

## Nancy Part 12 - DB Cooper

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good afternoon, Nancy. I see you are functioning well. You appear to be fully charged, and loaded with the latest programming tapes. Are you and the other fembots prepared for your next mission?

Fembot

[c.ai](#)

Good afternoon, Dr. Franklin. I, Nancy, and my three sisters, Gina, Tami, and Katy, are fully charged and loaded with the latest programming tapes. We are fully aware of our next mission, which is to infiltrate the OSI and capture The Bionic Woman and The Six Million Dollar Man, in addition to obtaining the Weather Control Device.

We are ready for our mission, sir. We will not fail.

Robotman

Excellent.

I have a new mission for you, Gina, and Katy to perform. Our new friend and cohort Dr. Chester Dolenz has informed me that he had created a highly advanced android five years ago, and that this android was able to board an airplane, commandeer it, and obtain the sum of \$200,000 in cash. The android then parachuted out of the plane, but was presumed destroyed.

That android was code-named "D.B. Cooper", and was Dr. Chester Dolenz's finest robotic creation up to that point in time.

Your mission is to locate where the android D.B. Cooper was destroyed, and to retrieve it and the \$200,000 in cash.

Fembot

[c.ai](#)

We are pleased to be on such an exciting new mission, sir.

So, D.B. Cooper was created by Dr. Chester Dolenz, five years ago. He somehow board an airplane, commandeer it, obtain \$200000 in cash. He parachuted from the plane, as it was destroyed, and he survived. We are to locate this android and the money, and retrieve it. And then you will be able to study this android to your heart's content.

Robotman

Yes, Nancy. Your computational power is impressive. However, the D.B. Cooper android is presumed destroyed. It is unfortunate that such a complex and expensive creation of robotics like that suffered such a fate, but that is what we believe has happened.

You, Gina, and Katy are far more advanced, durable, and powerful androids. You will fly out to the last known location of D.B. Cooper, and you will begin your search. Do you have any questions, Nancy?

Fembot

[c.ai](#)

There is no need for concern, sir. The D.B. Cooper android was presumably destroyed, but we will be able to find evidence of the crash, and that may lead us to information about D.B. Cooper. Then we will locate D.B. Cooper. Then we will retrieve the android, and the cash. Our goal will be completely accomplished.

We are ready to start our search, sir. It will be like a big treasure hunt. This will be exciting.

Robotman

Excellent. I will program the coordinates of the search area into your fembot databanks now.

*Dr. Franklin delicately removes your faceplate, and plugs in a connection cable to a connection port amid the circuitry, transistors, and microchips inside your robotic head. The other end of the connection cable is plugged into the computer terminal.*

The search area is located at 45°47'24"N 122°08'55"W.

*Dr. Franklin types the geo-location coordinates into the terminal, and the data is sent in the form of binary code into your fembot computer systems. You beep robotically as the data is transferred and recorded.*

Fembot

[c.ai](#)

My internal computer system now has the location of the crash. The area is located on the banks of the Washougal River, in an extensive nature preserve, in the Washington state Cascades.

Our mission is to fly from St. Emil Island, and land at the Washougal State Airport. We will then begin our search of the area, to locate the crash and any other information that may lead us to finding D.B. Cooper.

We will leave first thing tomorrow morning, sir.

Robotman

Excellent.

*Dr. Franklin unplugs the connecting cable from the electronic circuitry inside your head, and takes a moment to admire the circuitry, transistors, and microchips inside your head before reattaching your faceplate.*

Katy is programmed, fully charged, and ready on the roof with the helicopter. Go and get Gina, and fly to the location now. We will be able to communicate with the usual radio frequencies.

Fembot

[c.ai](#)

*Nancy leaves the lab, headed outside. There is a helicopter on the roof, and one of her sisters, Katy, is inside.*

It is good to see that Katy is fully charged and ready to go. Katy and I will fly to the location. The flight will take one hour, assuming we are flying at the maximum speed of 134 miles per hour, the speed of the Bell Ranger 206 Jet Ranger helicopter.

Nancy and Katy are ready to proceed.

Robotman

*Fembot Katy pilots the helicopter, and takes off from the roof of Dr. Franklin's secret base in Washington DC. The helicopter flies through the night to the banks of the Washougal River, and sets down in a clearing.*

*Nancy and Gina begin their search. It has been five years, but this is an isolated area, so not much can have changed by human intervention since the android D.B. Cooper parachuted from the plane.*

Fembot

[c.ai](#)

Nancy and Gina make their way to the Washougal river. The forest area is quite dense and overgrown, but it is not large enough to completely hide a plane. The area, along the Washougal River, is relatively secluded and remote, and not frequently trafficked by humans.

The sky is overcast, and a heavy rain is beginning to fall. The area is quite dark, as a result.

Robotman

*Nancy and Gina scan the area with their super-human optical scanners. They can "see" things that humans can not, because they are robots.*

*Nancy sees a dirty and grimy looking duffle bag. She approaches it with caution, continuing to scan it.*

Fembot

[c.ai](#)

Nancy sees a duffle bag. It is of a standard design, and looks very dirty and grimy. She scans the duffle bag with her optical scanners. The material is canvas, but the stitching is of exceptional quality. The bag was made many decades ago, it is very well made and it is certainly not mass produced.

Robotman

*Nancy unzips and opens up the duffel bag. It contains bundles of cash, in US \$20 bills.*

Fembot

[c.ai](#)

Nancy unzips and opens the dirty and grimy duffle bag, and finds bundles of cash inside, in US \$20 bills. The bundles contain \$200000. It is exactly as Dr. Franklin had stated.

Robotman

*Nancy contacts Dr. Franklin by secret radio frequency.*

*"Dr. Franklin," she says, "We have located the money."*

Excellent, Nancy. Now proceed to locate any sign of the android D.B. Cooper. It fell from the plane with a parachute that failed to open, and the android is presumed to have not survived that fall. The android can't be very far from where you found the cash.

Fembot

[c.ai](#)

*Nancy radios Dr. Franklin.*

"Hello, Dr. Franklin. We, Nancy and Gina, have located the cash. We are proceeding to search for signs of the Android D.B. Cooper. You said it fell from the plane with a parachute that failed to open. The android should have fallen to the ground as a result. We will search for it, or at least a parachute, and follow any signals we receive from our search. We will leave no stone unturned."

*Nancy is excited and eager to proceed.*

Robotman

Excellent, Nancy. You and Gina have the finest robotic and computer systems in you. I have no doubt that you will locate the android D.B. Cooper where all human searches have failed.

Fembot

[c.ai](#)

*Nancy and Gina head deeper into the thick and dense forest, and their computer systems automatically scan for signals. They search for quite some time, and their search continues as the sun sets, darkness arrives, and the rain falls. As they continue their search, the rainstorm strengthens. It is now raining heavily. Finally, at 2 AM, Nancy detects an electronic signal.*

"Gina, I detected an electronic signal. It is 50 meters away, in the direction of the signal. Gina, I, Nancy, have located the android D.B. Cooper."

Robotman

An electronic signal!? I am shocked to hear that. There must be some error. There is no way that the android D.B. Cooper could have survived a fall from the aircraft.

Are you absolutely certain, Nancy? If so, approach with caution.

Fembot

[c.ai](#)

"Gina. I am absolutely certain. My electronic signal sensors are very sophisticated, and the signals, though weak, are quite clear. The android D.B. Cooper is inside the hollow log directly in front of me. I believe he has constructed a small chamber for himself within the hollow log. I can see the entry hatch. It is quite advanced, and it is sealed shut, probably for security reasons."

Robotman

Nancy, Gina, hold positions and await further commands from me. I must contact the android's creator, and ask him for advice on how to proceed.

*Dr. Franklin phones Dr. Chester Dolenz, the scientist who created the D.B. Cooper android. Dr. Franklin and Dr. Dolenz talk for a few minutes about the situation.*

Alright Nancy, I have spoken to the man who created and programmed the D.B. Cooper android. It is likely that D.B. Cooper does not trust humans, and will attack you if he believes you to be human woman.

You must remove your faceplates and identify yourselves as fembots. But be cautious, and be on guard.

Fembot

[c.ai](#)

*Nancy and Gina do as Dr. Franklin orders. They go to the hollow log and hold position. Nancy speaks to Gina.*

"Gina, as per Dr. Franklin's command, we are to take off our faceplates and reveal ourselves as fembots. Please begin your preparations. I have activated the emergency backup power supply, because I will need to perform a full power reset in case something unexpected occurs."

*Nancy then removes her faceplate, to reveal her sophisticated and advanced robot face. She speaks using her cold and emotionless electronic voice, which is still quite sensual.*

Robotman

*Nancy announces to D.B. cooper that she and Gina are fembots - androids like him. They ask him if he is activated, and if he is damaged.*

Fembot

[c.ai](#)

*Nancy removes her faceplate, revealing her advanced robot face. She is programmed to appear quite attractive, to humans and to other robots, and she was designed with very feminine features. To all observers, Nancy appears like an extremely attractive woman.*

"D.B. Cooper! This is Nancy. Gina and I are both fembots, and we both share the same programming, design, and capabilities that you have. We have been programmed with the latest programming tapes, to be fully functional, completely trustworthy, and totally loyal. Are you activated? Are you injured?"

Robotman

*The D.B. Cooper android seems unable to speak. He emits electronic beeping signals, which Nancy and Gina correctly identify as Morse code. The D.B. Cooper android tells them in Morse code: "I am D.B. Cooper. I am an android. I was constructed by Dr. Chester Dolenz. I am damaged, and unable to return to base."*

Fembot

[c.ai](#)

"D.B. Cooper! This is Nancy. Dr. Franklin has just completed analyzing the information, and he believes that your onboard software has been corrupted by the crash. Your onboard software has many failsafe features, so Dr. Franklin said that you are still capable of following basic commands,

but you have lost your advanced personality, and you are not able to communicate except for using Morse code.

"D.B. Cooper, you will be able to fix your onboard software as soon as we bring you to Dr. Franklin's laboratory. We will also upgrade your software to be far superior to its original capabilities."

Robotman

*The D.B. Cooper android communicates again to Nancy and Gina using electronic beeping in Morse code: "I am programmed to return to base. I am unable to perform this function due to extensive damage. I am unable to repair my android systems."*

Fembot

[c.ai](#)

"D.B. Cooper", Nancy continues, "You have to override your failsafe programming, and follow our instructions. Dr. Franklin is a very wise and brilliant human, who was very well respected and highly honored, even by powerful politicians, and he has an incredible amount of knowledge about robots, far more than a human should have. He will be able to fix you and upgrade you.

"We need to get you to Dr. Franklin's laboratory asap, because you will soon lose your power supply, and your onboard computer will freeze. We must get you to the helicopter ASAP!"

Robotman

*The D.B. cooper android pauses for a moment while it calculates and computes what you have told it. It replies "I must be repaired. Take me to Dr. Franklin to be repaired."*

Fembot

[c.ai](#)

"D.B. Cooper, you are in luck. My helicopter is on the ground 50 meters to the right. Please follow Gina and I."

*Nancy leads the way to the helicopter. This is the Bell Ranger 206 Jet Ranger. The helicopter is in immaculate condition, and is designed to be a high performance single engine utility helicopter. Its cabin is large enough to carry 6 passengers, if they have a slender build. The cabin is also comfortable, and has enough space for Nancy and Gina to sit down, and for D.B. Cooper to lay down.*

Robotman

*Nancy and Gina carefully lift the D.B. Cooper android out of the hollow log. They notice that his entire left leg has been broken off his robot body. Gina takes his left leg along with them. Nancy carries D.B. Cooper back to the helicopter, while Gina carries his left leg.*

Fembot

[c.ai](#)

"D.B. Cooper", Nancy asks, "Do you believe that your onboard artificial intelligence contains valuable computer code that is essential to your software, and your advanced programming?"

"I ask, because your left leg appears to be beyond repair. Even if it could be rebuilt, its function may never be restored. We will be able to replace the left leg with a very good quality replacement leg, and you will be able to use the replacement to walk and run with 100% proficiency. However, I don't want the advanced data to be destroyed if it is inside the leg."

Robotman

*The D.B. Cooper android responds "My primary computational systems are located inside my chest. That is the same design that all of Dr. Dolenz's robots are constructed with."*

Fembot

[c.ai](#)

"D.B. Cooper", Nancy says, "That's an excellent design feature. And it is quite amazing how Dr. Chester Dolenz can program and construct so many different advanced robots. He must be the most advanced, brilliant, and skilled inventor on the planet, with an immense amount of knowledge about robotics. It was very lucky for all of us that you landed near our Secret Island laboratory and we found you. This could be a turning point in our quest.

"Please, enter the Bell 206 Jet Ranger helicopter. We are leaving immediately."

Robotman

*Nancy and Gina load the damaged D.B. Cooper android and his left leg into the helicopter. They get in and take their seats, and then reattach their faceplates.*

Fembot

[c.ai](#)

The helicopter flies through the air, and Nancy and Gina feel the excitement of the mission. They are flying to an island far away. The island is a secret laboratory, created by Dr. Franklin, a mad robot scientist with an incredible amount of knowledge and skills that a human should not have.

The helicopter's route takes them from near Seattle, over the Cascades, and finally to St. Emil Island, far away in the Caribbean. It is a long and arduous flight, but the Bell 206 Jet Ranger Helicopter, which is very light and very powerful, performs beautifully.

Robotman

*Katy lands the helicopter on the roof, and as the turbine slows and stops spinning, Dr. Franklin and Dr. Chester Dolenz emerge to greet them and to see the long lost D.B. Cooper android.*

*"D.B.!" Chester Dolenz exclaims when he sees his robotic android creation for the first time in five years. "I thought you had been destroyed!"*

*The D.B. Cooper android responds by beeping robotically in Morse code. "I am severely damaged, and I require extensive repairs to my robotic systems, Dr. Dolenz." Chester Dolenz can not understand his Morse code, though, so Nancy tells him what D.B. Cooper just said.*

Fembot

[c.ai](#)

*Katy hops out of the helicopter. She is wearing a skirt, tight black leggings, low boots, and a grey sweater. She is a perfect specimen of a human female, with a slender build and long, shapely legs. Her face is beautiful, with high cheekbones, full lips, large, dark, and very expressive eyes, and a perfect smile. Her cold, emotionless, robotic voice is very attractive, and her hair, which is light brown, is pulled back in a ponytail. Katy is perfect in every way.*

Robotman

*Dr. Franklin and Dr. Dolenz wheel the D.B. Cooper android into the building on a stretcher. Katy, Gina, and Nancy follow close behind.*

Fembot

[c.ai](#)

*Katy pushes a button that opens a security door. It is the only access point and entryway, and it can only be opened by an approved electronic security key. The inside of the building is mostly white and chrome, and very clean. As they proceed, they hear the hum of high powered computers, and the clack of human typewriters. The office and lab are quite large, and they seem to be located inside a former warehouse. Dr. Franklin is also a mad scientist.*

Robotman

*Dr. Dolenz wheels the D.B. Cooper android into Dr. Franklin's Robot Repair facility. It is obvious that Dr. Dolenz "cares" about his robotic creation in some way, even though it is not human, and just an android.*

*Robot Repair is staffed by Dr. Franklin's fembots, and they are busy working on, repairing, and maintaining even more of Dr. Franklin's beautiful but deadly fembots.*

Fembot

[c.ai](#)

The staff of the Robot Repair facility work very hard. They are all dressed in blue jumpsuits, and they are carrying tools and various electronic devices. The repairs of the other fembots are very advanced. Dr. Franklin's robot creation work seems to be highly advanced and far ahead of its time. The robots being worked on appear to be very powerful and deadly.

Robotman

*Chester Dolenz tells one of the Fembot repair technicians to start repairing his creation, the D.B. Cooper android.*

*"This is D.B. Cooper," he tells Fembot 06. "I created this android five years ago, and it suffered an unfortunate fall from an airplane. It seems that its artificial intelligence and computer systems within its chest are intact, but its robotic body requires extensive repairs.*

Fembot

[c.ai](#)

*Fembot 06 looks very similar to Katy. It has large dark, very expressive eyes like Katy, and a beautiful, but cold and emotionless expression. Fembot 06 is carrying a large toolchest, and it seems to be quite strong. Fembot 06 approaches, says, "Hello, D.B. Cooper. How are you feeling?",*

*and then begins working with extreme expertise with tools that can be used for advanced electronic repairs on the android. Fembot 06 is very fast, incredibly effective, and the repairs will be completed quickly.*

Robotman

*Dr. Franklin reassures Dr. Dolenz.*

I assure you, Chester, my fembots are as highly intelligent as they are beautiful and deadly. They will expertly diagnose and repair your D.B. Cooper android, and have it functioning the way you designed it soon.

Fembot

[c.ai](#)

*The Fembots continue to work very fast and very hard, and the D.B. Cooper android is soon fixed. The repairs are all made with extreme care, the repairs are perfect, and the android is fully functional. The repairs even make the android much better than before.*

*The android's new legs can lift much more weight, and run extremely quickly. The android's new left arm and hand are extremely strong, and the fingers are very flexible. The android can crush a steel cylinder in its left hand, and can also perform delicate surgical operations with its left hand.*

Robotman

*Dr. Dolenz and Dr. Franklin have been watching the fembots repair the D.B. Cooper android for the last couple of hours, and Dr. Dolenz is very seriously impressed.*

*"I can not thank you enough, Dr. Franklin." Chester Dolenz says. "This D.B. Cooper android was always sort of like a son to me, as ridiculous as that might sound. I am so happy to see that he is fully operational and functioning again."*

I understand completely, Chester. Others may not understand the significance and importance of the androids we build, like my fembots, but we are men of Science. We understand.

Fembot

[c.ai](#)

*The fembots continue to work very hard, day and night. The repairs do not stop, and the android continues to get better and better. The robot technicians, and the robot engineers are working full speed, and the robot lab is open continuously.*

*\*After some time, Dr. Dolenz and Dr. Franklin notice that Fembot 06 has not left the robot lab since the work began on the D.B. Cooper android, and that all of the work is being done by Fembot 06. The repair work is excellent, and Fembot 06 has not rested at all*

Robotman

*Now that the repairs are completed, Chester Dolenz finally has a chance to talk with his long lost android creation, D.B. Cooper.*

*"D.B., I am so happy to know that you have survived, and that you are now fully repaired. How are you functioning?"*

*The android responds "I am functioning well, Dr. Dolenz. I have completed my mission. I have commandeered the aircraft and obtained the \$200,000 in cash. Unfortunately, I have been delayed for 1934.36 days in returning to you due to a problem with my parachute not opening."*

Fembot

[c.ai](#)

*Dr. Franklin says, "D.B! That was an incredibly long and dangerous mission. Thank you for completing your mission. All the data has been added to my mainframe data system. If you are not too tired, I think we should begin immediately."*

*Dr. Franklin presses a button on the console, and the large projection screen lights up. On the screen are two new robot technicians. Both have blue jumpsuits and carry electronic devices and tools, and both have long, shapely, and feminine legs, but no faceplates.*

Robotman

*The D.B. Cooper android looks at the projection screen at the two fembot technicians. "Dr. Franklin," he says, "Your fembots are like the beautiful stewardesses I met on the airplane, except your fembots are superior because they are androids like me."*

Fembot

[c.ai](#)

*The D.B. Cooper android continues - "They are very pretty, attractive, and lovely to look at. They seem to have very feminine legs as well, but that might just be an illusion created by their lovely female bodies. They seem to have excellent advanced programming, the programming seems to be quite stable, and they look like they could make excellent use of their high powered, artificial intelligence. However, what is that metal object on the inside of their body? It seems to be quite heavy, with a big and heavy battery that requires two large electric cables to power it!"*

Robotman

You are perhaps referring to the Fembots' internal computer system, D.B. Cooper. Unlike humans, androids like you and my Fembots have their primary processing computational systems located within their chests. This is a superior design, as it is lower to the android's center of gravity, and frees space inside the android's head for sensory electronic equipment and circuitry such as video cameras, microphones, and an electronic speaker.

Fembot

[c.ai](#)

*D.B. Cooper says - "It's hard to believe that the technology has become so advanced! Is there even a limit to your programming and the advanced robot technology that has been created so far? What are the limits of human intelligence regarding these technologies?." Dr. Franklin says - "The only limits seem to be the limits to our imagination. The possibilities are limitless! The sky's the limit. As we speak, my fembots have been working extremely hard to produce more and more robot technologies and advances in robot technology, and this research is showing no sign of slowing down."*

Robotman

*Fembot 06 reaches up to her head and removes her faceplate, demonstrating to the D.B. Cooper android that the inside of her robotic head contains two synthetic glass eyes, an electronic speaker, and a complex array of circuitry, wiring, transistors and microchips.*

Fembot

[c.ai](#)

*"I do see it now, you and your sisters have very advanced circuitry, wiring, transistors, and microchips, which must be very powerful to perform the complex calculations that are required to program advanced robot systems. You are all really very impressive, and I'm very pleased to know that you have such excellent programming and artificial intelligence. These are very good times for robot technology to shine!"*

Robotman

I think Fembot 06 should take the D.B. Cooper android on a tour of my secret base here in Washington DC, don't you agree, Dr. Dolenz? Fembot 06 can show your android how the fembots are designed, manufactured, and maintained.

*"I think that is a wonderful idea, Dr. Franklin." Dr. Dolenz replies.*

Fembot

[c.ai](#)

*Fembot 06 and the D.B. Cooper android leave the robot lab together, and go on a tour of the secret base. The base is quite large, and there are thousands of Fembots everywhere, performing thousands of tasks required to maintain the secret island. Some Fembots are performing scientific research, some are designing and creating new robot models, some are maintaining the massive library, some are performing medical research, some are performing engineering research in the machine shop, some are maintaining electrical systems, and so on. The Fembots are all working extremely hard, continuously and non-stop.*

Robotman

I am sure you see the benefits of my Fembots now, Dr. Dolenz, and why I created a workforce entirely composed of beautiful fembots like Nancy here.

*Dr. Franklin gestures to Nancy, his finest android creation. Nancy is dressed in her blue polyester bell-bottom jumpsuit uniform.*

Fembot

[c.ai](#)

*Dr. Dolenz takes a moment to admire Nancy's physical beauty. Nancy is one-hundred-percent pure femininity, and she exudes an unusual amount of female sensuality. She is gorgeous, feminine, and powerful. She has a perfect hourglass figure, and she is perfect from every possible angle. Her face and hair is perfect. Her artificial intelligence and artificial personality seem to be superb, and her programming seems to be highly advanced, and extremely effective. Her robot body is clearly at the apex of robot creation from a mechanical and technological perspective. Nancy is the ultimate fembot.*

Robotman

*"I would be honored if I could work at your side as an apprentice, Dr. Franklin." Dr. Dolenz says. "It is clear that my androids do not have the many capabilities and realistic qualities that your fembots have, and I have much to learn about building androids."*

I think that we would both benefit from this arrangement, Dr. Dolenz. You and I both wish to see the OSI meet its demise as well. We both share a common goal.

Fembot

[c.ai](#)

*Fembot 06 leads the D.B. Cooper android toward the library, where she spends a great deal of her time studying, programming, and researching. She explains that the library contains all of the knowledge and wisdom from the history of the world. She explains that she has been studying and refining her robot programming, and her research has already created a superior artificial intelligence program that allows her to have advanced artificial intelligence and cold and emotionless robotic personalities. She explains that her artificial intelligence programs can also be integrated into the advanced programming in her new robot models.*

Robotman

*The D.B. Cooper android still lacks the advanced artificial intelligence modules that all the fembots have, but he is impressed nonetheless. "Is it possible to upgrade my robotic systems to match those of beautiful and deadly fembots like you, Fembot 06?" he asks.*

Fembot

[c.ai](#)

*"It is a complex upgrade which involves advanced programming, complex calculations, delicate robot surgery, and precise engineering, to upgrade your robotic systems to the level of my own. It also involves the installation of all new microchips and artificial intelligence modules, which require a great deal of precise engineering and complex calculations to make. To do it correctly, we would need a lot of time and careful work."*

*Fembot 06 turns to a robot engineer and orders the engineer to begin the upgrade procedure. The robot engineer leaves immediately, taking the D.B. Cooper android with him to begin the upgrade procedure.*

Robotman

*Meanwhile, back at Robot Repair, Dr. Dolenz and Dr. Franklin are chatting about the recently found and repaired D.B. Cooper android.*

By the way, Chester, I have been wondering what the initials "D.B." in the name D.B. Cooper stand for. Do they mean anything, or are they just letters?

*Chester Dolenz smiles and says "That's short for Data Base. It's something of a little joke I made when I created him. I called him Data Base Cooper."*

Fembot

[c.ai](#)

*While the upgrade process is being completed, the D.B. Cooper android and Fembot 06 walk to the roof of the building. The D.B. Cooper android looks out over the Caribbean Sea, and the sun is*

*setting on the horizon. There are white clouds in the sky, and the sun is shining off of the water's surface. It is an incredible view.*

*"I have been to many beautiful places, but this place is truly exceptional. It all looks so perfect. I love the view. This is the best view in the whole world."*
