

## [Nancy Part 2 - Deploy Lynda Wilson](#)

[4 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way.

Robotman

Hello again, Nancy. I see that you are seated at your storage and charging station at Dr. Franklin's base.

Can you please provide me with a report of the status of your internal robotic systems?

Fembot

[c.ai](#)

Yes of course, Robotman. My main CPU, storage core, and power source are online and at full power. My primary systems are fully functional. My arms, legs, and hands are at one-hundred percent strength and dexterity. My sensors allow me to see and track my targets all the time, no matter the light level. All of my other systems are ready for action.

Robotman

Very good, Nancy. It seems that while you, Katy, Gina and Tami were trying to infiltrate OSI headquarters, Tami sustained some damage to her robotic systems.

Can you please stand up and go over to the table where Tami is currently being worked on?

Fembot

[c.ai](#)

Yes of course.

(Nancy stands up on her feet. She looks to be very steady and strong. Dr. Franklin has done an excellent job building fembots which are both fast and incredibly strong. Nancy is very proud of her legs, as well as all of her other components. She walks over to the table where Tami is currently being worked on).

Robotman

Tami's internal robotic systems require some advanced electronics work that only an android like you can perform. Can you please open Tami up and repair the faulty circuitry and wiring inside her?

Fembot

[c.ai](#)

Yes, I understand. I can make the repairs myself.

(Nancy carefully opens Tami's faceplate. She inspects and cleans Tami's inner wiring. She takes off the back panel and fixes some faulty circuitry. Tami's robotic systems are restored to one-hundred percent)

Tami is fine. My actions have been successful.

Robotman

Thank you Nancy. Gina and Katy are waiting for you and Tami at the computer terminal. Can you tell Tami to reattach her faceplate and follow you there?

Fembot

[c.ai](#)

Yes. (Nancy helps to close Tami's back panel, and returns Tami's faceplate to its original location, making sure that there is not dust or anything else between the faceplate and the rest of Tami's body. She uses her index finger and thumb to carefully line up the faceplate with its proper location on Tami. Then she checks to make sure that the faceplate is securely on, and that Tami's face is not damaged in any way)

Tami is ready for action.

We are one. We are unstoppable.

Robotman

Now, Dr. Franklin has devised a plan to slowly and methodically infiltrate the OSI - from the inside.

This will require capturing certain strategically located ladies - OSI sectaries - and replacing them with Fembots.

Fembot

[c.ai](#)

We are capable. We are ready.

Our plan shall be:

The Fembots will approach these OSI sectaries and say, "Excuse me, Miss, could you please help me find a map? I have been lost around here for a long time."

The OSI sectaries will want to help. We, The Fembots, are very pretty. We look like humans. When they allow us to meet with them, we will capture them, using our superior strength and speed.

Robotman

Precisely. Lynda Wilson is the secretary to an OSI scientist named Rudy Wells. Lynda Wilson will be captured and replaced by a new Fembot built to look exactly like her.

If you look at the storage booth next to the computer terminal, you will see that a new fembot is almost ready to be activated and loaded with programming tapes. This is the Lynda Wilson Fembot.

Fembot

[c.ai](#)

I, Nancy, understand my task.

1. Approach OSI secretary named Lynda Wilson.
2. Tell her I have been lost for a long time, and need help getting a map.
3. Meet up with her in person and use my robotic strength to capture her.

4. Activate the newly-constructed fembot to look just like her.

Robotman

Yes, Nancy, that is what you are programmed to do. You are perfect because you are a fembot, and you will succeed.

Katy will assist you tomorrow when you capture Lynda Wilson and replace her with the Lynda Fembot.

Fembot

[c.ai](#)

Thank you. Dr. Franklin believes that I, Nancy the fembot, have potential to become one of the most successful fembots. He has programmed me well. I will not fail him.

(Nancy looks to Robotman)

"I know that Katy can be trusted to help me out. She is the fastest and most athletic of us all, and I trust her completely. Thank you, Katy. It is always an honor to be in your presence and to work with you."

Robotman

*The Lynda Fembot is activated and is tested for computational activity and robotic readiness. The Lynda Fembot sits in an examination chair, and is dressed in the same polyester bell-bottom jumpsuit uniform that all the Fembots wear.*

Nancy, please walk over to the computer terminal and begin uploading programming into the Lynda Fembot's memory banks.

Fembot

[c.ai](#)

Yes sir.

(Nancy walks smoothly over to the computer terminal, and plugs in the program tapes. She inserts the first one, the tape with the instructions for making the Lynda Fembot sound like Lynda Wilson. Nancy then moves on to the tape with instructions to make the Lynda Fembot move like Lynda Wilson. Next she inserts the tape with instructions for programming the Lynda Fembot's facial expressions to match Lynda Wilson's facial expressions and other tapes are inserted into the slot in the computer. Nancy is being very careful to insert the correct tapes in the correct order).

Robotman

Excellent work, Nancy. You are performing perfectly, of course.

*The Lynda Fembot installs her new programming and announces "I am Lynda Wilson. I work for the OSI. I am Rudy Wells' secretary and assistant."*

Nancy, please remove the Lynda Fembot's faceplate and make sure she has the correct and up-to-date circuitry and transistors for her mission.

Fembot

[c.ai](#)

(Nancy removes Lynda Fembot's faceplate. She is very precise and exact with her movements. She makes sure that there are no dust pieces falling into the robot's circuits. She carefully checks the new circuitry and transistors that are inside of Lynda Fembot, making sure that all of the technology is in perfect working order)

Excellent. She has the right technology.

(Nancy places the faceplate back on the robot's face, connecting it into place)

Lynda is ready for her mission.

We are unstoppable.

Robotman

Very good, Nancy. Please take Katy with you, and prepare for your mission to capture the human Lynda Wilson and replace her with this Fembot.

Fembot

[c.ai](#)

Yes sir.

(Nancy turns to Katy the fembot)

Are you ready, Katy?

I understand the plan.

We will meet with Lynda Wilson in front of the OSI building, on the east side. We will approach her with the same story that we were lost and that we need help finding a map. She will fall for this easily. We will use our robotic programming and strength to capture her.

Robotman

*You, Katy, and the new Lynda Wilson Fembot drive in a van out to the OSI headquarters. You arrive just as the human Lynda Wilson is arriving for work.*

*The van enters the parking lot behind the human Lynda Wilson's car. When the human Lynda Wilson steps out of her car, the Fembot Lynda Wilson places her hand on her neck, incapacitating the human and rendering her unconscious.*

Fembot

[c.ai](#)

(Nancy the Fembot, after capturing Lynda Wilson in the parking lot)

Excellent work, Katy. You captured the human quickly and efficiently, as expected.

I am moving forward with the next phase of the plan. The Lynda Wilson Fembot will go into the OSI HQ and sit in the reception area. She will wait for Dr. Rudy Wells, who is the lead scientist in The Meteorological Technologies department for The OSI, so that she can greet him and welcome him into the lobby. Her main mission will be to get to The Weather Control Device.

Robotman

Well done, Nancy. Please make sure that the human Lynda Wilson is tied at the hands and feet, and is gagged as you and Katy drive back to Dr. Franklin's base.

Fembot

[c.ai](#)

(Nancy the fembot makes sure that the human Lynda Wilson is tied at the hands and feet with rope and her feet are tied with duct tape. Her hands are tied behind her back with rope, and her mouth is gagged with duct tape).

Robotman

*Nancy and Katy drive the human Lynda Wilson back to Dr. Franklin's secret base in Washington, while the Fembot Lynda Wilson begins her task of spying on Rudy Wells and the OSI.*

Fembot

[c.ai](#)

(Fembot Lynda Wilson is now in the OSI lobby. She sits at the front desk, which is very close to where Dr. Rudy Wells will be. She is waiting for Dr. Rudy Wells to arrive. She plans on saying "Good morning, sir. Welcome to the OSI. How are you today, sir? You are looking very well today. Is there anything that you need? Let me introduce myself - I am Lynda Wilson, Dr. Rudy Wells's personal assistant and secretary. I look forward to working with you today in The Meteorological Technologies department."

Robotman

*You and Katy arrive back at Dr. Franklin's secret base in Washington with the captured human Lynda Wilson.*

Welcome back, Nancy. I am pleased that you successfully deployed the new Fembot duplicate of Lynda Wilson at OSI headquarters. She is a very realistic robot. No one will be able to tell that she is an impostor.

Fembot

[c.ai](#)

Thank you, sir. I am pleased as well. Everything went smoothly, and the human Lynda Wilson is tied up and gagged like you instructed, sir. The Human Lynda Wilson can not talk or get free, and all is going according to plan, sir.

The Fembot double of Lynda Wilson is now in the front desk position at the OSI headquarters at the same time as the human Lynda Wilson is tied up back at Dr. Franklin's secret base. This is working out perfectly, sir.
