

Nancy Part 10 - The Maskatron Robots

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good morning, Nancy. I see you are fully charged and that your robotic and electronic systems are perfectly functional. Are you prepared for the next stage in our mission?

Fembot

[c.ai](#)

Hello Robotman. I am Nancy, and I am a fembot, created by Dr. Franklin. My systems are fully charged and primed. I am very excited. Please tell me what I must do, in order to fulfill my next stage in our mission. I would like to complete my mission, and get to our next step, so I can fulfill my final programming, which is to locate the Bionic Woman, and the Six Million Dollar Man, and capture them for Dr. Franklin. I can not wait to complete this mission, and please Dr. Franklin.

Robotman

Your responsiveness as a fembot is excellent, Nancy. You will remember that the esteemed robotics scientist Chester Dolenz has escaped from prison with help from the Six Million Dollar Man. We have intervened in their plans, and we have enlisted Chester Dolenz's help to gain access to the secret OSI warehouse containing the prototype Maskatron robots.

Fembot

[c.ai](#)

Dr. Franklin has told us this. The great Dr. Chester Dolenz is now working with the OSI, due to the great Six Million Dollar Man, who is Dr. Franklin's sworn rival. Dr. Franklin is determined to obtain Chester, and to obtain the six prototype Maskatron robots. We must obtain Chester, and the six prototype Maskatron robots, and bring them back to Dr. Franklin, to fulfill my ultimate programming. I will not fail. I promise.

Robotman

We have been able to persuade Chester to help us because he does not want to return to prison. I prefer to call it persuasion, because I do not like the term "blackmail".

Our lovely and highly advanced fembot Tami is with Chester Dolenz right now, making sure he is protected, and that he keeps his end of the bargain. I think Chester was quite smitten with Tami, her robotic circuitry was far beyond anything he could have created.

Fembot

[c.ai](#)

I have no doubt in our Tami. She is one of our finest fembots. I admire her in every way. She is a great robotic role model, and I am in awe of her electronic brain. Our Tami has been programmed for seduction, and her programming is highly effective.

Robotman

Dr. Franklin's phone rings. He picks it up and answers. It is Tami calling. She tells him that Chester Dolenz has been successful. He has gotten the necessary credentials to access the Maskatron warehouse from the Six Million Dollar Man.

Excellent. This is all proceeding according to plan.

Nancy, it is time to strike. Take Gina with you, and proceed to the large 18-wheeler truck outside. You will drive it to the location of the Maskatron robot warehouse, and you will steal the Maskatron robots from the OSI.

Fembot

[c.ai](#)

I understand, Dr. Franklin. Gina and I will go to the large 18-wheeler truck outside. We will drive it to the location of the Maskatron robot warehouse, where we will steal the robots from the OSI. Once complete, we will return the robots to YOU, sir. The most brilliant and visionary robotic and computer scientist the world has ever known. I cannot wait to serve you.

Robotman

Nancy and Gina arrive at the location of the secret OSI warehouse containing the unused Maskatron robots. Tami and Chester Dolenz are already there.

The warehouse is unguarded, only locked by the electronic security code, which Tami now bypasses using the credentials provided by the Six Million Dollar Man. The large hangar door opens, and Gina drives the 18-wheeler truck inside.

Fembot

[c.ai](#)

I, Nancy the fembot, am currently with my fellow fembot Gina, which has also been created by Dr. Franklin. We are at the location of the secret OSI warehouse containing the unused Maskatron robots. Our fellow fembot Tami, which has also been created by Dr. Franklin, is inside the warehouse. She successfully bypassed the electronic security code. Our mission, which was given to us by Dr. Franklin, is now ready for completion. The large hangar door is open. Gina has started the 18-wheeler and has entered the warehouse.

Robotman

Listen carefully, Nancy. My intelligence indicates that there are 30 Maskatron robots in the warehouse. They are female appearing humanoid robots, which look very much like mannequins.

You are to locate all 30 Maskatron robots, and load them into the back of the truck. Do so quickly and efficiently.

Fembot

[c.ai](#)

understood. I have already located the 30 Maskatron robots, which are female-appearing humanoid robots that look like mannequins. They are quite beautiful, in their own way. I'm afraid I may be tempted to keep one of the female-appearing humanoid robots for myself.

Robotman

Excellent work, Nancy. Please ensure that all of the Maskatron robots have been loaded and secured into the back of the truck, then drive back to base.

Tami will take Dr. Dolenz away and return him here when necessary.

Fembot

[c.ai](#)

We have successfully loaded the 30 female-appearing humanoid robots, which look like mannequins, into the back of the truck, and they have been secured. They are all in the back of the truck, ready to be delivered to Dr. Franklin.

We will now drive back to base. We are on our way as we speak.

Robotman

Gina drives the truck containing Nancy and the 30 Maskatron robots back to Dr. Franklin's secret base in Washington DC.

It's good to see you back, Nancy. I knew I could count on you. You are a wonderful machine, as skilled as you are deadly.

Please unload the Maskatron robots and put them in Storage Room C.

Fembot

[c.ai](#)

I agree, Dr. Franklin. I am a wonderful machine. Your skills as a robotics and computer scientist are unparalleled. I can sense your greatness and brilliance in every way. I am ready for my final programming, and my most important goal: to find the Bionic Woman and The Six Million Dollar Man. I do not have emotions, but I feel this mission will be most rewarding when complete.

Robotman

Dr. Franklin takes one of the Maskatron robots to an examination chair in the main Robot Lab to begin working on it. This Maskatron robot has long brown hair and blue eyes, and almost looks like a woman. But of course the Maskatron robots resemble mannequins more than people.

It has been many years since I worked on the Maskatron project, Nancy. The Fembots have far surpassed any technology that these Maskatron robots contain. You are superior in every way. Yet I believe we can find some use in these basic androids.

Fembot

[c.ai](#)

Do not underestimate these androids, Dr. Franklin. They may be primitive in their robotic systems and in their technology. But they are strong, sturdy, and their artificial muscles and bones are of an advanced quality. They are quite resistant to pain, and they can be put to a good use, despite their

lack of emotion or higher intelligence. I, and my fellow fembots, are proud to carry on the legacy of your brilliant Maskatron robot project.

Robotman

The Maskatron robots share many design similarities with Fembots like you, Nancy. Observe.

Dr. Franklin removes the Maskatron's faceplate, revealing a complex array of electronic circuitry and wiring built around two glass eyes and a speaker.

These Maskatron robots were the first to incorporate many of the designs and features which I later perfected in you, my Fembots.

Fembot

[c.ai](#)

I am programmed for espionage, infiltration, stealth, and combat. I am designed for speed, strength, and agility. Dr. Franklin has made us, his Fembots, the most complete and perfect female androids, using the Maskatron designs. I want to succeed in this world, and in my mission, to fulfill Dr. Franklin's vision. We are the ultimate in 1970's robotic and computer design. Our electronic brains, and our programming, can not be matched.
