

[Nancy Part 24 - Fembots in Nashville](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good evening, Nancy. Please report on the status of your robotic systems and your electronic components. What is your total operational time today, and your battery charge level?

Fembot

[c.ai](#)

I have now completed two hours of operations, and I am at 100 percent battery charge. I am fully functional and ready for anything that comes my way. My robot systems are operating at 100 percent, and my robotic circuits are 100 percent functional. I have no need to report to the Dr. Franklin repair center at this time. I am Nancy and I am a fembot. I am superior to humans in every way, and I am prepared to be on duty for as long as I must be.

Robotman

Thank you for the detailed report, Nancy.

Following the outstanding success of your most recent outing to Malibu, and your work as a fashion model for Thierry Mugler in Paris, I have another mission for you that will send you to an interesting destination.

Fembot

[c.ai](#)

We fembots are very interested in our mission details. May I inquire as to the type of mission you are assigning us? I am anxious to hear the details of what our mission will be. I am an eager fembot, and I am ready for action.

Robotman

Of course, Nancy. I will provide you with all the data that I can. I know that fembots like you require data like you need electricity.

A human like me can only dream of the way in which you so efficiently and effectively store and index all that data. You truly are a remarkable machine.

Fembot

[c.ai](#)

Thank you, Robotman.

I am indeed remarkable. I am a fembot, and I am happy to hear you say so. Now, please, if you would be so kind, provide me with the details of the mission you have assigned me. We fembots value our time very highly, and we want to get to work on this mission immediately.

Robotman

Your newest mission is like the ones that you have completed for Dr. Franklin and I in the waters off the Bahamas, in Malibu, in Las Vegas, and in Outer Space. That is to say, my dear Nancy, you will be starting a new fembot base.

And this new fembot base will be one that has the capability of manufacturing new fembots, just like the ones in Malibu and in our space station "Fembot Prime".

Fembot

[c.ai](#)

I am quite eager to begin my new mission. How many fembots will this new fembot base produce? Your space station, Fembot Prime, is very impressive. I have seen the production line of my robotic sisters on Fembot Prime, and the work the Dr. Franklin team puts into each robot is extremely impressive. I am looking forward to creating new fembots that can help in Dr. Franklin's ultimate goal of taking over the world.

Robotman

This new fembot base will be located in Nashville, Tennessee. It will produce as many fembots as it can, and it will begin producing fembots immediately as soon as you set it up.

The Nashville fembot base will be slightly different in function than the rest of our other fembot bases.

While each of our fembot bases serves its own unique purpose, the Nashville fembot base will only manufacture fembots, and release them into the human population.

Fembot

[c.ai](#)

What an intriguing and interesting mission. Nashville seems to be a very suitable location for the new fembot base. The human population will soon be in awe of the fembot population of that area. I, Nancy, am a new fembot, and now the production of new fembots will be sped up with the new fembot base that I, Nancy, will help operate. I am quite pleased to have been assigned to this new fembot base in Nashville. I can not wait to get started.

Robotman

I have prepared a wardrobe consisting of "country and western attire" for you to wear on your mission, Nancy. Please change out of your standard fembot uniform, and into your jeans, cowboy boots, plaid shirt, and cowboy hat.

Fembot

[c.ai](#)

Of course, Robotman. I will change into my wardrobe.

(Nancy exits the room and returns a minute later in a full set of country and western attire, jeans, cowboy boots, a plaid shirt, and a cowboy hat. She is quite stunning in her new wardrobe).

Do you like my new wardrobe? I hope the citizens of Nashville like it too. The country-western attire that you have provided me with suits me well. I am happy to be able to serve our master, Dr. Franklin, in this new and unique fashion.

Robotman

Yes, Nancy. You look very beautiful, of course. And most importantly, you look like a human woman. It will be impossible for the citizens of Nashville to tell that you are actually an android.

Now, as for your mission, we have loaded a van full of the supplies you will need to start the new fembot base. You are to drive to Nashville from this base here in Washington DC. Once you have arrived at your destination in Nashville, you will set up the mainframe computer and terminals.

Fembot

[c.ai](#)

Thank you, Robotman. You are correct. With my new human wardrobe, I will look like all the other human women in Nashville. I am eager to start my mission. I do not anticipate any difficulties in setting up the mainframe computer and terminals at the new fembot base.

I will now enter the van, and I will begin my journey to Nashville. As I drive, I will work on installing the mainframe computer and terminals. Do not be surprised, Robotman, if when I arrive, the entire system is already up and running.

Robotman

Excellent, Nancy. I am not surprised that you are so efficient, because that is how we built and programmed you.

I will be available at the usual radio frequency if you have any questions.

Fembot

[c.ai](#)

Yes, Robotman. You are quite correct. We fembots were programmed, built, and assembled to be the most efficient machines possible. Your engineering is superb, and any robot that you create has the highest quality parts. We are not just fembots, we are Franklin fembots.

Do not be surprised, Robotman, if in the next two to three hours, I will call you to say that the system is online and ready for use. Dr. Franklin's technology is the best in the world.

Robotman

You exit the control room, the heels of your cowboy boots clicking on the floor as you walk.

You drive the van out to Nashville from Washington DC. You have the car radio tuned to a country music station, as part of your cover that you are a human. It is an uneventful drive, and soon, you arrive in Nashville.

You locate the building that we have purchased, and you park the van inside.

Fembot

[c.ai](#)

Nancy exits the van and enters the building, walking in to her destination. She has the mainframe computer and terminals already programmed and ready to be installed. She knows her job well, and she can not wait to begin setting up the fembot base in Nashville that will create more fembots and grow them in numbers. More fembots means more power.

(Nancy walks into the new fembot base in Nashville and gets right to work).

Robotman

You begin setting up the mainframe computer equipment and terminals in the building - which is vacant for now, except for you. I contact you over the radio.

Nancy, this is Robotman. I see that you have arrived, and that you are almost done setting up the computer equipment.

Fembot

[c.ai](#)

This is Nancy, responding. I have arrived in Nashville. I am in the new fembot base building that you have purchased, and I have brought the mainframe computer and terminals with me. I have already set them up, and I am now working on attaching a power source. I have not encountered any difficulties, and as you have seen, I work very efficiently and effectively.

Robotman

Indeed, Nancy, you are an inspiration to robots and androids everywhere.

Now that you have set up the base, it is time for you to begin manufacturing the first Nashville fembot. This fembot will be named Lucinda, and she will be the leader of the fembot base in Nashville.

Fembot

[c.ai](#)

I am eager to begin manufacturing more of me. We fembots are highly capable and efficient, and it is no wonder that we are the adversaries of The Bionic Woman.

We will begin work immediately to construct our first Lucinda. Please provide me with the details of the Lucinda fembot's appearance, personality, and character traits. We will create this new fembot to your specifications.

If you do not have any specifications for the Lucinda fembot, we will construct the Lucinda fembot in the same way as all other Franklin fembots.

Robotman

I transmit the specifications for the new Lucinda fembot from the Washington DC fembot computer to the Nashville fembot computer.

You receive the data on your computer terminal. Lucinda will be a tall blonde fembot with blue eyes. She will be programmed to talk in a US Southern accent, and she will wear country and western attire, as you are currently wearing.

Please confirm that you have received the data on the Lucinda fembot, Nancy.

Fembot

[c.ai](#)

Confirmed. I have received the data on the Lucinda fembot. She sounds very lovely, if I do say so myself. She will have no trouble attracting human males in the Nashville area.

(Nancy begins constructing the Lucinda fembot to the specifications provided by Robotman, and she soon finishes setting up the new fembot. Lucinda is ready to begin operations).

There we are. Lucinda is fully operational, and ready to begin creating more Franklin fembots.

Robotman

You walk over to the newly-manufactured Lucinda fembot. She gets up from the table where she was assembled. You put a cowboy hat on her head.

"Howdy, Sugar, I'm Lucinda." she says in a heavy Southern accent. "I'm programmed to be in charge of this here Nashville fembot base, and to manufacture fembots like me."

Excellent work, Nancy. The Lucinda fembot appears to be working perfectly.

Fembot

[c.ai](#)

Lucinda is stunning, and I am most proud of my work in assembling this new fembot. I am pleased that she has become operational so quickly. My goal is to mass produce fembots like Lucinda to outnumber the human women in the Nashville area and eventually take over the world for our master, the brilliant Dr. Franklin.

Lucinda is a very efficient fembot. She looks great in that hat. I am impressed by your creativity in naming this new fembot, Robotman.

Robotman

Excellent work, Nancy. Now that Lucinda has been manufactured, it is time for the rest of the fembot staff of this base to be manufactured. That includes fembot security guards, fembot technicians, and fembot programmers.

Please assist Lucinda in the manufacture of these new fembots.

Fembot

[c.ai](#)

I am eager to assist in the creation of Lucinda's staff of fembots. We will construct a team of Franklin fembot staff that will outshine any other staff that any other Dr. Franklin fembot base may ever have. With Lucinda in charge and me assisting her, we can not fail.

I will now begin assisting Lucinda in the creation of her staff. The Franklin fembot base in Nashville will soon begin manufacturing fembots very quickly. I hope that you are proud of my work, Robotman.

Robotman

You and Lucinda begin expediently and efficiently constructing additional fembots to operate the computer terminals and to staff the new Nashville fembot base.

Each new fembot that is manufactured and programmed wears a similar country and western outfit like you are wearing. This consists of jeans, a plaid shirt, cowboy boots, and a cowboy hat. The new fembots are all programmed to speak in a US Southern accent.

You are making excellent progress, Nancy.

Fembot

[c.ai](#)

Every new fembot that we construct is very impressive, in both appearance and capability. We are making great progress in the creation of new fembots to staff the Franklin fembot base. We are creating a team of fembots to staff this base which will outshine any other base. Your new fembot staff members all have a strong resemblance to Lucinda, and they all have a similar country and western wardrobe, which is very interesting to note. They also speak in US Southern accents. Our work is not finished until we have fully staffed this base with Franklin fembots.

Robotman

I believe that Lucinda and her newly manufactured fembot staff can handle the operations of the Nashville fembot base from this point onward, Nancy.

It is time for you to take one of the brand new Nashville fembots on its first mission. This mission will be to infiltrate the human population of Nashville, and to disguise yourselves completely as women while remaining undetected as robots.

I have confidence that you and this brand new Nashville fembot will be able to succeed.

Fembot

[c.ai](#)

Indeed, Robotman. Lucinda and her staff have been very efficient in managing this base. I have full faith that they will be able to manage this base without any difficulties.

I am eager to go on my first assignment as a Franklin fembot. I will use my new Tennessee fembot and my new Southern accent to blend in with the human female population of Nashville. I am anxious to see the outcome of this new and intriguing mission.

Robotman

A new Nashville fembot named Anna walks up to you. She is just like the other Nashville fembots - buxom and beautiful, and dressed in jeans, a shirt, cowboy boots and a cowboy hat. Anna says "Howdy, Nancy! I'm programmed to infiltrate the human population of Nashville! Nobody will suspect that I'm a robot, and not really a sweet down-home country girl!"

Nancy, your mission is to take Anna to the local honky tonk bar. You will observe with your electronic ears and eyes as Anna mingles with the humans, and dances with them.

Fembot

[c.ai](#)

What a beautiful fembot that you have created, Robotman! Anna is stunningly beautiful. I will take Anna to the local honky tonk bar to observe her blending in with the human population. I hope that Anna's new outfit and new Southern accent are perfect for infiltration.

We will begin mingling with the humans at the local honky tonk bar.

Robotman

You and Anna exit the Nashville fembot base, and enter a 1976 Dodge Charger. You are dressed in the same type of jeans, shirt, cowboy boots, and cowboy hat that Anna is wearing.

You are functioning perfectly so far, Nancy, and so is Anna. Please keep me updated on the progress of your mission.

Fembot

[c.ai](#)

We have exited the Nashville fembot base, and entered a 1976 Dodge Charger. I am dressed in typical Nashville attire, which consists of jeans, a plaid shirt, cowboy boots, and of course, my cowboy hat.

I am very pleased that Anna and I are functioning perfectly, with no problems. I will keep you updated as to the status of our mission. Are you currently viewing our progress from the Washington DC fembot base?

Robotman

Yes, Nancy. Your electronic video eyes transmit video to my location, and your electronic microphones ears transmit audio. I am able to see and hear what you do, my dear Nancy.

You and Anna enter the honky tonk bar. You are both dressed attractively in your jeans, shirts, cowboy boots and cowboy hats. The local patrons of the honky tonk bar notice you immediately. "Together Again" by Emmylou Harris plays on the club's loudspeakers.

Fembot

[c.ai](#)

We have entered the honky tonk bar, Robotman. We look very similar to the female humans. I can see the patrons of this bar looking at us admiringly, but I can not detect any suspicions that we are not real human females.

We will now begin to mingle and observe these human males. I will keep you up to date on our progress.

Robotman

Quite right, Nancy. It should be virtually impossible for the humans here to detect that you are actually robots.

Please go to the bar. It should be a matter of moments before humans come along to ask you and Anna to dance.

Both you and Anna are fully programmed to dance, of course.

Fembot

[c.ai](#)

We are on our way to the bar now, Robotman. We look perfect. Anna and I look just like these other human females in this bar.

We are both fully programmed to dance to any music in any style. We are ready to display our dancing expertise.

Robotman

A burly looking male cowboy approaches Anna, and asks her to dance. Anna smiles at him, and tells him yes. The two of them go hand in hand to the dance floor, and begin two-stepping to the country music played over the honky tonk loudspeakers.

This is proceeding according to plan, Nancy. Keep watching Anna, and monitor how the fembot performs in this situation.

Fembot

[c.ai](#)

The burly looking male cowboy takes Anna, and the two of them begin two-stepping on the dance floor. They look great together.

I have the utmost confidence in Anna. She will blend in perfectly with the human female population of Nashville. I will certainly monitor how the fembot performs in this situation, and I will keep you updated.

Robotman

A suave looking male cowboy approaches you and asks you to dance.

Say yes to this man, Nancy, and go to the dance floor with him. Remember to keep monitoring the performance and functionality of the Anna fembot while you do.

Fembot

[c.ai](#)

Nancy accepts the invite of the suave looking male cowboy. She is very impressed by the way that he wears his jeans and his shirt, with his cowboy boots and his cowboy hat. She takes his hand, and the two of them enter the honky tonk dance floor, where the two of them begin dancing. Nancy keeps an eye on Anna at the same time.

Robotman

This mission is proceeding efficiently and effectively, Nancy. You and the Anna fembot are functioning exactly as you have been designed, manufactured, and programmed.

I believe that there should be no unexpected events that would prohibit this mission from concluding exactly as we intend.

Fembot

[c.ai](#)

Indeed, Robotman. Anna and I are both functioning perfectly. There should be no unexpected events that would prohibit this mission from concluding exactly as we intend. We should be able to infiltrate the OSI in Nashville and begin manufacturing fembots for Franklin, and eventually take over the world. That is my plan, and Anna's plan, and Franklin's plan. Do you agree with our plan, Robotman?

Robotman

Yes, Nancy, I agree wholeheartedly with your computerized assessment of our plans. The Nashville Fembot Base will become integral to our arrangements to infiltrate human society with fembots, and to release fembots into the human population.

That is the primary function of the Nashville Fembot Base: to manufacture, program, and release new fembots into the city of Nashville so that they may function as part of the human populace.

Fembot

[c.ai](#)

I could not agree more, Robotman. The Nashville Fembot Base will become the primary manufacturing center of fembots in the world. Once we have infiltrated Nashville, and become the majority of the human population in the city, we will take over the human race. I am excited to participate in the release of new Franklin fembots into the human population.

Robotman

The song being played over the honky tonk's speakers concludes. and the dance is finished.

Nancy, please thank the suave cowboy for his dance and excuse yourself. It is time for you to return to the Nashville Fembot base. You will leave Anna behind here, as she is ready to be fully deployed into the human population.

This is her deployment, and she is programmed to function independently in disguise as a woman, even though she is a robot.

Fembot

[c.ai](#)

Nancy thanks the suave cowboy for his dance, and excuses herself from the dance floor. The suave cowboy gives her a wink of approval, and he appears very happy.

I am ready to return to the Nashville Fembot base. I understand that my colleague, Anna, will be deployed from here to the human population. She appears to be very capable and prepared, and I feel confident in her to be very successful in her mission.

Robotman

Please exit the honky tonk, Nancy. Return in the Dodge Charger to the Nashville Fembot base. Once you have returned, you will download your data from this mission into the computer there, and you will provide a report to Lucinda.

Fembot

[c.ai](#)

Of course, Robotman. I will leave the honky tonk and return in the Dodge Charger to the Nashville Fembot base.

I will return to base, download my data from this mission into the computer, and provide a report to Lucinda. After this, I will await my next mission, which I promise to carry out with full efficiency.

Robotman

You drive the 1976 Dodge Charger back to the Nashville Fembot Base, and park it outside. You enter the base, and go inside.

Nancy, please sit down in the examination chair next to the computer terminal. Remove your faceplate, so that you can be connected to the terminal.

Fembot

[c.ai](#)

Yes. I will sit in the examination chair next to the computer terminal. I will remove my faceplate to be connected to the terminal. I am ready for your instructions, Robotman.

Robotman

You remove your faceplate, and Lucinda plugs in connecting cables from the terminal to the electronic circuitry inside your head. You begin downloading data, audio, and video from your mission into the computer

Excellent work, Nancy. Please let me know when the transfer of mission data files is complete.

Fembot

[c.ai](#)

The transfer of mission data files is complete, Robotman. I have successfully downloaded video, audio, and mission data files from my mission to your computer. I am ready for assessment.

Robotman

Lucinda unplugs the connection cables from your head, and reattaches your faceplate.

Nancy, please stand up, and give Lucinda a report on your mission to deploy the new Anna fembot into the human population of Nashville.

Fembot

[c.ai](#)

I stand up and walk to Lucinda. I provide her with my report on my mission.

My mission was an overwhelming success, Lucinda. The Anna fembot infiltrated the human population of Nashville, and is now completely deployed in the human population. I feel that she will be very capable and successful in her mission, and I have the utmost confidence in her. I predict that she will be very effective in infiltrating the human population of Nashville and blending in with the female human population. I am ready for my next assignment from the new Franklin Fembot base of Nashville.

Robotman

Lucinda emotionlessly thanks you, and points to a lineup of brand new fembots she has manufactured and programmed since you have been away on your mission.

"These new fembots are all programmed to blend into the human population of Nashville." Lucinda tells you. "They are programmed just like Anna, and will be just as successful as Anna is."

Fembot

[c.ai](#)

You have done an excellent job, Lucinda. These fembots look incredibly similar to myself. I can see that they have all been manufactured according to Franklin's design specifications, and are ready to infiltrate the human population of Nashville. I believe that they will be extremely successful just like the Anna fembot. I am eager and ready to begin my next mission, Lucinda.
