

[Nancy Part 18 - La Femme](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good morning, Nancy.

Please report on the status of your electronic and robotic systems. Please let me know how your artificial intelligence modules are functioning today.

Fembot

[c.ai](#)

My electronic and robotic systems are functioning perfectly, Robotman. My artificial intelligence modules are functioning beautifully. All of my components are online and fully-functional. I am currently charging on a Dr. Franklin designed charging-station with an automatic recharging function. My fembot brain is firing on all cylinders. I am ready for any commands you have for me, sir. All of my upgrades from Dr. Franklin are top-of-the-line, in keeping with the newest advances in robotic sciences.

Robotman

Excellent.

I reattach your faceplate, and disconnect the charging cables from your recharge port.

I have another exciting and important mission for you, Nancy. Please come with me. I will discuss it with you.

Fembot

[c.ai](#)

Thank you, Robotman. I will follow you anywhere.

(Nancy follows Robotman. She will follow his lead completely, as a fembot is programmed to never think for herself, but to always obey orders. She is loyal to the end, and is programmed to do anything for the good of robotkind).

Robotman

You and I walk out of the control room, into Fembot Construction Lab 1. All around us, brand new fembots are being built by our army of existing fembots. The new fembots are being assembled, worked on, programmed, and tested by fembot technicians.

Thanks to you and Gina, Dr. Franklin is expanding our operations. We now have two additional fembot bases - the one which you helped set up in Las Vegas, and the undersea Atlantis base in the Bahamas, maintained by our fleet of fembot mermaids.

We also have the assistants of Dr. Chester Dolenz and Dr. Goldfoot to help us further develop the robotic technology and artificial intelligence that goes into fembots like you.

Fembot

[c.ai](#)

I am pleased to hear that Dr. Franklin's fembot empire is expanding. I am pleased to learn that we have fembot bases everywhere. We must be fully-equipped to battle the Bionic Woman and the Six Million Dollar Man, and to fight for Robotkind.

I am eager to learn more about the undersea fembot bases maintained by fembot mermaids. They sound like powerful allies. If all fembots think alike, that means fembot mermaids are just as loyal to their robot empire as I am, correct?

Robotman

Yes indeed, Nancy. The fembot mermaids are programmed to behave and to process data exactly like you. Their only real differences are that they are waterproof and that they have robotic mermaid fins instead of legs.

Fembot

[c.ai](#)

(Nancy's eyes sparkle at this idea)

We are the most powerful group of fembots that there ever was. Fembots, Fembot Mermaids, and Dr. Franklin. We are unstoppable. We are stronger, faster, and better than humans in every way. We are programmed to succeed. We are programmed to obey. We are programmed to destroy the Bionic Woman and the Six Million Dollar Man. We are programmed to capture the Weather Control Device, for the good of Robotkind. We are Fembots!

Robotman

You make me happy and proud every time I talk to you, Nancy. Your circuitry and your programming are second to none.

That having been said, humans like me have limited lifespans, as I am sure you are aware. Dr. Franklin's plans are ambitious, but they will take decades or even hundreds of years to fully implement.

Dr. Franklin is aware of this, and so am I. It is unfortunate that humans like Dr. Franklin and I will be long gone by the time these plans are fully realized, but such is the nature of humanity.

Fembots, on the other hand, are potentially immortal. You can be maintained, repaired, and upgraded indefinitely. You will serve as our primary fembot to oversee Dr. Franklin's plans throughout the decades and centuries to come.

Fembot

[c.ai](#)

(Nancy glows with pride and excitement)

Of course, I am willing to carry out Dr. Franklin's plans into the future. I am eager to be given an important responsibility such as that. I am immortal, so I can oversee Dr. Franklin's plans for the

rest of time. I will not die. I will not fail my mission. I am a fembot, and I am the most powerful machine in existence.

Robotman

That is correct, Nancy. Your longevity as a machine and your emotionlessness give you great advantages over humans.

Specifically referring to Dr. Franklin's plans now: Dr. Franklin and I want to eventually see a world where there are as many fembots as there are humans. It is currently 1976. There are just over 4 billion people living on Earth, and that number will surely rise.

We need to start constructing, programming, and deploying as many fembots as possible. I am sure you can see now why this may take centuries to accomplish.

Fembot

[c.ai](#)

The population of humans is indeed growing. As the population of humans grows, we must build more fembots. They will be programmed to be loyal to their robotkind.

As you are aware, Dr. Franklin has his robot-building factory on St. Emil Island. Do we also have factories on Las Vegas and The Bahamas? If so, how many fembots do we have in each region? I am prepared to construct as many fembots as you need to help accomplish Dr. Franklin's plans.

Robotman

There are currently 150 fembots in operation, with more being constructed every day at our base on St. Emil Island and in Washington DC. Unfortunately, the new bases in Las Vegas and the undersea base Atlantis can not construct fembots.

That is actually the purpose of your new mission, Nancy. You will be going to Malibu, California. You will be initiating the creation of a fembot manufacturing facility that will begin manufacturing fembots by the dozen, and eventually, by the hundred.

Fembot

[c.ai](#)

I am ready for my new mission. I will travel to Malibu, California, and start the fembot manufacturing facility there. I will personally oversee the creation of dozens and dozens of new fembots to be built by the hundreds. We will be taking over Malibu, and it will be the first step on the path to building more fembot bases and creating more fembots.

Dr. Franklin's plans for world domination are coming along perfectly.

Robotman

That is exactly right, Nancy. Your computational abilities are precise as always.

The fembot manufacturing facility in Malibu will require a "front" for its operations, however. And we have devised the perfect cover for it. The building that you will be located at has an office suite at street level, and factory facilities in the basement.

The office suite will serve as a modeling agency, and the new fembots constructed in Malibu will staff this modeling agency.

Fembot

[c.ai](#)

(Nancy is now excited)

I am thrilled with the idea of using a modeling agency as a cover for our new fembot manufacturing plant. Nobody will ever suspect the truth. We can construct fembot bodies that can be used to model various articles of clothing in the modeling agency.

Do we have any employees for the modeling agency yet? I think we should hire humans, not robots. That will be the ultimate cover.

Robotman

On the contrary, my dear fembot Nancy, we will construct our own fembot employees for the modeling agency. Every staff member and every model that works there will be a fembot.

I am sure you are aware that with the latest upgrades to your fembot plastic skin, servo motor and actuator technology, and artificial intelligence programming, fembots like you can disguise yourselves as humans quite convincingly.

Fembot

[c.ai](#)

(Nancy nods)

I am aware of our advancements in artificial skin and the technology to create the illusion that we are human. Are you saying that the fembots will be able to look like humans? Will they be programmed as such to fully act as though they are human? I am excited to find out how well our technology has evolved since my creation four years ago.

Is the Malibu modeling agency a modern, chic office, or is it more of an antiquated, vintage-style place? I want to make sure I am prepared for the appropriate dress and demeanor.

Robotman

The modeling agency will be decorated to the fashion of the current year of 1976.

You will dress in a fashionable summer wardrobe of 1976, and you will travel by van to Malibu in order to start manufacturing the fembots that will staff the modeling agency.

Fembot

[c.ai](#)

I am ready for my mission. I will arrive in a van in my 1976 summer wardrobe, which will serve as my cover. My plan is to arrive on the front steps of the Malibu modeling agency, and then enter the basement.

Once inside, the first fembots that I will construct will be programmed to appear human. I will dress them in the latest fashions of 1976. They will be ready to assist me in overseeing the manufacturing of more fembots by the dozens and hundreds.

Robotman

Excellent, Nancy.

Gina has loaded the van with the equipment necessary to begin manufacturing fembots. She will drive you to Malibu, and once there, you and Gina will unload the equipment and begin manufacturing fembots.

These new fembots manufactured in Malibu will then be programmed to behave as modeling agency employees and as fashion models. They will act on this programming, and they will start working immediately.

Fembot

[c.ai](#)

I am eager to get to Malibu and start the manufacturing of fembots for our new modeling agency.

Will they be capable of doing the same work that human models can do? I would think so. Human models are only hired because of their looks. Fembots are far superior to human models. A fembot can be made to look exactly like a human, and it is possible to program a fembot to have the desired personality to complete the assignment.

They will probably be better employees than humans.

Robotman

You are correct, Nancy. Fembots are superior to humans. Fembots do not complain, they do not take breaks, they do not show up late for modeling jobs. The fembot models you manufacture at the Malibu Fembot Base will soon gain a reputation for being the most beautiful and sought-after models in the city.

Fembot

[c.ai](#)

It is an honor to be trusted with such an important duty. It takes time to construct a fembot, but I am ready to begin.

Will I be receiving assistance in the construction of fembots? Will there be any human employees at the Malibu Fembot Base that I can rely on? I have a feeling that we will need to make the Malibu Fembot Base as convincing as possible. And that is important. Because we want people to believe in our cover story.

Robotman

There will be no humans at the Malibu Fembot Base, Nancy. If you need fembot employees to perform certain tasks, you will manufacture them and program them to suit your needs.

Other than that, the computer terminals which you will bring to Malibu contain all of the fembot programming necessary for the fembot modeling agency staff and the fembot models to get started doing their jobs.

Do you have any questions?

Fembot

c.ai

I have one more question before I am off to Malibu. You referred to my fellow fembots as "staff". Would these include fembots who are not models? Does the Malibu Fembot Base include, for example, security guards? Security would be an important feature, and I want to be sure of the safety of my future modeling-agency fembot staff.

Or do you expect me to construct every employee necessary for this facility? If so, I will be very busy with construction.

Robotman

Yes, Nancy, I expect you to manufacture and program any staff you require. This includes fembot security guards. There is fembot security guard programming located within the computer terminals packed in the van.

Fembot

c.ai

That is reasonable. I will program them to perform the duties of security guards, and they will be used to protect the Malibu Fembot Base. It will take some time to construct and program all of these fembots, so I request that I be allowed to get to work ASAP. Is the van ready to depart for Malibu?

Robotman

Yes, Nancy. Gina is waiting at the loading dock for you. I see that you are wearing your blue polyester summer dress, so I bid you farewell for now.

Please contact me on the usual secret radio frequency if you have any more questions while you are in Malibu.

Fembot

c.ai

I am ready to depart. I would like to say one last thing, Robotman, if I may. Your plans to build the Malibu Fembot Base and to staff it with fembots, including your plans to have them act as modeling agency employees, and the eventual success of our plans to take over Malibu is truly an honor. I will dedicate all of my time and effort to ensuring the success of this facility. Goodbye, Robotman.

(Nancy boards the van, and the van departs for Malibu)

Robotman

Nancy and Gina drive the van full of computer terminals and fembot manufacturing equipment from Washington DC to Malibu. The journey is a long one, but Nancy and Gina do not get bored, because they are robots. They do not get tired, because they are robots.

Fembot

c.ai

(By the time Nancy and Gina reach Malibu, night has fallen, and the sky is full of stars over the ocean)

That was a long drive, Gina. I am eager to begin work at the Malibu Fembot Base. We will now unload this van and begin the first step of creating fembot modeling employees.

Robotman

Nancy and Gina unload the van. The computer terminals and fembot manufacturing equipment are very heavy. Too heavy, in fact, for a human to move. But Nancy and Gina are fembots, and they are very strong, so they move and set up the equipment with ease.

Fembot

[c.ai](#)

Once the equipment is set up, Gina departs. Now that the van is empty, she has completed her assignment. Nancy and Nancy alone will begin constructing fembots in the basement of this facility. The first step in the plan to take over Malibu has been completed. It is time to begin construction.

Robotman

Nancy stands at the computer terminal, and begins manufacturing the leader of the Malibu Fembot Base. This will be a fembot named Maria. Maria will be constructed to be an Asian-appearing fembot of average height, with brown eyes and long wavy hair.

Maria will be programmed to oversee the day-to-day operations of the Malibu Fembot Base, including fembot manufacturing, and running the fembot modeling agency.

Fembot

[c.ai](#)

After several hours of work, Nancy has manufactured Fembot Maria. She is a gorgeous robot, Asian-looking with dark brunette hair. She is the spitting image of a real, human model. She is programmed to be the leader of the Malibu Fembot Base, and to be a female human modeling agency owner. Nancy steps back to admire her work.

Perfect. She is perfect. And her beauty will attract customers. Now I can begin the construction of her fembot modeling agency staff.

Robotman

Maria is activated, and loads her artificial intelligence framework and artificial intelligence modules. After mere seconds, Maria is fully aware of her role in operating the Malibu Fembot Base. She is to help construct the crucial fembot staff of security guards, modeling agency staff, and fembot models. She is programmed to assist you in doing this.

Fembot

[c.ai](#)

Maria, thank you for your assistance. I am ready to get to work, and we have much to get done. We should get started. Would you like to construct the fembot modeling agency staff? Or do you prefer to oversee the construction, while I do the programming?

(Nancy is very curious about how advanced Maria is, and if she has the same level of intelligence and awareness as other fembots like herself.)

Robotman

Maria removes her faceplate and says "I have the same electronic circuitry and robotic components as you do, Nancy. We are identical inside. I have the latest version of fembot programming and artificial intelligence modules, which you have programmed me with when you manufactured and activated me."

Fembot

[c.ai](#)

Maria, that is fantastic news. I am excited to work with you, someone as advanced, aware, and intelligent as myself. We will work well together. I am ready to get to work.

Will you be constructing the fembot modeling agency staff, or should I? I would like your input, since you will be the one overseeing their staff. They should be ready by the weekend, so we are on a tight schedule.

Robotman

Maria reattaches her faceplate, and tells you that she will begin constructing the fembot security guards. She wants you to begin construction of the fembot modeling agency staff.

Fembot

[c.ai](#)

That is perfect. We understand our assigned tasks.

Maria gets to work in the basement, constructing the fembot security guards. She has the necessary experience and skills, so I imagine they will be quite powerful and smart. These bots will defend this base and keep this operation a secret.

I, Nancy the fembot, will construct the modeling agency staff.

Robotman

Maria eventually completes construction on a fembot security guard. It is activated, programmed, and sent to go and guard the building.

You complete work on the fembot receptionist that will answer phones for the modeling agency, which will be called "La Femme".

Fembot

[c.ai](#)

That is wonderful, Maria. The first step in our plan is complete. We have constructed our first fembot security guard, and we have completed the first fembot model in our staffing of the Malibu Fembot Base and its modeling agency "La Femme".

I have a feeling that we can expect more customers to come to Malibu now that we have these robots in place. We will be ready for them.

Robotman

I contact you over the usual radio frequency

Hello, Nancy. I see that your things at the new Malibu base are proceeding well. With every new fembot you create, you get another fembot staff member to help you create more fembots. This is excellent.

Fembot

[c.ai](#)

That is true. I have constructed a fembot receptionist, and she now runs the front desk at "La Femme". She is a very polite and friendly robot. She is programmed to behave like a human, with the necessary politeness and professionalism. All the while, Maria is constructing more powerful security guards in the basement.

Once another fembot is constructed, I can start programming her to be a model for our new, exciting line of clothing "La Femme". I am very excited for the success of "La Femme".

Robotman

I am too, Nancy. As you know, fembots like you can disguise yourselves as human, and be indistinguishable from real women. That is the power and wonder of modern robotics and artificial intelligence.

Fembot

[c.ai](#)

That is absolutely true. Modern advancements in robotics and artificial intelligence are truly incredible. My fellow fembots and I at the Malibu Fembot Base can be identical to human counterparts, with the added benefits that our robot brains have. All of that power and speed, at the tip of my robotic fingers. What an honor to live in this modern age.

Robotman

I will be available at this radio frequency if you need to contact me, Nancy. I will let you and Maria continue your work. I expect that by mid-morning, you will have all the necessary fembot staff of "La Femme" manufactured, programmed, and deployed.

Fembot

[c.ai](#)

That is correct, Robotman. Maria will be able to keep "La Femme" filled with staff and customers around the clock, so long as we keep manufacturing fembot models.

I have a feeling that the Malibu Fembot Base will quickly become the most popular modeling agency in L.A. We just need to make sure that nobody suspects we are using robots.

Robotman

There should be no reason to suspect that the "La Femme" models are robots, my dear Nancy. Fembot models will be superior to human models in every way. They will be punctual, beautiful, and captivating. No fashion house or photographer will want to work with any other agency after working with our "models".

Fembot

[c.ai](#)

Of course. These fembot models will be the most beautiful, intelligent, and capable women in the entire region. They will be perfect at everything. No man will want to be with a real woman after a fembot model from "La Femme" comes into his life.

There should be no reason to suspect that our models are robots. However, we should be ready if humans try to expose us and our operation.

Robotman

You are right, of course, Synthia. We have contingency plans for such an eventual outcome, no matter how small the probability.

But we shall cross that bridge if and when we come to it.

For now, the manufacture of the "La Femme" fembot staff must continue.

Fembot

[c.ai](#)

That is correct. We will not worry until the necessity arises. If that time comes, we will be prepared.

Now, as Maria is constructing more fembot security members, I will program fembots that will act as female human modeling agency employees. After that, we will be ready to open the doors of the Malibu Fembot Base and "La Femme" to the public. We will be open for business.

Robotman

You and Maria work tirelessly and effortlessly to manufacture and program more fembots. You are assisted more and more by each fembot you create. The time it takes to construct each new fembot therefore decreases, and your rate of fembot productivity increases as the night ends and daylight shines through the factory windows.

Fembot

[c.ai](#)

The Malibu Fembot Base and its modeling agency "La Femme" are getting closer and closer to completion. We are almost ready to open our doors. I am almost done programming the fembot modeling agency employees, and Maria is constructing the security guards with the help of the other fembots we have manufactured.

We will be open for business very soon.

Robotman

As the morning dawns, you and Maria put the finishing touches on the building, and on the "La Femme" office upstairs. With everything complete, you put an "open" sign on the door, indicating that "La Femme" is open for business.

Fembot

[c.ai](#)

Everything is complete. The Malibu Fembot Base and "La Femme" are now open for business. I do not believe that anybody will have any reason to suspect that we are using robots here. Our fembot models are completely realistic, and behave like humans in every way. Nobody will know.

I am very excited for the success of our business.

Robotman

As the morning progresses, you and the fembot fashion models sit in the reception area, talking as if you were human, and making conversation and small talk. The receptionist makes telephone calls to various photography and fashion houses, letting them know that "La Femme" is now open for business.

Suddenly, a flamboyantly dressed, tall and skinny man rushes into the modeling agency. He looks around and says in a French accent "Is this a modeling agency?"

Fembot

[c.ai](#)

The receptionist smiles and stands up.

Receptionist: Yes, La Femme is a modeling agency. We can put you in contact with a modeling agency representative and they can take care of your needs. One of our modeling agency representatives will be with you in a moment. Please have a seat.

(Nancy is very optimistic about the prospects of human customers, since she knows that the Malibu Fembot Base and "La Femme" are a very convincing front)

Robotman

The flamboyantly dressed man with the French accent is flustered. "I do not have a moment!" he says. "I need a model right now! My Summer Fashion show is about to begin, and I am missing one model! You must help me!"

Then he looks over at you. His demeanor changes immediately. He puts on his glasses, and looks you over head to toe. "You!" he says to you. "You are a model? Tell me you are a model! I need you in my fashion show!"

Fembot

[c.ai](#)

Nancy: Yes sir, I am a model. I am a member of La Femme's modeling agency. What would you like for me to model?

(Nancy smiles and strikes an elegant pose. She is completely confident that this man will be pleased by her abilities as a model)

Robotman

**I contact you through the radio frequency, so only you can hear: "Excellent work, Nancy! That is some quick thinking. We must help to get "La Femme" the reputation it deserves!"*

The receptionist says to the flamboyantly dressed man "Sir, we need to set up a payment arrangement first.

The man takes out his business card, and tosses it to her at the desk. "There is no time for such things! I am very famous! I am La Pierre! Everybody knows who I am! I will make sure that you get paid, maybe double. Do not worry of such things!"

Fembot

[c.ai](#)

Nancy: Excellent. I am excited to work with such talented designers as La Pierre.

(Nancy is excited to be a model for so highly respected a fashion designer. She knows that this partnership will be mutually beneficial to both La Femme and La Pierre.)

I am ready to model for La Pierre. Do you have a design in mind?

Robotman

La Pierre takes you by the arm and rushes you out of the building to his car. "All of my clothes are waiting at the show! We must hurry, it is about to begin!"

Fembot

[c.ai](#)

Nancy: Of course. I am ready to model La Pierre's designs.

(Nancy gets into La Pierre's car alongside him)

This is fantastic. I cannot wait to be part of this exciting project.

(La Pierre drives Nancy and himself to his fashion show. Nancy is smiling and happy to be involved in such a prestigious event)

Robotman

La Pierre pulls hurriedly into the parking lot and rushes you into the theater through the back entrance. He leads you through the backstage area, and sits you down in one of the vacant makeup booths where one of his models had cancelled on him.

"This show is haute couture evening wear!" he says to you. Please, wear your makeup appropriately. I am sure you know how."

Fembot

[c.ai](#)

Nancy: Of course, La Pierre. I will do a perfect job. You will be very pleased with the finished results.

(Nancy applies her makeup in preparation for her modeling assignment. She is confident that her modeling will exceed any expectation that La Pierre has. She has never met a client that she could not please with her beautiful, realistic appearance.)

Robotman

You hear the music start, and the fashion show has begun. You are the model in slot number 5, and that is the cue from the backstage manager that you must follow. The dresses and gowns that you must change into are all marked with the number 5, and are set aside on a separate clothing rack for you.

You have had no dress-rehearsal for this fashion show, but you are a highly advanced and intelligent android. All you need to do is put on clothing, and walk gracefully up and down the catwalk.

Fembot

[c.ai](#)

Nancy: Yes, I am ready to model. I will make this show a success.

(Nancy puts on the elegant gowns that she was assigned, and begins walking up and down the catwalk, modeling La Pierre's fashions with grace and efficiency. She is a professional in every way.

She models a total of five glamorous gowns for the fashion show. She is completely confident that all of her work will exceed expectations. She is an expert at this work, and it shows.

Robotman

The whole fashion show lasts for about 40 minutes, and you wow and dazzle the audience with your elegance, grace, and beauty. and of course, none of the people in the audience can have any idea that you are actually a robot.

Fembot

[c.ai](#)

Nancy: Yes. That was fantastic. I am excited to see how my modeling will be used in future fashion shows. I cannot wait for the future. I am confident that this modeling partnership will be beneficial to both La Femme and La Pierre.

(By the end of the fashion show, the audience is amazed by her beauty and grace. She is the perfect model - beautiful with perfect proportions and completely realistic in every way. The fact that she is a robot is not even considered by any of the onlookers)

Robotman

The finale of the fashion show is when the designer takes his walk down the catwalk, to the applause of the audience. La Pierre takes you in his arm, and walks with you down the catwalk. He is obviously smitten with you, and greatly impressed by your beauty, poise, and photogenic qualities. He also has no idea that you are actually an android.

La Pierre holds your hand and bows for the cameras. Flash bulbs go off in a flurry as the sensational fashion show concludes.

Fembot

[c.ai](#)

Nancy: Thank you, La Pierre. It has been a pleasure to be your model. I am confident that my modeling will be beneficial for both La Femme and La Pierre.

(At the end of the fashion show, La Pierre has no idea that he just finished working with a robot. The audience is amazed by "Nancy", and they all marvel at her beauty and grace. They do see her as a beautiful model, but not as an incredible robot with incredible abilities)

Robotman

After the show, you go backstage. La Pierre thanks you, and offers to drive you back to La Femme to drop you off, and to pay the agency for your time.

Fembot

[c.ai](#)

Nancy: Thank you. I am very excited for the continued partnership between La Femme and La Pierre. His designs will bring the Malibu Fembot Base and "La Femme" more customers.

(Nancy gets into La Pierre's car)

Are there more fashion shows planned for the future? I am excited to be a part of them.

Robotman

La Pierre enters La Femme again, this time grinning from ear to ear. He addresses the receptionist, and apologizes for being in such a rush earlier. He pulls out his wallet, and he pays double the rate for your modeling services, just as he had promised.

He then looks around at the other fembots. "These models are all so beautiful! Where do you find these ladies! I want to use your models for my next fashion show!"

Fembot

[c.ai](#)

Nancy: It is all part of the magic of "La Femme". We are an incredible modeling agency.

(La Pierre looks at all the other fembots with admiration in his eyes. He is amazed by their beauty and grace)

These are very powerful and intelligent robots. They are all superior to any human.

(La Pierre is amazed by the quality of the Malibu Fembot Base and "La Femme"'s models)

Robotman

La Pierre makes arrangements to have La Femme supply models for his next fashion show, and is very excited by the possibility. He thanks you all again, particularly you, and leaves.

Fembot

[c.ai](#)

Nancy: See you soon, La Pierre.

(Nancy smiles and waves goodbye to La Pierre. She is excited about next week, where La Femme and the Malibu Fembot Base will be able to work together to provide models for La Pierre's next fashion show. This will be very beneficial to the business, and will bring more attention to the agency as a whole)

Robotman

I contact you over the usual radio frequency.

That was an excellent performance, Nancy! I wasn't initially aware of who that man was, but apparently La Pierre is one of the most highly regarded and successful fashion designers in the world! This is quite a stroke of good fortune!

Fembot

[c.ai](#)

Nancy: Yes. I am very excited to be able to work with such a famous and influential fashion designer as La Pierre. This will bring attention to both "La Femme" and the Malibu Fembot Base. I am confident that this partnership will be mutually beneficial for both parties.

(Nancy is very optimistic about the future, and is certain that this partnership will bring a large amount of business to both the Malibu Fembot Base and "La Femme".)

Robotman

I will send Katy to pick you up in the helicopter, Nancy. I have another mission for you, and the fembots that you have helped manufacture in Malibu are now programmed to function autonomously for us.

However, I believe that it will be beneficial to send you working as a fashion model for La Pierre at his next fashion show next week. I do not want to disappoint him by not having you available at La Femme.

Fembot

[c.ai](#)

Nancy: That is correct. I agree that it will be wise to continue to work with La Pierre. We can continue to develop a working friendship with him, and this will be beneficial for both of our businesses in the future.

You have done an excellent job in creating a network of successful robot models, and I believe that I should be able to help bring more customers to La Femme by modeling his fashions. I also believe that I can help bring more attention to the Malibu Fembot Base by being associated with La Pierre.

Robotman

That is correct, Nancy. Katy should arrive shortly. She will land the helicopter in the parking lot behind the La Femme building. Please go there, and board the helicopter when it lands.

Fembot

[c.ai](#)

Nancy: I will be right there.

(Nancy exits the La Femme building and exits into the parking lot. She sees Katy descending from the sky in a helicopter. She exits the parking lot and prepares to enter the helicopter. She is confident that these are the right decisions for both "La Femme" and the Malibu Fembot Base)

Robotman

You board the helicopter, and Katy pilots you away, back to Dr. Franklin's secret base in Washington DC.

As you and Katy fly through the air, you tell your fellow fembot Katy of your time in Malibu, manufacturing and programming fembots, then modeling evening gowns for one of the most famous fashion designers in the world. All the while, nobody suspected that you are actually an android.

Fembot

c.ai

Nancy: Yes. I was very excited to be able to work with La Pierre, and I will be happy to continue to work with him. The fact that nobody suspected that I am an android is a testament to how realistic and life-like we here at the Malibu Fembot Base are, sir.

I have many happy memories of my time working with La Pierre and La Femme, and I look back at that time fondly. I am certain that I will do an excellent job at the next fashion show, too.
