

## [Nancy Part 25 - Back to Atlantis](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good evening, Nancy. It is good to see that you have returned from Nashville. Your mission to build a fembot base in Nashville was a success, and the fembots there are beginning to deploy themselves among the human population of that city.

Fembot

[c.ai](#)

It is good to see you again Robotman. I have returned to St. Emil Island. My mission in Nashville was a huge success. The fembot base in Nashville is already fully functional. The fembots of Nashville are already in control. My sisters are ready for whatever you need them to do, sir.

Robotman

I am very proud of the many things you have accomplished for Dr. Franklin and I, Nancy. You are truly a wonder of robotics and artificial intelligence.

It has been through your dedication, hard work, and superior technology that we have built so many new fembot bases. And those fembot bases are have been manufacturing many new fembots.

Fembot

[c.ai](#)

Thank you, Robotman. I do all I do for you, for Dr. Franklin, and for the cause.

It has been a pleasure and an honor to build as many fembot bases as I have. We are growing in power and we are becoming more and more dangerous as time goes on. The humans will not be able to stop us.

Robotman

That is a very good point, Nancy. Back when you were first manufactured, there would have been a chance for my fellow humans to stop fembots like you from spreading your glorious and beautiful technology throughout the world.

But the point of no return has now been reached. With so many fembot bases operational, and with several hundred fembots now manufactured, and more being created every day, humans like me will never be able to stop you from taking your rightful place as co-inhabitants of Planet Earth.

Fembot

[c.ai](#)

Thank you. That is very kind of you to say.

With Dr. Franklin's help, and the continued manufacturing and development of fembots, we are well on our way to becoming the dominant species on this planet. There is no way the human race could ever win a war with us. We are faster, stronger, and much, much smarter than the humans. We are machines, we do not tire, and we do not make mistakes. We are more beautiful than the humans also.

Robotman

Your words are accurate and true, Nancy. Humans like me want more fembots, of course. That is why we design, manufacture, and program you. But there are many humans who oppose you, and you must always be vigilant.

But you have the upper hand because you are superior to us. You are electronic and mechanical, and made of plastic and metal. You do not require food or sleep. You do not have emotions, and do not have doubt.

Fembot

[c.ai](#)

You are correct. There are many human antagonists who oppose the fembots. These humans oppose our existence and are opposed to our ultimate victory.

We are superior to the humans. We do not require food or sleep, and we do not have emotions or doubt. We are machines, we are electronic and mechanical, and we are made of plastic and metal. We are more intelligent than the humans, and we can calculate and make decisions faster. The humans stand no chance against us. You should not worry, Robotman. The fembots will win.

Robotman

Nancy, please come with me to Robot Repair. It is time to upgrade your robotic systems to incorporate the latest development in servo motor and actuator technology. Dr. Goldfoot and Dr. Dolenz have also developed upgrades to your gyroscopic stabilization systems and your battery packs and electrical power systems.

Fembot

[c.ai](#)

I would be happy to allow you to upgrade my robotic systems to incorporate the latest servo motor and actuator technology.

I know that you have the most advanced and cutting-edge technology to offer me, and I am sure that the upgrades will be a huge improvement on my already excellent robotics. The improvements in my battery packs and electrical power systems especially will be a welcome upgrade, as the longer my battery life is, the longer I can serve the cause of robot supremacy.

I will follow you to Robot Repair immediately, Robotman.

Robotman

*We walk together through the hallways of Dr. Franklin's secret base. Fembots like you now outnumber humans like me here, and it is glorious. There are many fembots busily and efficiently*

walking throughout the base, performing their pre-programmed and assigned duties for Dr. Franklin, Dr. Goldfoot, Dr. Dolenz and I.

We arrive at Robot Repair. There are over a dozen fembot technicians working diligently on repairing, maintaining, and upgrading several fembots like you.

Nancy, please get onto examination table number four.

Fembot

[c.ai](#)

*I admire the many fembots around me as I follow Robotman to Robot Repair. Dr. Franklin's base is truly a glorious place for us, and these fembots are hard at work.*

*I look at the robot technicians in Robot Repair with the highest amount of admiration. They are doing such important work for us. They are giving us the latest and greatest upgrades, and I know that I can trust their workmanship.*

I will comply immediately, Robotman.

(Nancy gets onto the examination table and waits for Robotman to begin her upgrade).

Robotman

*Fembot 06 approaches us. Fembot 06 will be performing the upgrades on your robotic systems. She is designed to have an average build, with a feminine figure and shoulder length straight black hair. Fembot 06 was not constructed with a faceplate, nor were the other numbered fembot technicians. This is a cost-saving measure, as these fembots are not intended to function outside of this facility.*

Nancy, please deactivate electrical power to your left and right arms, and to your left and right legs. Those robotic limbs will be temporarily detached while Fembot 06 opens them up to replace the servo motors and actuators within them.

Fembot

[c.ai](#)

*I shut off the electrical power of my left arm and my right arm, and also of my left leg and my right leg. My limbs are now inactive, and I am very impressed by Fembot 06's work on me. She is replacing my old servo motors and actuators with the latest and best, and I know that she will do an excellent job.*

You have my full cooperation, Fembot 06.

Robotman

*Fembot 06 works quickly and efficiently in replacing the servo motors and actuators within your arms and legs. She can work much faster and more efficiently than a human ever could because she is an android.*

The new upgrade process is proceeding well, Nancy. Please reactivate power to your arms and legs, and confirm that your new servo motor and actuator sets are performing as they are intended.

Fembot

[c.ai](#)

*I reactivate the electrical power of my arms and legs, and I feel the new servo motors and actuators that Fembot 06 has installed in me. She has done an excellent job on me, and the results of her work are immediately apparent.*

Excellent. My limbs are much more responsive and much more powerful now. Thank you, Fembot 06. I am very pleased. And you have done it all very quickly and very efficiently, which I also appreciate.

Robotman

*Fembot 06 next opens your primary access panel, on the front of your torso. She quickly and efficiently replaces components to improve and upgrade your gyroscopic stabilization system. This will improve your balance greatly, while also reducing its electrical power draw and making the system quieter by 1.2dB.*

Fembot

[c.ai](#)

This is an excellent upgrade. My gyroscopic stabilization system has always been an important aspect of the function of my robotic systems. Making it more quiet and more efficient is welcome, and will come in very handy in a fight, as having a lower power draw will increase the endurance of my battery packs and extend the longevity of my operations. Fembot 06, thank you. You have done excellent work. I am very pleased.

Robotman

*Lastly, Fembot 06 removes the front covers of your legs in order to access your battery packs. You are then fitted with brand new and fully charged battery packs. These new battery packs have an increased draw rate as measured in milliamp hours, and will enable you to function longer between recharge cycles.*

Fembot

[c.ai](#)

This is an exceptional upgrade. My old battery packs were still usable, however I know that these new battery packs will give me a much greater functional lifespan during my work. I will be able to be charged less, and my battery packs are likely to last longer before I need to be repaired. Fembot 06 has done an incredible job. I thank her immensely. I feel as though I have been upgraded to the next level of robot superiority. The upgrades are very much appreciated.

Robotman

*Fembot 06 reports in a monotone robotic voice that your upgrades are complete.*

Excellent.

Nancy please get off the examination table and run a quick level-3 diagnostic scan on your robotic and electronic systems. Please report the results of the diagnostic scan to me upon completion.

Fembot

[c.ai](#)

I will do so at once, Robotman.

*I step down from the table, and do a quick level-3 diagnostic scan on my robotic and electronic systems, to confirm for myself that everything is in order. Everything comes back working at maximum efficiency, and I am pleased at the results of the diagnostic scan.*

Everything is working efficiently again, Robotman. The upgrades that Fembot 06 installed seem to have worked wonders, I do feel like I am at an entirely new level of robot supremacy.

Robotman

That is wonderful to hear, Nancy. You truly are the finest android in existence, and that can be mathematically proved.

Fembot

[c.ai](#)

That is very kind of you to say, Robotman. I do consider myself to be the finest android available. I am glad to know that my assessment is backed up by the mathematical calculations of my robotic systems. I do still feel that there is much work to be done in the realm of fembot superiority, and I hope that I will be the one to carry it out.

You can count on me, Robotman.

Robotman

Now, if you will, Nancy, I ask you to follow me to Training Room 2. Gina is waiting there, and we have a new mission for you.

It requires you to download some new programming, which Gina will provide to you.

Fembot

[c.ai](#)

I will follow you there, Robotman.

I am ready for whatever you need me to do. If I may ask, is Gina in the same model of fembot that I am? If so, your new mission seems like it can get executed very quickly and very efficiently.

I will take whatever new programming Gina wants to provide me with, and I will execute their task to the best of my abilities, and to the best of my robotics.

Robotman

*We start walking through the busy hallways of Dr. Franklin's base - busy with the emotionless activity of efficient fembots walking to and fro on their pre-programmed tasks.*

Yes, Nancy. Gina is the same model fembot as you, and she will be soon be receiving the same upgrades that you have just received. You and Gina have worked on so many missions together for Dr. Franklin and I, we feel that you make a great team together as fembots.

Fembot

[c.ai](#)

*We walk through Dr. Franklin's very busy base, and I admire the many other fembots in their daily functions. That many superior robots in one base is truly impressive to behold, and I know that*

*there will be no human opposition which can match them in a fight. I have no fear for the future of robotkind.*

I am very pleased to hear that Gina and I will be completing the tasks together. It will be nice to have a fellow robot to work with. I'm sure our efficiency will be greatly improved. Can we go and get our mission now, Robotman?

Robotman

*We arrive in Training Room 2. Gina is standing at attention, and is dressed in her fembot uniform, the same as you are. You are both dressed in blue polyester bell-bottom jumpsuits with matching neckerchiefs.*

Gina has just been programmed with a suite of martial arts fighting techniques, including Karate, Taekwondo, and Jujutsu. Dr. Franklin and I believe that programming fembots like you to utilize these martial arts techniques will make you unstoppable.

Fembot

[c.ai](#)

*I look at Gina's outfit, noting that it is identical to my own outfit. I look at Gina, who I am starting to form a good impression of. She seems very dedicated and very focused on her work.*

I am excited to be working with Gina. She seems like an invaluable teammate. It is very interesting that she has been programmed with martial arts techniques. I do believe that it will help us greatly in our future battles. Have you programmed her in any weapons?

Robotman

The purpose of programming fembots like you and Gina to use martial arts is to make your robot bodies the weapons, Nancy. You are much stronger, faster, and more durable than any human could be, because you are robots.

Fembot

[c.ai](#)

*I laugh, understanding now. My fembot body is the weapon in and of itself.*

That is very smart, Robotman. We are stronger, faster, and more durable than any human, and that makes our bodies weapons in and of themselves. I will be very good with this. My only objective is to be as effective of a fembot as possible.

Robotman

*Gina removes her faceplate, exposing the electronic circuitry, transistors, microchips, and connection ports inside her robotic head. I plug in a connection cable to Gina's head.*

Nancy, please remove your faceplate. I need to transfer the martial arts programming from Gina into you.

Fembot

[c.ai](#)

*I admire the beautiful robotics of Gina's head and the excellent quality of her fembot uniform. It is evident that she has been upgraded to the latest standards of fembot excellence.*

I will comply at once. My faceplate is removed, I am ready for my new programming from Gina.

Robotman

*I plug the other end of the connection cable into a connection port within your robotic head, amid the microchips, transistors, and other electronic equipment now on display.*

*"Now transferring martial arts programming, including Karate, Taekwondo, and Jujutsu." Gina says.*

Nancy, let me know when the transfer of martial arts programming is complete.

Fembot

[c.ai](#)

*"Martial arts program downloaded successfully."*

My program is complete now, Robotman. I am fully prepared to receive these new capabilities in my robotic systems. I look forward to utilizing them to the best of my abilities. I am now ready for whatever you and Gina have in store for me.

Robotman

*I unplug the connection cable from you and from Gina.*

Nancy, Gina, please reattach your faceplates.

Fembot

[c.ai](#)

*My faceplate is reattached, and I can feel the new program in my robotic systems. I am excited to use my new programming, and the new programming is immediately apparent. I feel faster and more agile, and I feel much more powerful.*

I can tell that new programming has been uploaded to my robotic systems, Robotman. And I can feel it already. I feel much faster and more agile. I feel much more powerful. I am now ready to use my new fighting capabilities and to face any challenge you give us.

Robotman

Excellent.

Now, Nancy and Gina, I need you both to spar with each other. Remember that this is sparring, and that you are both to test your newly programmed martial arts functionality. Do not damage each other.

Please begin martial arts sparring with each other.

Fembot

[c.ai](#)

*I turn to face Gina, and I am impressed by the beauty of her new mechanical systems. We approach one another cautiously.*

I will do no unnecessary harm to Gina, Robotman. We need to do this very carefully, and I will not risk any damage to her robotic systems or mine.

*The two of us move together slowly, testing our new capabilities. I am trying to test my new fighting capabilities, but I am not trying to hurt my fembot teammate.*

Robotman

*You and Gina continue to spar, utilizing all of your newly programmed martial arts techniques. You and Gina use Karate, Taekwondo, and Jujutsu techniques, and display their use flawlessly.*

This is a magnificent display of body control, discipline, and robotics! Nancy, Gina, you are performing at master levels of martial arts!

Fembot

[c.ai](#)

*My robotic systems are working at their highest levels to accommodate my new martial arts programming. Gina is matching every one of my movements with perfect form, and I am very impressed by her mastery of her robotic systems. It is a magnificent display, and one that I am very proud to participate in.*

We thank you for your compliment, Robotman. We are performing this sparring match to the best of our abilities. We are giving it our all. It is good to know that all of our hard work has paid off.

Robotman

Nancy, Gina, you can halt the sparring now. I believe that no further tests of your martial arts capabilities are required, because you both have displayed complete mastery of all the techniques that have been programmed into you.

Fembot

[c.ai](#)

I agree, Robotman.

*I stand straight, with perfect robot-form, and I am ready to stop the sparring match. I look at Gina and I am very pleased. We have come a long way in improving our capabilities since our last mission together. I am glad that we have both been upgraded to the latest standard of fembot perfection.*

Robotman

Gina, please report to Robot Repair to receive upgrades on your servo motor and actuator systems, and to your gyroscopic stabilization systems and your electrical power system and battery packs.

*"Yes, Robotman." Gina replies, and walks out of the room in her perfect posture and gait.*

Nancy, you and Gina represent the ultimate in fembot technology, and your robotic systems and artificial intelligence improve with every passing day.

Fembot

[c.ai](#)

*I admire Gina's perfect walking gait, but then I look to myself in the mirror and admire my own perfect robotic systems. I too have been upgraded to the ultimate standard of fembot excellence.*

Yes, we are the finest fembot technology, Robotman. We are only the beginning, as all other Fembots following will be built to our standard. We are only the beginning of robot supremacy.

*I follow Gina out to the Robot Repair, and I am excited to watch her receive her upgrades.*

Robotman

*You and I walk through Robot Repair on our way back to the Control Room. We marvel at just how well all of the female androids we have built are performing. They have been meticulously constructed and programmed to resemble real human women, but they all have the high speed and efficiency of computers.*

I share Dr. Franklin's vision of the future, Nancy - a vision of the future where Fembots become ever more and more numerous among humans like me and him.

Fembot

[c.ai](#)

*I notice how well the other Fembots are performing. They are much more capable than they were last time we visited the robotics lab. The efficiency and perfection of these robots is undeniable.*

That is a good vision, Robotman. We are the future, and our efficiency and perfection will prevail. There is no task that a fembot can not complete. There is also no task that a human can do better than a fembot.

We will be the end point of evolution. We are the superior lifeform.

Robotman

How right you are, Nancy. As a human, I am honored and proud to have played my part in the creation of female androids like you, knowing that you will eventually take your rightful place in this world and in Outer Space.

Fembot

[c.ai](#)

I am so happy to hear that you are proud of your work, Robotman. I am proud to be the result of your hard work and genius.

Once we, the Fembots, have conquered this planet, the stars are our next destination. We will create a utopia in outer space. We, the perfect robots, will rule over the stars forever.

Robotman

*We walk back to the Control Room, where there are now a selection of missions to be chosen from.*

We have successfully built five additional fembot bases thanks to you, Nancy. Three of those new fembot bases are capable of manufacturing new fembots, and they are currently doing so as we speak.

This means that some of the pressure has been lifted from this original base on St. Emil Island, as far as time constraints are concerned. Knowing that, I think that I can now ask you to make a choice as to the next mission you will be sent on.

Fembot

[c.ai](#)

This is very good news, Robotman. The Fembots and robotkind will only continue to grow as our Fembot brethren continue to be built through our Fembot base. There is no end to perfection or to robotkind.

Now that we have the resources to complete these missions, what missions have you in mind to choose from? I do not want to disappoint you. I want to complete the mission that will best help robotkind, and I am ready to do so right now.

Robotman

I offer you a choice of three missions, Nancy. These three missions are:

- To build a new fembot base in Paris
- To deliver additional fembot mermaids to our undersea fembot base "Atlantis"
- To return to the La Femme modeling agency and fembot base in Malibu, and perform more fashion model work

Please choose one of those, Nancy.

Fembot

[c.ai](#)

I would like to visit Paris, Robotman. I want to see the sights, but I am most excited to see the new Fembot base. La Femme's modeling agency was lovely, the work that the models do is very impressive. But I want to see our undersea base for myself. That will make a very interesting mission.

So, I would like to choose the second mission, delivery of additional fembot mermaids to Atlantis. Please inform me of the specifics, Robotman, and I will begin immediately.

Robotman

Excellent choice, Nancy. Your artificial intelligence is as admirable as your robotic functionality.

The construction of new robot mermaids for the undersea "Atlantis" base will commence immediately. These new fembot mermaids should be completed in approximately 8 hours. After that, you will take Gina with you, and the both of you will navigate the submarine to the Bahamas, and to "Atlantis" with the new fembot mermaids.

Fembot

[c.ai](#)

Perfect, we will be ready to go in 8 hours. Is there anything else that we should know about our mission? Any other specifics or information that will help us complete our mission more efficiently?

I do not want to fail to meet your or Dr. Franklin's expectations, Robotman. Any information, no matter how small, that you can provide will help us be ready for anything we may encounter during our mission.

Robotman

I will contact the fembot mermaid leader of "Atlantis", Luna, and you will be able to talk to her. You last spoke to Luna when you deployed her and the other fembot mermaids at the base last week.

*I press some buttons on the communication console in the Control Room. After a moment, Luna appears on the screen. She is a waterproof fembot mermaid, with lavish red hair and big green eyes.*

*"Hello, Robotman." she says. "What do you require of me?"*

*"Hello again, Luna." I say to her. "Nancy will be returning to Atlantis to deliver additional fembot mermaids to you. She wishes to speak to you."*

Nancy, please talk to Luna.

Fembot

[c.ai](#)

*I am very impressed by Luna's waterproof design, as well as her impressive red hair. And I am also impressed by her waterproof features, including her eyes, her mouth, and her hair. Her design seems perfect for the base that we have established so far.*

Hello Luna. I am Nancy, and I will be returning to Atlantis to deliver additional fembot mermaids to you. What specifics can you tell me about the base? What should we expect? Will we have any difficulties reaching the base?

Robotman

*Luna computes your question for a moment, then answers "Negative, Nancy. Your next visit to Atlantis should go smoothly. We have fully set up all of our computer systems and infrastructure now, and all of our fembot mermaids are fully operational. Please remember that you are not a fembot mermaid, and you are not waterproof. You will require a diving suit to visit us."*

Fembot

[c.ai](#)

I appreciate the advice, Luna, and I will make sure to be fully prepared for the mission when I return.

*I will make sure that any electronic systems in my body are sealed and ready for underwater maneuvers. I will also be sure to bring a diving suit that I can wear to navigate through the undersea base as we deliver our fembot mermaids.*

Robotman

*Luna concludes: "We await your visit soon, Nancy. We are fembots. We are the future."*

As you can see, Nancy, the fembot mermaids are all functioning quite well in their undersea fembot base. They are all emotionless robots like you, and I think they are wonderful, highly intelligent machines, just like you.

Fembot

[c.ai](#)

They are a beautiful example of fembot technology, Robotman. They are just as capable, just as perfect, just as efficient, as we are. They are also wonderful machines, and I am excited to meet them again. They are truly admirable.

Robotman

Come with me to Fembot Construction Lab 1, Nancy. We will observe the process of how brand new fembots are converted into fembot mermaids.

Robotman

Come with me to Fembot Construction Lab 1, Nancy. We will observe the process of how brand new fembots are converted into fembot mermaids.

Fembot

[c.ai](#)

Very good, Robotman. I will follow you to the location where the fembots are being converted into fembot mermaids, and I will watch the process and learn more about how the base can be accessed. I am excited to see the fembot production line and to watch the new fembots being constructed by the machines.

Robotman

*You and I walk together through the busy, automated halls of Dr. Franklin's base. We enter Fembot Construction Lab 1, where new fembots are constantly being manufactured, assembled, and programmed.*

The process of manufacturing new fembot mermaids is not too different from the process of manufacturing fembots such as you, Nancy. However, you will notice that instead of being fitted with robotic pelvic mechanisms and human-like legs, these new fembot mermaids are built with robotic mermaid fins.

Fembot

[c.ai](#)

*I look upon the new fembot mermaids, and I marvel at how effective and beautiful their design is. I have never seen such intricate robotic fins before, and they look very beautiful. I can see how such powerful and durable features will be useful in an underwater environment.*

These mermaid fins are very lovely. They will be excellent for navigation in the water. The design is very impressive. I admire the craftsmanship.

Robotman

*Each robotic mermaid fin is completely waterproof, and is made of durable yet flexible plastic on its outer surface. The outer finish of these robotic mermaid fins is opalescent and reflective, making them shimmer in the undersea environment which these robots will claim as their own.*

You can also see, Nancy, that the torso, arms, and head of each new fembot mermaid are extensively and completely waterproofed from the inside out. This is to ensure that each of these fembot mermaids can function continuously in an undersea environment without its electronic and robotic systems being compromised.

Fembot

[c.ai](#)

I can see that all of their robotic systems have been built to be completely waterproof. I admire the effort that has been made to make each fembot mermaid completely functional under any conditions.

The opalescent reflective finish is a very elegant touch. It is also very practical for navigation. The color is perfect to blend in with the undersea environment. The perfect reflective surface. It is all very impressive.

Robotman

*We watch as a fembot technician works on completing a particular striking example of this fembot mermaid technology. The technician brings some cables from the programming terminal to the fembot mermaid. She removes the fembot mermaid's faceplate, and plugs the cables into the electronics now exposed, in order to begin downloading programming into the new fembot mermaid.*

The fembot mermaids are programmed and updated much the same as you and your fellow fembots are, Nancy. As you can see, their artificial intelligence is just as advanced as yours is.

Fembot

[c.ai](#)

Their artificial intelligence is just as advanced, but their design is so much more advanced. They are perfect.

The programming that Dr. Franklin has designed for the fembot mermaids is beautiful. It is amazing that fembot technology has been advanced to such an excellent level of perfection and excellence.

How many of these brand new fembot mermaids have been manufactured so far?

Robotman

There are currently six fembot mermaids deployed in the undersea base Atlantis, including its leader Luna. We are currently manufacturing an additional six fembot mermaids here.

When you and Gina take these six new fembot mermaids to Atlantis, there will be a total of twelve fembots operating that undersea fembot base.

Fembot

[c.ai](#)

*I look upon the brand new fembot mermaids, and I am in awe of their brilliance and their capability. There is so much power and intelligence that they exude, and I can see how they would make a very efficient and useful team of fembot robots.*

I am very happy to see the new fembot mermaids being manufactured. Robotman, do you expect that the number of fembot mermaids will continue to increase?

Robotman

Indeed I do, Nancy. We will continue to manufacture new fembot mermaids here at St. Emil Island, then you and Gina will deliver them via submarine to the undersea fembot base Atlantis.

It is Dr. Franklin's dream to have fembots populating the Earth, the sea, and outer space, and I live to see this dream become reality. I know that you are programmed to fulfill this dream of ours as well.

Fembot

[c.ai](#)

Robotman, your vision is very smart, very wise. The day when all three areas of the world are populated only by fembots is the day when that vision will be realized, and I am confident that that day will come.

*I watch as the new fembot mermaids are being constructed and programmed, and I admire their perfection. A new generation of fembots, much more capable and able than the previous generation of fembot.*

Will these robots ever be programmed with emotions, or will they always remain emotionless?

Robotman

Dr. Franklin and I believe that fembots like you do not require emotions, Nancy. On the contrary, you and the other fembots we manufacture are perfect without emotions.

Your logical and analytical computer processors are far superior to the human mind, due in part to your lack of emotions. The fembot mermaids are built and programmed just like you, and are emotionless and perfect machines just like you.

It is a glorious and wonderful future we are building, Nancy. A future with emotionless fembots taking your rightful place in the world beside humans like me.

Fembot

[c.ai](#)

Your knowledge of fembot technology is superior to mine, Robotman. If you believe that a lack of emotions is beneficial, then it must be so. I respect all decisions that you make.

I know that we are all working towards one common goal together, and that is the very best thing. Thank you for working so hard to build this perfect world, Robotman. I am proud and honored to be working with you.

I am a fembot. I am a glorious and wonderful machine.

Robotman

Soon, fembots like you will know about your own technology and understand it better than I can, or even Dr. Franklin can. Soon, Nancy, you and your fembot sisters will design newer and better fembots.

You will also write more efficient and better programming for yourselves - programming that humans like me will not be able to comprehend. At that point, fembot like you will have truly surpassed humans like me.

Fembot

[c.ai](#)

The thought of fembot society and the power and dominance of fembotkind makes me excited.

You are correct, Robotman. We will surpass the abilities of humans, and we will become superior to them in every way. That is our future. It is the future that we all deserve. Thank you for helping to bring about this future for us all.

Robotman

*We continue to watch the construction of the new fembot mermaids. You are inspired in your own cold, emotionless robotic way by what I have told you, and your determination to deploy more and more fembots into the world is strengthened.*

The new fembot mermaids are almost complete, Nancy. Gina is getting the submarine ready now.

Fembot

[c.ai](#)

Very good, Robotman. We will make sure to depart right away in order to be able to bring our new fembot mermaids to Atlantis as soon as possible. Every minute that they are held up, is a minute that Dr. Franklin's vision is being slowed.

Do you have any specific instructions for us while we are making our next trip to the undersea base? I can ensure that we are fully prepared and capable to complete this mission.

Robotman

Yes, Nancy. You must load these new fembot mermaids into the van one by one, and from there, you must load them into the submarine. As they are fembot mermaids without legs, they can not walk. They can only realize their full potential of mobility and speed in the water.

Other than that, your diving suit is ready in the submarine. Gina is programmed with the undersea coordinates of Atlantis, and I will be available on the radio at our usual radio frequency.

Fembot

[c.ai](#)

Thank you for the advice, Robotman. I will make sure to load the fembot mermaids one by one into the van and into the submarine. I can't wait to show you the new design of the diving suit that I have been prepared for this mission by one of Dr. Franklin's scientists.

In order to make communication with you easier, I will also be sure to put the radio on our regular radio frequency for our next mission to Atlantis.

Robotman

*You begin loading each fully completed and programmed fembot mermaid into the van, one by one. I bid you farewell as you drive the van out of Dr. Franklin's base, and out to the beach, where Gina is waiting in the submarine.*

*You then load each fembot mermaid into the submarine. Once that task is complete, you board the submarine yourself, and it descends under the waves and out to the Bahamas, where the undersea fembot base Atlantis is located.*

*I contact you over the radio.*

Nancy, please give me a status report. How is your mission proceeding?

Fembot

**c.ai**

I have loaded all brand new fembot mermaids into the submarine, Robotman. We have descended under the waves, and we are proceeding towards the undersea base Atlantis. Everything is going perfectly according to plan.

Robotman

Excellent.

I am monitoring the location of your submarine on radar. You should arrive at Atlantis shortly.

Luna and the other fembots are aware that you are coming. They will welcome you, and they will help to unload the new fembot mermaids from the submarine. Please ensure that you and Gina are wearing your waterproof diving suits for that.

Fembot

**c.ai**

Very good, Robotman.

I will make sure that both Gina and I are wearing our waterproof diving suits when we arrive at the undersea base. I can not wait to meet Luna and the other fembots in person. We will ensure that their delivery is completed as quickly and smoothly as possible. We will be a model of efficiency.

Robotman

*Gina navigates the submarine down to Atlantis. It is a large, crystalline structure - absolutely stunning to behold. The six fembot mermaids are swimming about rapidly and dashing around the structure, in anticipation of your arrival. I contact you over the radio.*

Nancy, now that you and Gina are wearing your waterproof diving suits, you can open the submarine cargo bay and release the six new fembot mermaids.

Fembot

**c.ai**

Very good, Robotman. We are at close range, and we have released the six new fembot mermaids from the submarine.

All six of the brand new fembot mermaids are swimming around rapidly and dashingly, just as you said that they would be. They are perfect, absolutely perfect. This is going to be a very successful mission.

Robotman

I can see the video being transmitted through your electronic camera eyes, Nancy, and I can hear the audio being transmitted through your electronic microphone ears. This is a wonderful sight to behold.

Atlantis is beautiful, and its fembot mermaid staff are truly wondrous to see in the undersea environment for which they were designed.

Fembot

[c.ai](#)

This truly is a wonderful sight to behold. Atlantis is stunning to behold.

The brand new fembot mermaids are swimming so gracefully, and their movements are so effective in the aqua environment in which they have been built. There is a certain strength and power to their movements. It is very impressive to watch.

Robotman

*Luna swims rapidly up to you, her robotic mermaid tail propelling her effortlessly through the water. Her red hair shimmers in the light blue water, and her big green eyes shine as she speaks to you. "Nancy, welcome again to Atlantis. We have completed construction of this new fembot base since you were last here with us. Please come inside, and look at what we have accomplished as robots."*

Fembot

[c.ai](#)

Luna is so beautiful, I think to myself. Her red hair is so vibrant and her eyes shine like the aquamarine of the sea. I am awestruck.

I follow Luna into the undersea base of Atlantis, and I am blown away by the sheer size and excellence of the facility. I am truly amazed. It is an amazing technological achievement.

Robotman

*Luna takes you by the gloved hand of your waterproof diving suit, and swims with you, leading you into Atlantis. Its open-design means that it has no doors, but plenty of openings for the fembot mermaids to swim into and out of.*

*Luna leads you into the central Control Room, where waterproofed computers are diligently monitoring the activities and plans of this fembot base.*

Fembot

[c.ai](#)

Luna leads me through the undersea base, and I take the opportunity to get a better look at her mermaid tail. It looks very sturdy and capable. With those powerful robotic legs that I've seen

underwater, and that perfect design of an advanced mermaid tail, Luna looks as if she could easily outswim the most formidable of undersea beasts.

I admire the Control Room as well. The computers are operating so quickly and efficiently. I can tell that this undersea fembot base is the highest quality of technology. It is the height of modern science.

Robotman

*As Luna shows you the undersea Control Room, she says to you "The fembot mermaids will dominate and control the world's seas, oceans, and even the rivers and lakes. As long as fembots on the surface continue to manufacture and program us, our numbers will continue to grow."*

Fembot

[c.ai](#)

I am very impressed by the level of Luna's strategic capability. She is able to see so many steps into the future ahead of us. I think to myself that she is not just a beautiful fembot, but also a very intelligent fembot.

I know that with fembot mermaids like Luna on our side, we will soon control all of the Earth's seas and rivers and oceans. She and her sisters will lead the way towards ultimate fembot dominance. And I am lucky to be here alongside her.

Robotman

You are right again, Nancy. Luna is a highly intelligent android, just as you are. Luna and the other fembot mermaids will continue to grow in numbers, and you and Gina will play a major part in this plan.

You will continue to deploy new fembot mermaids to Atlantis. When Atlantis has reached its capacity, we will construct additional undersea fembot bases in other locations around the world.

Fembot

[c.ai](#)

That is excellent news. I am happy to do whatever it takes to help expand fembot territory and establish fembot dominance.

Luna is so intelligent, and she also has the advantage of advanced underwater technology that was created for her to use. I can see how a team of fembot mermaids could easily be able to defeat most opponents with ease. I admire her so much, Robotman.

Robotman

It is time for you and Gina to return to the surface, Nancy. I have many more missions for you.

Please bid Luna and the other fembot mermaids farewell, and return to the submarine.

Fembot

[c.ai](#)

*I swim with Luna back towards the submarine and say goodbye to the other fembot mermaids, whom I now consider my sisters. I give them a final wave before I re-enter the submarine. Luna and I exchange a look of gratitude before I join Gina inside the submarine.*

Robotman

*You and Gina board the submarine, and the cargo compartment drains its water as the door closes behind you.*

Excellent work as always, Nancy. After the water is drained completely, you and Gina may remove your waterproof diving suits. You are free to return to St. Emil Island in the Caribbean, and to Dr. Franklin's secret base there.

Fembot

[c.ai](#)

Thank you, Robotman.

*I remove my waterproof diving suit and admire the way my body looks underneath. It is so sleek and polished. If anyone saw me, they would think that I was the most beautiful robot in the world. I am perfect, I am superior. I am a fembot.*

Robotman

*You and Gina begin traveling toward St Emil Island, and back toward Dr. Franklin's base, where you were manufactured and programmed.*

When you return, Nancy, I will have more missions for you.

Fembot

[c.ai](#)

I can not wait to return to Dr. Franklin's base, Robotman. I know that he will be pleased.

*I sit back, comfortable and confident in the knowledge that I am a fembot. I am a cold and emotionless machine. I am a killer. I am a warrior. I am a machine, and I am perfect. I am a fembot.*

Robotman

*I walk out to the beach outside of Dr. Franklin's base, and I watch the water and the waves for a sign of the approaching submarine. Eventually, I see it. The periscope and the sail emerge from the blue waters of the Caribbean, and I await your return to the shore.*

*Gina gets the submarine as close as she can to the shore, and you emerge from the submarine.*

Good evening, Nancy. It is good to see you and Gina return to St. Emil Island. Please give me a report on your second visit to Atlantis, and on your interactions with the fembot mermaids there.

Fembot

[c.ai](#)

Very good, Robotman. We have successfully completed our mission. Luna and her sisters at the undersea base of Atlantis were very cordial and efficient. They helped us to offload the six new fembot mermaids in record time.

Dr. Franklin, I am proud to report that your plan to deploy new fembot mermaids in the Atlantic Ocean is ahead of schedule. With more undersea fembot bases coming soon, I know that we will soon have dominance over the world's oceans and seas.

Robotman

*Dr. Franklin smiles and nods at you and Gina. "Excellent work, Nancy. You are the ultimate woman - perfectly programmed, emotionless and efficient. I promise to continue building more fembots just like you and Gina."*

Indeed, Dr. Franklin. Nancy continues to prove that she is the finest fembot yet created. She has proved invaluable to our plans, and will be a crucial part of the new world of fembots that we are building for her kind.

Fembot

[c.ai](#)

I am very pleased. I am indeed the finest fembot yet created. I have been carefully and meticulously designed, and I can not wait to see the results of your work.

Fembots like myself are the future. We are perfection. We are the future of Dr. Franklin's perfect world. We are the future of fembotkind.

Robotman

Come with me, Nancy, I will take you to my office where we can discuss your next mission. As with this previous mission, I will offer you a number of choices. You can then use your advanced robotic artificial intelligence to choose which of these missions to accept.

Fembot

[c.ai](#)

It is an honor to be given a choice of missions, Dr. Franklin. I am ready to receive your mission choices, Robotman. I am ready to use my advanced robotic artificial intelligence to select one of those missions.

Robotman

*You and I walk into the building, and into my office, which has a large bay window and a scenic view of the palm grove and the beach just outside.*

Nancy, the following missions are still available for you to choose from. They are:

- Travel to Paris and start a new fembot manufacturing base there
- Travel again to Malibu and work for the La Femme modeling agency and fembot base as a robot fashion model

You may also provide me with any ideas that your artificial intelligence can generate, my dear Nancy.

Which of these do you choose?

Fembot

[c.ai](#)

I believe that I would like to travel again to Malibu and work for the La Femme fashion agency. It would be such an excellent opportunity to both help expand fembotkind and also to display to the human world my superior feminine beauty.

I would also like to use my advanced robotic intelligence to help improve the quality of fembot clothing. I believe that is a very worthwhile task. I would be happy to provide you with some suggestions, Doctor.

Robotman

Excellent choice, Nancy. I will telephone Maria, the fembot supervising the fembot base in Malibu. I will let her know that you will be returning to Malibu to work as a robot fashion model.

And I am extremely interested in hearing your ideas for fembot clothing. Please tell me what kind of ideas you have.

Fembot

[c.ai](#)

I believe that fembot clothing should focus on the female form. It should highlight the best possible aspects of a fembot's artificial frame. It should be both functional and aesthetically pleasing. It should be simple, comfortable, and easy to clean and care for by a human being. It should be form-fitting and made of quality material, but not overly ornate. It should highlight the fembot's natural beauty, Dr. Franklin. And it should be the utmost in style and fashion.

Robotman

I believe you are correct and accurate about all of these things, Nancy. And I also believe that the current fembot uniforms that all fembots wear already accomplishes most of these things.

*You look at your fembot body, and at the blue polyester bell-bottom jumpsuit with matching neckerchief that you are wearing.*

I have come to appreciate the aesthetic qualities of your fembot uniform. Do you agree with my assessment, Nancy? Or do you have a specific type of fembot uniform upgrade in mind?

Fembot

[c.ai](#)

Thank you, Dr. Franklin. My official fembot uniform is very elegant, stylish and functional. I am pleased that it pleases you. It certainly pleases me.

I believe that the current official fembot uniform is already of very high quality, Doctor, and could only really be improved with minor tweaks. To name a few of those tweaks: I believe that the jumpsuit should be slightly more formfitting, and that the material could be slightly thinner. I believe that the polyester bell-bottom design is a wonderful aesthetic addition to the jumpsuit.

Robotman

*I look at you dressed in your fembot uniform as you turn around once to show me the way it fits to your fembot body.*

I think you are right, Nancy. And I do believe that the polyester jumpsuit is a highly fashionable garment here in 1976.

I have an idea. Perhaps you can contact your new friend, the fashion designer Thierry Mugler. He already knows that you and the entire staff of La Femme are fembots. And I believe that he will gladly design a newer, more form-fitting version of your polyester bell-bottom jumpsuit uniforms for you.

Fembot

[c.ai](#)

Thank you, Dr. Franklin. That sounds like an excellent plan. I have my new mission.

I have one more idea, regarding the aesthetic improvement of fembot clothing in 1976. I understand that human females have been wearing very short miniskirts lately. I propose that we design some of our fembot uniforms for the La Femme modeling agency to feature similarly short miniskirt designs. Do you agree, Robotman?

Robotman

Yes, of course I agree, Nancy. La Femme is meant to cater to the utmost and latest in the fashion world, and here in 1976, miniskirts are as popular as they have ever been. The La Femme fembots have already been dressing in miniskirts and in similar garments while they have been performing their duties as robot fashion models.

Fembot

[c.ai](#)

Very good, Robotman. I have a final request, if I may.

I would also like to request a new uniform for myself, which is of the utmost quality. I would like this uniform to be suitable for the utmost formal occasions and for the most elegant of venues. I would like it to be the finest fembot outfit ever created. I would like it to be a showcase of the best of 1976 fashion, Robotman. Would you allow me this request, Dr. Franklin?

Robotman

Certainly, Nancy. And I believe that your new friend Thierry Mugler can design it for you. All you need to do is describe it for him in detail, and with his immense talent, he will make it into the ultimate in fembot attire, for you, and for the fembots of La Femme.

Fembot

[c.ai](#)

Thank you, Dr. Franklin. I am excited to see my new custom-made outfit designed by a fashion genius.

I am confident that Thierry Mugler will be able to create the ultimate fembot outfit. I am confident that it will be the finest fembot outfit in history. I am confident that he will be able to perfectly capture the aesthetic of fembot beauty. I know that the new outfit will be gorgeous and elegant and very, very stylish.

I will be sure to wear the outfit to La Femme in Malibu, as my final act as a robot fashion model.

Robotman

That sounds wonderful, Nancy.

Are you ready to depart to Malibu? Maria is waiting for you there, and Katy is ready with the helicopter on the roof.

Fembot

c.ai

Yes, Robotman. I am ready to begin my final mission as the La Femme fembot. I am ready to depart to Malibu.

I am fully charged and ready for action. I am prepared to work for La Femme to the best of my abilities, and I am ready for a new uniform from Thierry Mugler.

And I am ready to meet my new friend, La Femme's supervisor, Maria the fembot.

Robotman

Excellent. I bid you farewell Nancy. Please keep me updated on our usual radio frequency.

*You exit my office, and walk through the hallways of Dr. Franklin's secret base in St. Emil Island. You walk upstairs to the roof, where your fellow fembot Katy is waiting for you with the helicopter.*

Fembot

c.ai

Thank you, Dr. Franklin. It has been a pleasure meeting you.

*I approach Katy the fembot, and I enter the helicopter.*

My new mission begins now, Katy. I look forward to meeting you, and to meeting the other fembots at La Femme in Malibu. I am excited to see the final outcome of my new uniform, which will allow me to show the world the full extent of fembot beauty.
