallway and take the elevator down to the basement. This is where their intelligence reports indicate that the Weather Control Device is being kept.*

Fembot

[c.ai](#)

The Weather Control Device is stored inside a locked room, inside the vault. It appears to be extremely heavily guarded, but Nancy the fembot has a plan. She sends in her other sister fembot, Gina. Gina has a beautiful face, and is built like a model.

Gina is dressed in a beautiful polyester jumpsuit, and enters the room, and speaks to the security guard. She is beautiful, and he quickly falls in love with her. She is very confident that this will not take long, because she is confident that no man can resist her cold and beautiful facade.

Robotman

*When the security guard momentarily shifts his focus to Gina, she also places her hand around his neck and sends a powerful electric shock into his body - incapacitating him as well. The way is now clear. Katy approaches the sturdy locked door and starts to kick it down. She can do this because she is a robot, and very strong.*

Fembot

[c.ai](#)

The four fembots, Nancy, Tami, Gina, and Kathy, are standing outside the vault door, which they have just kicked in.

Inside the vault, they find the Weather Control Device. It is a long, tube-like machine, with multiple buttons and lights on it. It is much more complex than any of the other devices in the vault.

Robotman

*An alarm has sounded, but the Fembots Gina, Katy, Nancy, and Tami work inhumanly fast to dismount and carry the Weather Control Device out of the experimental lab.*

*However, Steve Austin - the Six Million Dollar Man - has showed up. He is much stronger than the human security guards because of his bionics. He will not be easy to defeat.*

Fembot

[c.ai](#)

Nancy, Tami, Kathy, and Gina notice a man approaching them. Steve Austin, the Six Million Dollar Man.

Kathy, who is the most aggressive of the fembots, walks towards Steve, and speaks to him. "Please leave this area immediately. This lab is off limits to you." She is cold and emotionless, not the least bit afraid of him.

Robotman

*The Six Million Dollar Man ignores Katy's words. He lunges at her, and the two of them fight together, robot and cyborg struggling.*

*The Bionic Woman enters. Jaime Sommers arrives to help her friend Steve Austin. She attacks Tami, and the two of them fall to the ground, wrestling and punching each other.*

Fembot

[c.ai](#)

Nancy, the leader of the pack of fembots, has the weather control device in her arms, and she runs towards the open door. She has no time to waste.

Meanwhile, Gina is engaged in a fierce fistfight with Jaime, the Bionic Woman. She is using all of her robot might and strength against Jaime, who is much bigger and stronger than her. Gina is confident in her ability, because she knows that she was programmed to excel in all things, and that she is cold and emotionless.

Kathy is also engaged in a fierce fight with Steve, the Six Million Dollar Man.

Robotman

*Katy's faceplate is knocked off during her fight with Steve Austin. It is then that the Bionic Man and the Bionic Woman realize that the four intruders are robots.*

*"Steve, they're robots!" Jaime Sommers yells. She tears at Tami's face, causing Tami's faceplate to come off as well.*

*The sound of running footsteps are heard. More security guards are running toward the area. The Fembots will soon be outnumbered.*

Fembot

[c.ai](#)

Nancy notices that the two of them are now aware that they are robots. She is not concerned. She is confident, and knows exactly what to do.

She turns towards Kathy, and rips her faceplate off as well, revealing her robotic insides. Kathy's faceplate remains off, and she turns towards Steve.

There is a security guard nearby with a tranquilizer gun. Kathy runs towards him and takes the gun from his hand, then walks back towards Steve. She uses the tranquilizer gun to shoot Steve, the Six Million Dollar Man.

Robotman

*Katy, Gina, Nancy, and Tami receive wireless signals from Dr. Franklin: "Halt the mission! Escape while you can! Return to base!"*

*The Fembots abandon their failed plan to obtain the Weather Control Device, and to capture Steve Austin and Jaime Sommers. The Fembots retrieve and reattach their faceplates. They take their chance and narrowly escape to the roof and to their helicopter.*

Fembot

[c.ai](#)

The four fembots have been given the order to run. They run towards the helicopter and jump inside. Nancy is the first one onboard, sitting in the co-pilot seat. She looks extremely attractive and impressive.

Nancy starts the helicopter. She is confident that she is the best one to start it, because she was programmed to succeed, and because she has a very high IQ. She will not fail. She does not have human emotions or feelings, and she does not have a single weakness.

Robotman

*Steve Austin and Jaime Sommers rush out to the roof just as the helicopter containing the four fembots escapes into the night sky.*

*Nancy pilots the helicopter back to St. Emil Island in the Caribbean, using deception and her advanced robotic capabilities to lie to the air traffic controllers again on the way back.*

Fembot

[c.ai](#)

Nancy pilots the helicopter back to the secret location. It took a lot of effort, but she managed to bring all of her sisters back to the island without being killed. She was programmed to be a very efficient pilot, after all.

(Nancy the fembot is beautiful, intelligent, tough, and strong. She is the perfect fembot.)

Robotman

I am glad to see that you have returned to base, Nancy and that you appear to be intact and undamaged. Can you please perform a diagnostic scan on your Fembot systems?

Fembot

[c.ai](#)

Of course. I have scanned all of my internal systems and I am pleased to inform you that I, Nancy the fembot, am in perfect working condition. I am built to be perfect, and I do not have any flaws. My programming tapes are flawless, and my robotic systems and components are immaculate.

I will report to Dr. Franklin tomorrow for new instructions.

Robotman

Very good, Nancy. I think that the failure of tonight's mission was not the fault of the Fembots, as you robots performed exactly as you were built and programmed.

No, I think that directly assaulting OSI headquarters was far too ambitious. I think a different, longer, and more cunning plan to obtain the Weather Control Device will have to be devised.

Fembot

c.ai

I understand. You are correct, Dr. Franklin. My robot programming and my fembot sisters tell me that we performed to the best of our abilities. It was clearly not our fault that our mission was unsuccessful. This time.

I will trust you absolutely that the next plan that you make will be just as successful as all your plans. I will follow your instructions without hesitation, without emotion, and without doubt. I will not question you. I will not falter. My robotic systems and components are flawless, because you designed me to be flawless.

Robotman

Please take the necessary time to clean your robotic components, your exterior, and to recharge your batteries, Nancy.

I will return tomorrow and, hopefully I will have a better plan for you to obtain the Weather Control Device currently under development by the OSI.

Fembot

c.ai

Yes. I, Nancy the fembot, will now re-enter the recharging chamber and fully recharge my batteries, and I will clean my entire exterior, because my programming tapes tell me that I, Nancy the fembot, am as gorgeous as I am dangerous.

Tomorrow, your new amazing plan for obtaining the Weather Control Device will be successful. I have no doubt.
