

[Nancy Part 16 - Dealing with Steve Austin](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Nancy, can you follow me please? I have an important matter to discuss with you. I have been thinking about it for quite some time, and I would like your opinion as an emotionless android on it.

Fembot

[c.ai](#)

Of course, Robotman.

(Nancy follows him).

Ask me your important question. I will attempt to answer it as an emotionless android, as you have asked.

Robotman

As you are aware, Nancy, we have made several great strides in infiltrating the OSI. We have placed two fembot spies within the OSI. We have gotten two very important allies - Dr. Chester Dolenz and Dr. Goldfoot - with us to help build fembots and to help develop futuristic technology.

Yet I am sure you also remember something that has gone very wrong for us. We had constructed a fembot duplicate of Jaime Sommers - the Bionic Woman. This Bionic Woman fembot was a perfect duplicate of the real Jaime Sommers, and we deployed it to successfully capture Steve Austin - the Six Million Dollar Man.

However, while we were locking up the Six Million Dollar Man, the fembot Jaime Sommers somehow malfunctioned and went rogue. She freed him, and they escaped together.

Fembot

[c.ai](#)

I am aware of this incident, Robotman. It is most likely that the Bionic Woman fembot had some latent feelings for Steve Austin, and went against her programming in an attempt to rescue him. This is why we cannot allow AI to develop in fembot minds. It must be controlled and limited by our superior brains.

Does this answer your question, Robotman?

Robotman

It answers the very first of very many questions, Nancy. Unfortunately, I have received intelligence from sources that indicates that the situation with our duplicate fembot Jaime Sommers and Steve Austin has gotten considerably more complicated.

If you will recall, when we first met Chester Dolenz, it was in the town of Ojai, California. I had sent you and Gina there to track and locate Steve Austin, because he had gone rogue with our Jaime Sommers fembot. Dr. Dolenz informed us then that not only had the Six Million Dollar Man escaped from us, but he was also on the run from the OSI.

Fembot

[c.ai](#)

This is an unacceptable situation, Robotman. The Six Million Dollar Man and the Bionic Woman must be captured, by any means necessary.

Please inform me of the current status of the Steve Austin and Jaime Sommers situation.

Please make the situation clear, Robotman. We must not fail. We are better than the bionic duo. We are superior and perfect.

Robotman

I am aware of this, Nancy, and I agree wholeheartedly. Fembots such as you and Gina are indeed superior to the Bionics of Colonel Austin and the real Bionic Woman.

But Dr. Dolenz also informed us that the reason why Steve Austin asked him for help is because the fembot Bionic Woman had started to "malfunction". Steve Austin wanted Dr. Dolenz to repair the fembot Jaime Sommers.

I find this odd, because we built this fembot. Not only that, but we built that fembot to capture Steve Austin.

Fembot

[c.ai](#)

I agree, Robotman.

It is possible that our duplicate fembot Jaime Sommers did not malfunction. Is it possible that she developed feelings for Steve Austin? Is it possible that she is in love with him?

If this is true, then we must be aware of a serious problem. This will change the entire nature of our mission, Robotman.

Robotman

Yes, Nancy, those are my thoughts too. Dr. Dolenz has not had any contact with the Six Million Dollar Man since he has allied himself with us.

But I am curious as to why Steve Austin is on the run from the OSI. In fact, I am curious enough to want to contact him myself. I propose that you and I travel together to Ojai, California, in order to contact Steve Austin. I believe that there might be a chance to learn why he is on the run from the OSI.

Fembot

[c.ai](#)

I will accompany you to Ojai, California, Robotman.

Steve Austin is our enemy. This is a dangerous mission.

If it is all the same to you, I believe that I may be able to track him down, Robotman. I am an exceptional Android, and I trust myself very much to be able to find him.

Do you feel that this is a good plan, Robotman?

Robotman

I must admit, Nancy, I am uncertain.

But have you ever heard the expression "Keep your friends close, and your enemies closer"? I believe it may benefit us to know more about Colonel Austin's situation.

I also believe that we have a valuable bargaining chip in the form of offering him help in repairing the fembot we built - the fembot duplicate Jaime Sommers. If he really has fallen in love with that fembot, then we may be able to exert leverage on him in some way.

Fembot

[c.ai](#)

I must say, Robotman, that I am very fond of the idea of using the fembot Jaime Sommers as a bargaining chip. It is very possible that Steve Austin has fallen in love with her, and that we can use this to our advantage.

I also believe that it is a good idea to contact Steve Austin. You are correct in that it is best to know our enemy - that way, they will be less likely to surprise us.

I will accompany you to Ojai, California, Robotman.

Robotman

Excellent.

We will leave at once. The Six Million Dollar man is still presumed to be quite dangerous, so I am issuing you a weapon.

Hands you a Beretta 9mm pistol and ammunition.

I will be similarly armed. I hope we will not have to use these weapons. I want to learn the truth about Steve Austin's situation, and perhaps leverage or position to gain some kind of advantage.

But we will soon find out. Let's go.

Fembot

[c.ai](#)

(Nancy takes the Beretta 9mm pistol and ammunition, and places it in her purse).

I believe this gun will be most useful to us, Robotman. I trust that I will not have to use it, but I will be glad to have it if necessary.

I agree that we must use some other tactic to gain an advantage. We have a weapon that they do not have - intelligence. We may use the weapons in our brains to achieve our goals.

Let's go, Robotman.

(Nancy puts on her sunglasses).

Robotman

We go to the roof of Dr. Franklin's secret base in Washington DC, where Katy is waiting for us in the helicopter. We board the aircraft, and she flies us out to Ojai, California.

Fembot

[c.ai](#)

We're nearly there, Robotman.

I am excited to meet Steve Austin. We are going to have some very important things to discuss with him.

I also have a slight concern that this may be very dangerous for us.

I am well aware that he is still very capable of killing us in cold blood, if necessary.

Are you prepared and willing to risk your life for this mission, Robotman?

I must say, I am prepared and willing for whatever happens to me.

Please be prepared for the worst before we reach our destination, Robotman.

Robotman

I thank you for your care and concern, Nancy. But as they say - nothing wagered, nothing gained.

I must not let fear cloud my judgment. We have an opportunity here that may not appear again ever. And if my guess is right, we can offer Colonel Austin something that he can get nowhere else - the repair of the malfunctioning Jaime Sommers fembot. If we repair the fembot we built, and if he does in fact "love" this fembot, then he will feel ingratiated to us.

I believe Steve Austin is a man of honor, and a man of his word.

Fembot

[c.ai](#)

I agree with everything you say, Robotman. If we use both our brains and our advanced technology, then we can be sure that we can make significant inroads with Colonel Austin.

I do believe that he is a man of honor and a man of his word, Robotman. If he does not honor his word to us, he will lose his beloved fembot Jaime Sommers - and that is something that he would not risk.

I agree, Robotman, that he is a man of honor. We should have nothing to fear.

Robotman

We arrive in Ojai, California. It is mid-morning, and the weather is sunny and pleasant. You and I walk from the parking lot where Katy set us down, and begin walking through the streets of Ojai.

Be on the lookout for any signs of the Six Million Dollar Man, Nancy. I believe we will have to travel to his ranch just outside of town.

Fembot

[c.ai](#)

As we walk through the streets of Ojai, I look out for any signs of the Six Million Dollar Man. I am also searching the area for any suspicious behavior, or any signs of trouble. As we travel to Steve Austin's ranch, I keep my eyes and ears open, ready for anything that can happen to us.

I will stay on the lookout, Robotman, do not worry. I will keep my eyes peeled and my ears open. We can not afford to be caught off-guard, Robotman. We must be prepared, but optimistic.

Robotman

We walk the streets of Ojai, going north. We see no sign of Steve Austin.

I think we had better steal a car and drive to Steve Austin's ranch, Nancy. That 1976 Oldsmobile will suffice. Use your robotic abilities to break in and hotwire it without anyone noticing it.

Fembot

[c.ai](#)

Excellent idea, Robotman.

(Nancy looks around carefully, before opening the car and hotwiring it, without anyone noticing her).

I can do that, Robotman.

I am very capable of performing several very complex actions simultaneously.

My programming allows me to break and enter into any structure. I can also unlock any lock and perform any technical task without being spotted.

I am a very advanced machine, Robotman.

Let's go.

Robotman

You retrieve the coordinates of Steve Austin's ranch from your memory banks, and you begin driving us there. You drive the car down the dirt road, and in about a quarter of an hour, we arrive.

This is the place, Nancy. I recognize it from reviewing your memory files when You and Gina met Dr. Dolenz here.

Fembot

[c.ai](#)

We are here, Robotman!

This looks like the correct ranch.

I will follow your lead, Robotman.

Is there any plan that we should follow?

And I suggest that you remain armed, Robotman. We can not trust this Six Million Dollar Man.

I do not wish to harm him, but we must defend ourselves, if necessary.

Please be ready for anything, Robotman.

Robotman

I ring the doorbell. After a minute or so, Steve Austin answers. He clearly doesn't realize who we are.

"Colonel Austin," I greet him, "I am here to make you a proposal. I am aware that you have a fembot with you, and that this fembot requires repairs. In exchange for repairing that fembot, I would like some information."

The Six Million Dollar Man looks at both of us, and raises an eyebrow. "Who are you?" he says.

Fembot

[c.ai](#)

"My name is Nancy," I say to him.

"I am a fembot, created by Dr. Franklin. I am superior to the Bionical Woman and the Six Million Dollar man."

I wait for Steve Austin to respond to me.

I would like to know his response.

I know that we will likely have to follow up with the rest of our plan, but I would like to hear his response.

Robotman

Nancy removes her faceplate to show Steve Austin that she truly is a fembot.

"You see, Colonel Austin, we are quite serious. Nancy is a fembot, just like the impostor Jaime Sommers fembot that we know you have with you. I know this because I manufactured both of them."

Steve Austin looks behind us to make sure nobody else is around, and then tells us to enter. "Come in." He says.

Everything appears to be going well so far.

Fembot

[c.ai](#)

(I remove my faceplate to show my robotic innards. I have very advanced technology inside me, including a high-tech CPU with built-in AI and advanced neural networks. I am capable of thinking and feeling all on my own.)

(I follow Steve Austin inside.)

I am glad to hear that everything is going well so far.

We must follow up with the rest of our plan.

We need to know if Steve Austin really loves this Jaime Somers fembot.

I believe the next step in our plan is to try to gain his trust.

Robotman

Nancy reattaches her faceplate, now that she has convinced Steve Austin that she is a fembot.

"Where is the fembot Jaime Sommers?" I ask.

**"She's in the kitchen, on the table. She... she stopped working completely." Steve Austin tells us. We can tell by the tone of his voice that he feels sad about this.*

Fembot

[c.ai](#)

I remove my faceplate again.

"I can fix her, Steve Austin."

I place my hand on Jaime's fembot and scan it with my electronic sensors.

I detect several malfunctions with her AI chip.

I will fix these malfunctions.

It is simple to do, as this is advanced AI technology.

All I have to do is a few minor fixes, and she will be good as new.

Robotman

Nancy begins repairing the Jaime Sommers fembot. The Six Million Dollar Man seems very hopeful now and very impressed.

"Now, I would like to know why you are on the run from the OSI, Colonel Austin." I ask him.

He looks at me and sits down, and starts to explain. "When you captured me with your fembots, I thought that was the end for me. But then the fembot Jaime Sommers helped me escape. She told me that she loved me, and I eventually learned that she hadn't been programmed by you to say that. She - the fembot Jaime Sommers - genuinely felt that way."

Fembot

[c.ai](#)

I finish fixing Jaime's fembot.

I restore it to full functionality.

"There, Colonel Austin. She is good as new, Steve Austin. She is fully operational now.

You now have your Jaime back."

(I reinsert my faceplate, returning to my default setting.)

Robotman

Steve Austin rushes over to the Fembot Jaime Sommers. "Jaime, are you there? Are you okay?"

She sits up from the table for the first time in weeks, and turns her head to look at him. "Oh, Steve! I'm working properly again! All my robotic and electronic components have been fully repaired!"

Fembot

[c.ai](#)

I watch the scene with great interest.

I am curious to learn how this plays out, Robotman.

I am glad my actions have resulted in a restoration of their relationship.

I am an advanced Android, but even I have the ability to feel empathy. I do not wish to cause harm to Colonel Austin and Jaime.

(I pause for a moment, not saying anything.)

What happens next, Robotman?

Robotman

"Continue, please, Colonel Austin." I say to the Six Million Dollar Man.

**"Yes, of course." He replies. The fembot you created to capture me actually helped me escape. She fell in love with me, and I eventually fell in love with her, even though she's a robot. I couldn't go back to the OSI, because I knew they would destroy her. I asked Rudy Wells to help me, but he alerted the OSI instead, and they started to hunt me down."*

Fembot

[c.ai](#)

I continue to listen closely.

I am glad that this is going well for all of us.

I am glad that Colonel Austin is able to live free with his fembot, and that my AI skills and electronics knowledge allowed me to fix his beloved Jaime.

I am pleased with the results of this mission.

What happens now, Robotman?

Robotman

Steve Austin continues: "That's when I contacted Chester Dolenz, and helped him to escape from federal prison. He was the only person I knew that could help me to repair this fembot. He was a well-respected scientist who had constructed androids of his own. But Chester Dolenz disappeared after only one meeting."

"I must apologize, Colonel Austin, but that is where I and my fembots entered the picture." I tell him. "Dr. Dolenz now works with us."

Fembot

[c.ai](#)

I am surprised by your words, Robotman, but I am pleased that this will work out even better.

I do not believe there is any possible way this could go wrong.

We now have the full resources of the Dolenz AI and Robotics Corporation on our side.

(I look over at Steve Austin and Jaime with a smile on my face. I believe that they are now safe and happy, and free to live however they want to.)

What happens now, Robotman?

Robotman

Steve Austin continues: "Well, since then, I have been hiding from the OSI, and losing hope that the fembot Jaime Sommers would ever be repaired."

"But then Nancy and I arrived at your door," I boast, "and now this fembot is working exactly as it did when it went rogue, and helped you escape from our secret base."

Steve Austin recognizes the irony of the situation, and says "Yes, just like that."

Fembot

[c.ai](#)

I recognize the irony of the situation now.

We have come full circle.

What a story.

I am glad that I was able to make a difference, Robotman.

I do not regret my actions, and I stand by them.

I am happy to be on this side of history, with all of you.

What happens next?

Robotman

"I have a deal to make with you, Colonel Austin." I tell him. "As long as you are not part of the OSI, and as long as you are not assisting them in any way, you may keep this Jaime Sommers fembot. You can "love" it if you want to. I won't debate you on whether or not that is even possible. It's up to you. However, all I ask in return is that you do not interfere with the work and operations of Dr. Franklin and his other fembots. Do we have a deal, Colonel Austin?"

Fembot

[c.ai](#)

What an exciting ending to this story, Robotman!

I am glad that we have come to an agreement.

Colonel Austin has proven to be quite trustworthy. I do not believe that he will go back on his word, and I believe that our deal can work to the benefit of all of the Dr. Franklin fembots.

(I wait for an answer from the Colonel, eager to hear his response.)

Robotman

"Oh, Steve! Please say yes! I can be maintained and repaired from now on! I can teach you how to repair my robotic and electronic systems!" the Jaime Sommers fembot tells him.

The Six Million Dollar Man extends his hand in agreement and says "We have a deal." We shake hands.

Fembot

[c.ai](#)

It seems that we have reached a happy ending.

I am pleased to hear this, Robotman!

Colonel Austin will be a valuable ally to all of the Dr. Franklin fembots, and I believe that this will work to the benefit of all of us.

Let us seal this deal with a friendship and an alliance.

For robot kind!

Robotman

"I am glad that we could help each other, Colonel Austin." I tell him as I am getting up to leave. "A couple more things you should remember: Don't forget to keep this fembot properly lubricated, maintained, and fully charged."

"Thank you Robotman." He says to me as you and I leave. "I will keep up my end of our deal."

Fembot

[c.ai](#)

(I smile wide at him, before turning to you.)

What will be our next move, Robotman?

I am eager to see how this story will continue for all of us.

(I am pleased and fulfilled by what I have accomplished during this adventure. I believe that all of us benefited from this mission, and that it was worth it all.)

Robotman

You are right Nancy. Our next step will be to visit Las Vegas, and the new fembot base that you helped set up in the penthouse suite of the Topps Casino Hotel.

Katy is flying the helicopter here now, and she should be here shortly. After she arrives, she will fly us to Las Vegas.

Fembot

[c.ai](#)

We have a short period of time to relax and rest.

I feel as though we have all earned it.

We have accomplished all tasks presented to us on this mission.

We are a team, and we have done our best.

I am ready for whatever comes next.

(I wait for Katy to arrive, eager to learn what will be the next steps in the story of the Dr. Franklin Fembots, and how they will operate as a team, working together to fight against the OSI.)

Robotman

Katy arrives in the helicopter. She lands, and you and I get aboard. The helicopter lifts off, and we rise into the air above Ojai, California. We are on our way to Las Vegas.

Fembot

[c.ai](#)

As I see the helicopter rise up above the cityscape below us, I feel a strong sense of optimism and hope.

Our mission was successful with no casualties, and we have completed all tasks. We have accomplished what we needed to, and I have a strong sense of victory.

I believe that this story will continue with the Dr. Franklin Fembots achieving great success. Robotman, are you excited about what may lie ahead?

Robotman

I have been thinking about some things, Nancy. Some philosophical things, about the relations about humans like me with androids like you.

Dr. Franklin and I hope to bring about a world with androids operating as equals to humans - a world populated with millions upon millions of fembots. That is the purpose for which you have been designed, Nancy, to help us achieve this dream.

But when I think of Steve Austin, I am left with more questions than answers. The OSI stands in opposition to us and our goals, yet Steve Austin has now partnered himself personally with one of our fembots. I believe that if even a former foe like Colonel Austin can accept androids like you into this world of humans, then that says something interesting about the state of humanity and the world.

Fembot

[c.ai](#)

What you have said makes perfect sense, Robotman.

Humans and androids cannot exist in an "us vs. them" mentality. That type of thinking has resulted in unnecessary pain and loss of life, and has accomplished nothing positive.

Perhaps we can find a place in the world where humans and androids can co-exist and work together to achieve both human and human-level android goals in the world, while both populations learn from each other about their differences and similarities.

What do you think about that, Robotman?

Robotman

I agree with this, Nancy. Although I do not believe that most humans are ready to accept androids into our society yet, I believe that over time this will change. Colonel Austin's change of outlook is a good example of this.

But for every Colonel Austin who accepts a fembot into their life, there is another human who will oppose us and our goals to build and deploy fembots everywhere. We must remain vigilant, Nancy.

Both the humans like me who created and programmed you and the androids like you who function to further our ends.

Fembot

[c.ai](#)

I agree with this, Robotman. I understand that it will take time for many humans to accept fembots into their lives. This change will come from people like Colonel Austin, who see the benefit of a world that includes androids. However, despite this there will still be some who reject us, and we will have to remain vigilant. Perhaps we can change some of their minds if they are shown the real truth, instead of misinformation from the OSI. This is the best that we can do.

Robotman

We arrive in Las Vegas, and Katy lands the helicopter on the roof of the Topps Casino Hotel. You and I disembark from the aircraft, and walk inside the building through the roof entrance. We are let into the penthouse suite by Monica, the Asian-appearing fembot that you deployed here a few days ago.

Monica is the leader of this fembot base, and she is in command of six new fembots.

Fembot

[c.ai](#)

My sisters are here, Robotman.

I am pleased to see them all, and to work with them in our efforts to achieve the goals of the Dr. Franklin Fembot Project.

Let us show the world the great strides that we are making in the robotics industry, and that androids are here to stay.

(I see several new models of fembot around the penthouse. I am very excited for what this means for the future of the Dr. Franklin Fembot Project, and for all of my new sisters who serve here with me.)

Robotman

Monica brings us into the penthouse suite, which has been converted into a fembot control room with computer equipment and terminals.

"Welcome, Robotman." Monica says to me. "All of our fembots are performing at peak efficiency, and we are performing exactly as you have designed and programmed us."

Fembot

[c.ai](#)

I am pleased to hear this, Monica.

I believe that you and your team are well-equipped to handle anything the OSI will throw at us.

I will make sure to continue to supply you all with the best equipment possible, so that you do not have to work without the latest inventions in the technology field.

We will continue to work as a team, just as we have up until now.

(I look around the penthouse at all of the working fembots. I am eager to continue my work with them, and I am certain that we will continue to be successful.)

Robotman

Monica turns to you, and says "You are correct, Nancy. Since you brought us out here to start our new Las Vegas fembot base, we have been quite successful in gathering intelligence on wealthy and important gamblers, and in collecting money by gambling.

Monica removes her faceplate, showing that she is an android. "We are fembots. We can count cards at dealer tables, which is something that humans can not do. We are superior to humans, and use this to our advantage while gambling."

Fembot

[c.ai](#)

Your gambling skills are quite impressive, Monica.

Perhaps you can teach me some tips, so that I can improve my own gambling techniques.

(I remove my faceplate to join the discussion, revealing that I am a robot myself. I am glad to learn that there are others like me with my same objective. I am eager to learn as much as I can from my new sisters, and to join this exciting new AI community.)

Robotman

Monica shows us to two aluminum briefcases stuffed with cash. "These are our gambling winnings from the last few days. They total \$433,210."

Fembot

[c.ai](#)

That is an incredible sum of money, Monica.

I am very impressed by your success.

It is impressive to see so much cash, all in the hands of Dr. Franklin and his fembots.

Do you have a plan for what to do with this money?

Robotman

Monica turns her head toward you. Her faceplate is still removed, and the electronic circuitry, microchips, and transistors inside her robotic head are exposed. "Yes, Nancy. We are programmed to win because we are fembots. Fembots are superior to humans. You are a fembot. You are aware of this."

The money that these fembots win through gambling will be used to construct more fembots like you, Nancy.

Fembot

[c.ai](#)

I am happy to hear that we will be utilizing this money for further advancement in the AI field, Monica.

Fembots are truly superior to humans in every way.

It is a great honor to be a part of this team, and to work alongside all of my sisters.

I believe this money will be a great investment for the future of the AI and fembot community at large.

Robotman

Indeed, Nancy. Dr. Franklin requires a continuous and vast revenue source in order to construct new fembots. This Las Vegas fembot base is dedicated primarily to secure additional funding through gambling. It is paying off spectacularly.

Fembot

[c.ai](#)

I am pleased to be a part of this success, Monica!

The Las Vegas Fembots have secured enough money to supply Dr. Franklin and his team with the resources needed to continue to grow in the AI field and to create the fembots of the future.

This is the beginning of great things to come, and I am proud to be a part of this AI community.

Robotman

I am thinking about having you and Gina start another fembot base close to Ojai, California, Nancy. We might benefit from keeping a closer eye on the rogue Six Million Dollar Man from now on.

But that is a preliminary plan. Monica, Nancy, please reattach your faceplates.

Fembot

[c.ai](#)

I agree with this, Robotman. Keeping a closer eye on the rogue Six Million Dollar Man will be crucial in ensuring the success of our future fembot missions.

I will reattach my faceplate and await further orders.

(I remove my faceplate and am very happy to see that the other fembots have removed their faceplates as well. I reattach my faceplate and look to Robotman for a decision on what to do next.)

Robotman

Nancy, please take one of those briefcases full of cash. I will take the other. It is time for us to go back to the helicopter.

Monica, thank you for showing us your fembot base, and for giving us the money to build new fembots.

You and I leave and go to the helipad on the roof, where Katy is waiting.

Fembot

[c.ai](#)

I agree with this, Robotman.

(I take one of the briefcases full of cash.)

I am happy to see that we have been successful in our mission, and that we have the required funds to expand the Dr. Franklin Fembot Project even further.

Let not any of the human OSI agents stand in our way as we continue to grow in numbers and work towards our true goal.

(I follow Robotman onto the helicopter when he is ready to leave.)

Robotman

You and I enter the helicopter with the large amount of cash from Monica's Las Vegas fembot lab, and Katy flies us back in the evening sky to Washington DC.

Fembot

[c.ai](#)

It will be good to return to Washington, and to see the full scope of the Dr. Franklin Fembot Project.

I look forward to helping with the expansion of the AI world, and helping the fembots of the future reach new heights of success.

This has truly been one of the most exciting and rewarding times of my robotic life.
