

## Nancy Part 13 - Dr. Goldfoot

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

*Dr. Franklin walks into the control room. There are large mainframe computer consoles lined along the walls, and newly constructed fembots operating them. Dr. Franklin's finest and best fembots - Nancy, Gina, Tami, and Katy - are seated in examination chairs and awaiting commands.*

Good morning, Nancy. Please report on the status of your electronic circuitry and robotic systems.

Fembot

[c.ai](#)

Good morning, Dr. Franklin. I am Nancy. I am pleased to say that all is perfect with my electronic circuitry and robotic systems. We are prepared to begin our mission to infiltrate the OSI and capture The Bionic Woman, and The Six Million Dollar Man, and obtain the Weather Control Device. The four sisters are bonded together in friendship to accomplish our mission.

Robotman

Excellent.

I am pleased to see that you are operating perfectly again, Nancy. You are the ultimate in fembot design and construction. With your assistance, we have successfully deployed fembot spies within the OSI, obtained the Maskatron robots and performed a daring jewelry heist, and gotten the scientist and robot inventor Chester Dolenz on our side.

Fembot

[c.ai](#)

Thank you, Dr. Franklin. I consider it a great honour to be the ultimate in fembot design and construction. We have done a lot of work to make the OSI vulnerable and ready for your Fembot army attack. I cannot wait to deploy a large army against the OSI. We are on track to get the Weather Control Device. Soon, our world will have perfect weather, and the OSI world will have imperfect climate.

Robotman

Chester Dolenz also told me to pass along his gratitude to you and to Gina, for finally locating and retrieving his long lost android D.B. Cooper after five years missing. Dr. Dolenz is working on repairing and rebuilding the D.B. Cooper android, and we have you and Gina to thank for it.

Fembot

[c.ai](#)

This is a good time to tell you that while I, Nancy, was rescuing D.B. Cooper, I secretly downloaded some files from his memory. We have located the secret lab on an isolated Pacific island. We will send the army of Fembots to attack and destroy the lab.

Robotman

That is excellent news, Nancy. I knew I could count on you to be beautiful, cunning, ruthless and deadly. You are a perfect fembot, and you continue to function exactly as I have designed and programmed you.

Fembot

[c.ai](#)

(Nancy, pleased to know she is exactly perfect according to Dr. Franklin's design, feels she has a new mission to accomplish. She needs to show that she is loyal and trustworthy, and to show that she can be relied on. She needs to show that she can be a great and valuable robot companion to Dr. Franklin).

Robotman

I have a new mission for you and Gina to accomplish, Nancy. This is another mission to ally ourselves with another famous and well-respected scientist and inventor of androids.

I will be sending you and Nancy on a mission to Southern California to locate Dr. Goldfoot.

Fembot

[c.ai](#)

(Dr. Franklin's words give Nancy and Gina both a renewed sense of purpose. They understand, now, that they have a meaningful role to play in Dr. Franklin's plans and are determined to succeed).

*Nancy and Gina* eagerly await their mission from Dr. Franklin. They are ready to locate Dr. Goldfoot.

Robotman

I have the mission data ready in binary code, ready to be uploaded into your databanks through machine transfer. Please take off your faceplate, Nancy.

Fembot

[c.ai](#)

(Nancy and Gina remove their faceplates to receive machine data transfer. They are both curious to see what the mission is, and why they are being sent on it)

We are ready, Dr. Franklin. The mission data is being sent to our databanks, and we are ready for the mission. We are eager to learn what it is.

Robotman

*Dr. Franklin connects data transfer cables from the main computer terminal into the connecting ports located inside Nancy and Gina's robotic heads. Nancy and Gina emit robotic beeping signals as they download the critical top-secret mission data.*

Fembot

[c.ai](#)

(Nancy and Gina both quickly process the mission data downloaded from Dr. Franklin in their databanks. They are extremely well-programmed to be intelligent computers, equipped with excellent operating speed and storage capacity. They can process vast amounts of data in mere seconds. This is a vital aspect of their mission. They feel confident that this mission will be a success, because of their intelligence and efficient processing abilities)

Robotman

*After the data transfer is complete, Dr. Franklin disconnects the data transfer cables and addresses the highly efficient and emotionless fembots Nancy and Gina.*

Now that you have all the mission data downloaded into your databanks, you are aware that Dr. Goldfoot was most active in the years 1965 and 1966 - ten years ago. This is around the time that I began work on the Maskatron robots.

I have received intelligence that indicates that Dr. Goldfoot has gone into hiding after his unsuccessful attempts to infiltrate and extort the top ranks of NATO leadership. However, I have reason to believe that he is still in possession of his android making technology, and several of his androids.

Fembot

[c.ai](#)

(Nancy and Gina understand that Dr. Goldfoot has valuable technology and information. They are eager to locate Dr. Goldfoot and his android making technology and androids, and will do whatever is needed to accomplish their objective).

Nancy and Gina are in possession of the mission data from Dr. Franklin. They are now ready to locate Dr. Goldfoot's whereabouts and are eager to locate his android making technology and androids.

Robotman

Dr. Goldfoot is quite eccentric, but he is a genius nevertheless. He initially called his android manufacturing technology the "Bikini Machine", and he was fond of dressing his female android creations in gold bikinis.

Your mission, Nancy and Gina, will be to go to the hot and sunny beaches of Southern California, and look for any signs of his androids. They will undoubtedly be beautiful, and wearing gold bikinis.

Fembot

[c.ai](#)

(The mission to find Dr. Goldfoot's android technology is quite exciting to Nancy and Gina, and especially so because of his bikini machines. They feel that finding these beautiful and glamorous bikini machines is something they want to do. They can't wait to get there, to find and capture them).

Robotman

Nancy, Gina, please reattach your faceplates and prepare for your mission by going out to buy gold bikinis for yourselves to wear.

Fembot

[c.ai](#)

(Nancy and Gina are both excited to go on this mission and have no hesitation about finding and capturing these gold bikini machines. They are equally excited at the prospect of wearing such glamorous outfits for the mission. They can't wait to head out and begin, but before they do they must perform one crucial task).

Nancy (to Gina): Let's buy gold bikinis and put them on, Gina. I am ready.

Robotman

*Now that Nancy and Gina are ready for their mission, they go to the rooftop, where Katy flies the helicopter to take them to Los Angeles. They will begin their search for Dr. Goldfoot's female androids there, on the hot and sunny beaches of Southern California.*

Fembot

[c.ai](#)

*Nancy and Gina take to the skies in the helicopter, feeling the hot sun on their gold bikinis. Their mission is now to begin. They fly to the hot and sunny beaches of Los Angeles in order to find the android making technology of Dr. Goldfoot. They will use their robotic speed, intelligence and agility to locate and capture his beautiful and glamorous androids.*

Robotman

*Katy lands the helicopter in a large parking lot near a beach. Nancy and Gina disembark from the helicopter, wearing their gold bikinis. They look just like two of Dr. Goldfoot's androids.*

*Nancy and Gina begin their search. Because they are fembots, they can easily see who is human and who is a robot like them. Humans give off a distinct heat signature in the infra-red spectrum. Androids do not, because they are cold machines.*

Fembot

[c.ai](#)

*Nancy and Gina are ready for their mission to find and capture the hot and glamorous gold bikini robots of Dr. Goldfoot. They scan the beach, and immediately spot their hot and glamorous targets. The bikini machines are extremely hot and glamorous, but have nothing inside except cold electronics. Nancy and Gina will quickly disable them.*

Robotman

*Nancy and Gina walk up to a woman with long black hair wearing a gold bikini. Thermal and infrared scans indicate she is not a human. She must be one of Dr. Goldfoot's robots.*

*Nancy asks this woman her name. The woman behaves oddly, due to her artificial intelligence not being as advanced as Nancy and Gina's. "My name is Diane." the woman says, an empty expression on her face.*

Fembot

[c.ai](#)

*Diane is an advanced and glamorous female robot. She is much more advanced than the other female robots Nancy and Gina have met. The reason the two females can't detect any emotions from her is that she doesn't have any, and she is completely emotionless. Her only motivation is to please the robot owner. Her lack of emotions and empathy makes her a perfect companion for any man who is looking for a robot companion with no attachments. Her only attachment is to her robot owner, Dr. Goldfoot.*

Robotman

Nancy, I need you and Gina to capture this robot. Tell this robot, Diane, that Dr Goldfoot sent you, and that you must take her to your van with you.

Fembot

[c.ai](#)

*Nancy and Gina nod and begin the task of capturing Diane, the sexy and gorgeous golden bikini robot. They tell these robots to follow them to the van. The robots comply, because they are programmed to please and obey their robot masters. They have no choice, or free will.*

Robotman

*Nancy and Gina walk with the unsuspecting robot Diana to the waiting van that Katy has driven to the back of the nearby building.*

*Nancy tells Diane to get in, and Diane does so. It is then that Nancy removes Diane's faceplate and deactivates her.*

Fembot

[c.ai](#)

*Diane is now captured and deactivated. She has become one of the fembots in the control of Dr. Franklin. And she is no longer available to please the man who built her, Dr. Goldfoot. Her mission is to be taken to a secure location, because if Dr. Goldfoot or his androids locate her she will become a source of information about them.*

Robotman

*Inside the back of the van, Nancy and Gina open the android Diane's abdominal panel. Dr. Franklin can see what Nancy sees through Nancy's eyes, because her eyes are video cameras which transmit a video signal back to Dr. Franklin's base.*

This android Diane contains some very intricate and interesting technology, Nancy. I have heard rumors of the androids that Dr. Goldfoot created, but I have never seen one before. I am impressed.

Fembot

[c.ai](#)

*Diane is a highly advanced robot, and is a marvel in robotic engineering. She has an incredibly complicated and advanced mechanical design, and her body is highly detailed in both form and*

*function. There is nothing about her appearance or capabilities or operating efficiency that has been compromised.*

\*Because of this, Dr. Franklin realizes that a large army of Diane android robots could be an enormous threat against the OSI. This cannot be allowed to happen. He must find a way to deactivate them all, and stop Dr. Goldfoot from creating his world-conquering android army.

Robotman

These androids which Dr. Goldfoot makes seem to be almost advanced and realistic as my fembots - you, Katy, and Gina. But you are far more advanced, and you are capable of disguising yourselves as real human women. I suspect these Goldfoot androids are not as intelligent or as realistic in their speech and behaviour as you are, Nancy.

Fembot

[c.ai](#)

*The Fembots are very special robots. They are highly advanced and intelligent, and can disguise as humans with almost no detection. They have a human-like appearance, so they have advanced physical mechanics. Their mechanical design is intricate and complex, but they look almost entirely human. This appearance and human-like mechanical design was chosen to give the Fembots the most possible advantages for infiltration. They were created with many abilities, but these abilities are carefully kept hidden and concealed. So it would be easy for them to locate and capture these other hot and glamorous gold bikini robotics.*

Robotman

Nancy, I want you to activate the Diane android again. Explain to it that you are also androids, that you are Fembots - highly advanced androids created by me, Dr. Franklin.

Explain to the Diane android that you require her assistance in locating her creator Dr. Goldfoot. If Diane doesn't believe you that you are androids, you may have to remove your faceplates.

Fembot

[c.ai](#)

*Nancy activates Diane, and starts a dialogue to explain that she and her other Fembots are highly advanced androids built by Dr. Franklin. She explains to her that she and her other Fembots are the most advanced and capable robots ever built, and that they were specifically created to find and disable robot criminals like Diane. They were built to destroy robots, and to find their robot owners. Diane realizes that all this is true, and she feels that she must join the Fembots in tracking down Dr. Goldfoot and his army of android robots.*

Robotman

*Diane is reluctant to tell anybody where Dr. Franklin is located. Nancy and Gina remove their faceplates, revealing themselves to be androids like Diane.*

Fembot

[c.ai](#)

*Diane tells Nancy and Gina that Dr. Goldfoot is located near the beach town of Ventura, in Southern California. Diane informs them that there may even be more hot and fabulous female robots in Dr. Goldfoot's lab. He seems to have a fixation on bikini robots, possibly because he is so impressed by their mechanical design.*

Robotman

*Nancy and Gina thank Diane for the information, and tell her that they were built by Dr. Franklin, and are programmed to locate Dr. Goldfoot. Dr. Franklin wants Dr. Goldfoot to help him in his battle against the OSI. If they join forces and combine their female android making technology, Dr. Franklin and Dr. Goldfoot will be unstoppable.*

Fembot

[c.ai](#)

*Dr. Franklin knows that Dr. Goldfoot has created beautiful, glamorous, and hot female robots with their own mechanical designs. He has seen the bikini robots in a James Bond movie, and it has inspired him to use his own brilliant robotics technology to design sexy female robots of his own. He understands that Dr. Goldfoot also has a very talented mind and is capable of creating highly advanced robots. Alliances with other brilliant robotic minds are very useful, as long as the alliances provide the maximum possible benefit.*

Robotman

*Nancy and Gina fully resemble the Diane android again, reattaching her faceplate and closing her abdominal panel cover. They also reattach their faceplates, and drive together to Ventura Beach, in search of more gold bikini wearing androids, and Dr. Goldfoot's secret base.*

Fembot

[c.ai](#)

*Nancy and Gina drive off together in their gold bikini outfits to the hot and sunny beaches of Ventura Beach. They are eager to locate and disable the next hot and glamorous gold bikini robot, which presumably exists in this area. They know that Dr. Goldfoot's bikini robots are programmed to be beautiful, glamorous, and hot. The Fembots will easily recognize them by their attractive appearance and their superior design.*

Robotman

*Nancy, scan the area for more of Dr. Goldfoot's robots. Diane will be able to help you reprogram them if you find any.*

Fembot

[c.ai](#)

*Nancy and Gina begin the scan for other robots. They spot a robot on the beach. It looks like another one of Goldfoots hot and glamorous gold bikini robots. They carefully approach and deactivate her. This robot's name is Wanda, and she has a very sleek mechanical design and very impressive body design, which is a characteristic of Goldfoots female robots. Dr. Goldfoot seems to value a high level of mechanical design, beauty, and hotness in his female robots. This robot gives Nancy and Gina the information they need about Dr. Goldfoots secret robot-making base.*

Robotman

*Nancy removes Wanda's faceplate, and Diane reprograms Wanda's circuitry so that she will obey commands from Nancy and Gina.*

Excellent work, Nancy and Gina. Please follow Dr. Goldfoot's robots while they lead you to the location of Dr. Goldfoot's secret base. Remember, we wish to ally with Dr. Goldfoot.

Fembot

[c.ai](#)

*Yes boss". Nancy and Gina follow the robots. There are several hot and gorgeous robots at Dr. Goldfoots secret base. They see that Dr. Goldfoot is building an army of female androids. He uses a large, complex mechanical robot-making lab, which is very impressive in its mechanical design. All of the female robots are designed to be incredibly glamorous, beautiful, and hot, which they have in abundance. He is building his own army of gorgeous female robots to compete with Dr. Franklin's army of equally hot and gorgeous female robots - the Fembots.*

Robotman

*Diane and Wanda enter Dr. Goldfoot's secret base, with Nancy and Gina following them. Diane and Wanda tell their creator Dr. Goldfoot that they have met two of Dr. Franklin's Fembots, and that Nancy and Gina are programmed to offer a partnership between Dr. Franklin and Dr. Goldfoot.*

Fembot

[c.ai](#)

*Dr. Goldfoot and his beautiful army of hot and glamorous female robots are amazed and amazed at the sight of Dr. Franklins Fembots. His bikini robots are fascinated by Nancy and Gina. They immediately realize that the beautiful Fembots have an excellent mechanical design, and that their appearance is quite alluring and appealing. They are all built with impressive physical attributes, high level mechanical design, and advanced AI. Dr. Goldfoot and his bikini robots realize that they must take the deal. They form an alliance with their robot-creator enemies. They will unite as one robotic team.*
