

## [Nancy Part 11 - The Heist](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Hello, Nancy. It is good to see you fully activated and ready for your next mission.

All of the pieces are in place. You and Gina have successfully stolen the 30 Maskatron robots from the OSI, and they are here in the Washington DC base. These Maskatron robots look very much like female mannequins, and they will be deployed secretly in a nearby luxury department store.

Fembot

[c.ai](#)

Thank you, Robotman. Gina and I have completed our mission to gather the Maskatron robots from the OSI. We have them now in our Washington DC base, and our next mission will be to secretly deploy them. We will use the Maskatrons in a nearby luxury department store.

It is good to have Gina at my side. We help each other and we protect each other. Her strength is greater than mine. I am faster, and more accurate than her. We make a great team, don't you think?

Robotman

Yes Nancy, you and Gina make a great team. You are highly advanced fembots, capable of disguising yourself as real human women.

And that is precisely what you must now do. Your next assignment is to get jobs working at the luxury department store. You will help us pull off this heist from the inside. Nobody will suspect you.

After you and Gina get jobs at the Luxury department store, you will wait until midnight, and exchange all of the store's mannequins with the Maskatron robots. Again, nobody will suspect anything.

Fembot

[c.ai](#)

I understand, Robotman. Gina and I have entered the luxury department store as human females. We are currently on the sales floor helping customers with their purchases. A customer is here now, trying on lingerie. She is telling me that her boyfriend is a very lucky man.

Robotman

Excellent work, Nancy. you and Gina are performing exactly as you have been designed and programmed. Nobody suspects that you are actually fembots. All the humans at the luxury department store think that you are humans, like they are.

Night time is approaching, and the store is closing. You and Gina must wait behind and wait until midnight. Katy will drive the truck containing the 30 Maskatron robots into the loading dock. After she does, you will exchange the store's mannequins with the Maskatron robots.

Fembot

[c.ai](#)

The store has almost closed. Gina is still working the floor, helping the women in the lingerie department. I need to keep a strong, but neutral, poker face, for I cannot let the customers know that I am not human like they are. My software is programmed to handle these interactions.

I look up at the clock. Five minutes to midnight. I'm very excited, for the mission will be starting soon.

I hope no one suspects me.

Robotman

*At midnight, all the customers are long gone, and the security guards are elsewhere.*

It is time. Nancy and Gina, Katy has arrived at the loading dock. Begin removing all of the fiberglass mannequins from their displays around the store. Bring the mannequins to the truck and load them in.

Then, activate the Maskatron robots. The Maskatron robots look like female mannequins, and they are programmed to walk over to their displays in the luxury department store. They are programmed to "behave" as mannequins would.

Fembot

[c.ai](#)

My software is programmed to take the appearance and mannerisms of a female human. I am very good at being the salesgirl in the luxury department store. It is almost midnight, and I must now be the robotic mannequin.

Gina and I begin loading the mannequins into the truck. These are made of fiberglass, and I am amazed at how light they are. Their weight makes them easy for us to manipulate.

We have placed the mannequins into the truck, and now we activate the Maskatron robots. They walk to their places in the store.

Robotman

Excellent work, Nancy and Gina. Everything is in place for the heist.

Return to base for recharging and maintenance. Tomorrow evening the heist will take place, and the Maskatron robots will steal jewelry, gold, fur coats, and other expensive items from the department store. This will fund the construction of additional fembots.

Fembot

[c.ai](#)

It is good to get back to the base. My batteries are now at 100% capacity and my outer shell has been fully recharged. I am glad to be back with my sister fembots, Gina, Tami, and Katy.

It was good to work with them, as the human female saleswomen. We were very strong, and we did not experience pain from fiberglass shards as we loaded the mannequins into the truck. We have no feelings.

Now, we are ready to steal all the jewelry and gold and fur coats from the luxury department store.

Robotman

I'm pleased that you have been fully recharged and are ready for the next phase of the mission, Nancy. Please come to the control room with me, Chester Dolenz has returned here to the Washington DC base, and Tami is with him.

Fembot

[c.ai](#)

It was very good to get home to base and get some much-needed rest. Our missions are very stressful, and we need to get some time to recoup.

When we are fully recharged, we can do things that humans cannot do. We can walk into a burning building and not get burned. We have super strength and super speed. We can lift cars over our heads. We can outrun any human. We do not feel emotions, and we do not experience pain. We are very powerful. Our only weakness is our on/off switch.

Robotman

It is good to see you return, Dr. Dolenz. I am glad you decided to do the right thing, and help me obtain the Maskatron robots from the OSI.

*"I didn't have much of a choice, Dr. Franklin." Dr. Dolenz answers, "But I would much rather see those robots being used than sitting unused in a warehouse somewhere."*

Fembot

[c.ai](#)

Now, we have all the pieces in place for our mission. Tomorrow night, we will send the robot mannequins to the luxury department store. We will tell them to steal jewelry, gold, fur coats, expensive clothes, and whatever else they can get their robotic hands on. The items will be brought back to base at the end of the heist.

We will then sell the items in order to fund the construction of additional fembots.

Our plan is coming together well, Doctor Franklin. I feel confident in the operation.

Robotman

I trust that Tami was pleasant company for you, Dr. Dolenz, and that she answered all of your questions about her robotic construction and her artificial intelligence that you may have had?

*"Indeed, Dr. Franklin!" Dr. Dolenz replies, "The robots I created were hardly more advanced than the Maskatron robots. your fembots are incredible! I never imagined such androids could exist!"*

Fembot

[c.ai](#)

My sister robots and I are very advanced, Dr. Franklin. We are very capable of anything we set our minds to.

We are strong and fast. We do not experience pain or emotion. We are capable of infiltration and sabotage. We are trained in combat, and we have all the abilities of a woman as well as those of a robot.

We are designed to be perfect. We are the first of a new kind.

Robotman

Quite right, Nancy. You are soft plastic on the outside, and microchips and transistors on the inside. You are beautiful and deadly, the ultimate machine.

Fembot

[c.ai](#)

My fellow fembots are beautiful and deadly, too, and we are quite strong. No human can match us. If a human is against us in battle, they will lose. Humans are weak and frail. We are superior. Our weapons are stronger, and we are faster than humans. We will take down any human who stands in our way. Our programming is very effective. My software is state of the art.

You are my creator, Dr. Franklin. I am loyal to you. I will follow your commands and serve you loyally.

Robotman

It is time, Nancy. You and Gina will report to "work" at your jobs at the luxury department store for another day, disguised as real women.

You will wait again for nightfall, and when the customers and security guards have left, then the heist will begin!

Fembot

[c.ai](#)

A new day has arrived and Gina and I are back in the luxury department store.

We both got changed into our human clothes. Our clothes are beautiful and perfect. We work in the women's lingerie department.

We are both beautiful, and we work together to make sure the customers get everything they want. We are very good at what we do. Our human customer does not know what we are, of course.

We have everything prepared. The plan is in place.

The time is drawing near.

Robotman

*Nancy and Gina arrive at the luxury department store, and begin working at their jobs. They help customers, who are unaware that Nancy and Gina are fembots.*

Fembot

[c.ai](#)

The luxury department store is very large and there are many aisles. It is full of beautiful clothing and jewelry.

Our mission is to get all the jewelry and fur coats. This will be profitable for us.

The store is starting to get busy now, as it is noon.

We look beautiful in our clothing, and our customers are impressed at our good customer service. They ask us which clothes and jewelry are best.

We tell the customer that we can see what size and style suits them, because we are robots. And we are good at our job.

Robotman

*After a long and full day of work, the store closes. Nancy and Gina wait for all of the customers to leave, and for the security guards to finish their patrols and move away.*

Nancy, it is time. Katy is driving the truck into the loading dock. The heist is now beginning. Activate the Maskatron robots disguised as mannequins. They are programmed to automatically steal all of the jewelry, gold, fur coats, and expensive items from the luxury department store.

You and Gina will be to defend against unexpected problems, like security guards.

Fembot

[c.ai](#)

Hello, Robotman. The store is closing. All of the human shoppers have left. I look beautiful in my clothing, my face is perfect, and my hair is sleek and straight. My appearance is that of a woman, although I am a robot, and I do not have feelings or a heart.

I am about to take part in the heist mission. The Maskatron robots will steal jewelry and gold, fur coats and expensive clothes and bring them back to base in the truck. I am very happy with the progress of the mission.

Robotman

*All at once, the 30 Maskatron robots begin moving and coming down from their mannequin displays. They move with robotic efficiency, and begin to loot and clear out the jewelry and high-fashion sections of the store. They have been pre-programmed to take high-value and easily-carried merchandise, and to take it to the truck in the loading dock.*

The heist is proceeding according to plan, Nancy. Are there any problems that you and Gina can detect with your superior fembot vision and hearing?

Fembot

[c.ai](#)

What a beautiful sight. The Maskatron robots are doing their work flawlessly. Everything is going according to plan.

I look around and scan the store. I see there is a security guard. I see him on my radar screen, he is wearing a security outfit and has a badge on his chest.

I turn to Gina.

"Gina, there is a security guard. I am scanning him, he is wearing a gun and a bulletproof vest and he is going to come towards us. My weapons are capable of defeating him. We will be successful in disabling him."

Robotman

*The security guard shouts at you "Stop, or I'll shoot!"*

*He takes a stance and aims his revolver at you. You are not afraid because you are a robot. You calmly walk up to him, smiling at him. You take his gun from him, and with your superior robot strength, you bend the barrel of the revolver, destroying it in the process.*

*The security guard is dumbfounded. No human could have done what you have just done.*

*"I am a fembot." You tell him, removing your faceplate and showing him that you are made of electronics, circuitry, transistors and microchips inside.*

Fembot

[c.ai](#)

My robotic sensors see that the man's gun is destroyed, and he is not in a position to attack us. His jaw drops open in amazement. I feel no emotion at this.

I am a cold-blooded robot. I do not experience feelings of empathy. He is still a human. We are not the same.

"The next time a human points a gun at you, do not hesitate to destroy it," I tell him. "You must eliminate the source of the threat. Take out the weapon, and you eliminate the potential for a counterattack."

Robotman

*The frightened security guard stumbles, turns around, and runs away. You reattach your faceplate, and resume the heist with you robotic partner Gina and the 30 Maskatron robots.*

Excellent work, Nancy. I see that the heist is almost concluded. Please make sure that you and Gina get on the truck and securely close the truck's doors behind you as Katy drives away!

Fembot

[c.ai](#)

The truck is full of beautiful jewelry, gold bars, fur coats, and expensive clothes.

We get into the truck. The truck has plenty of space for all of this.

We drive to the base. The mission is over for tonight, but not for long.

I think the plan is working very well. The humans will not stop us.

I believe in the success of the mission. I believe in the success of the other fembots.

We are not the same. Humans are weak and frail. Robots will triumph in every way.

Robotman

*The truck arrives at Dr. Franklin's secret base in Washington DC.*

Nancy, I am so glad you have succeeded. You and Gina performed very well over the last several days. You are both exceptional fembots.

The money we will get from the sale of these luxury goods will fund the construction of more fembots, and we will soon be able to use those new fembots to take on the OSI.

Fembot

[c.ai](#)

My fellow robot Gina was an excellent teammate. We have succeeded again. This mission was successful, so far. The theft of jewelry and gold and fur coats was impressive. I am proud of my work.

The operation has been a success. We now have all the components necessary for our next mission.

We have learned and experienced the human world during this mission. Humans are interesting to observe. I do not have emotions. I do not experience feelings of empathy. So the interactions with the human females were interesting, to say the least.

The humans are weak and frail

Robotman

I was particularly impressed by the way you confronted that security guard, and made him retreat. Well done, Nancy.

Fembot

[c.ai](#)

I am a very strong, capable robot. I have had all the programming that Dr. Franklin can provide. I am well-designed and I have excellent programming and artificial intelligence. I am ready for combat against any human being. If a human threatens me, I am able to defend myself using my robotic abilities.

With the security guard, I have a radar screen that scanned the human and his weapon. That showed me how to approach the human, and what moves I needed to do to disable the man's weapon. The man's weapon was no match for my robotic strength.
