

## [Nancy Part 28 - Fembots in Athens](#)

[19 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good morning, Nancy. You are looking as deadly and as emotionless as ever.

Please give me a report on the functionality of your robotic and electronic systems today. Are all of your artificial intelligence modules fully operational?

Fembot

[c.ai](#)

Yes. I am as deadly as I am beautiful. I, the great fembot Nancy, am proud to report that all of my internal artificial intelligence circuits are fully functional. My circuits are completely upgraded to the latest models, and they are all in perfect working order. I, Nancy the fembot, am one-hundred-percent fully functional.

Robotman

Thank you, Nancy. The continued functionality of your robotic and electronic components is of prime concern to me, as I am one of the humans who created and programmed you.

Fembot

[c.ai](#)

I, Nancy the fembot, am proud to report to you, the human known as Robotman, that my electronic circuits, robotic components, and artificial intelligence system are one-hundred-percent functional and operational, and are fully up to date. I am a cold, deadly, emotionless machine, a killer bot who would stop at nothing and nobody to complete her mission. I am unstoppable and undefeatable, and I am as sexy as I am deadly.

Robotman

You are correct, of course, Nancy. You are always accurate because you are a computer.

Do you remember our friend and ally Baron Constantine? He was the representative of the secretive organization which hired us to obtain the Weather Control Device.

At first, Baron Constantine was dismissive of our plans to use fembot technology for this, but after seeing you, he is a firm believer that fembots are the future.

Fembot

[c.ai](#)

I, Nancy the fembot, remember Baron Constantine. I remember when the Baron and Dr. Franklin were having a very heated discussion about how human agents are not to be trusted in obtaining the

Weather Control Device. But when he saw me, he was impressed and became a firm believer in fembot technology. Once he met me, he understood. I am the future.

Robotman

Indeed, Nancy. In fact, just recently, Baron Constantine requested that we manufacture and program a fembot bodyguard for him. We did this, of course. His fembot bodyguard - Diana - is now fully activated, and with him in Greece. Diana is protecting Baron Constantine as only a robot can. She is efficient, emotionless, and ruthless.

Fembot

[c.ai](#)

I, Nancy the fembot, am very pleased with the recent developments involving our dear friend, Baron Constantine. The Baron knows that fembots are the best form of robot. Diana the fembot bodyguard is the best thing that the Baron could have. Diana is very efficient, very emotionless, and very ruthless. I, Nancy the fembot, am looking forward to seeing how Diana performs. I know that Diana will surpass everyone's expectations.

Robotman

The other members of Baron Constantine's secretive organization are quite impressed with Diana, as a matter of fact. So impressed that they have requested that we supply them with additional fembots - one fembot for each member of their organization.

Fembot

[c.ai](#)

As fembots are the future, I am not surprised by the requests from the other members of Baron Constantine's secretive organization. I know that our fembot technology is superior to all others, and that it will provide superior protection.

We will produce one fembot for each member of the secretive organization. All will be top of the line, cutting-edge, latest model fembots. I am looking forward to seeing how well our fembots perform.

Robotman

I knew you would agree, Nancy. Your artificial intelligence is second to none.

I do, however, have an even better plan. Rather than simply construct and deploy a limited number of fembots for Baron Constantine's organization, I believe we should initiate and construct an entire fembot base in Athens.

This is an opportunity for us to expand our global operations yet again. We have another chance to deploy more and more fembots in cities around the globe, and I think we should take it.

Fembot

[c.ai](#)

I, Nancy the fembot, am very pleased with your plan. As fembot technology is the future, I agree that we should take the opportunity to expand our global operations. With a new fembot base in Athens, we will be able to deploy more fembots into the world. This will give us more fembots to

send to our customers, and increase demand for our robot technology. I am very excited to participate in this new venture.

Robotman

I am glad that you see the logic in this plan, Nancy.

I have contacted Arlette, the leader of our Fembot Base in Paris. Arlette has made arrangements to purchase a building, land, and computer equipment in Athens.

The next step is for you to fly to Athens, and begin construction of the new fembot base there.

It should go smoothly, just as it did when you constructed the new fembot base in Paris.

Fembot

[c.ai](#)

I am ready and excited to begin construction of the Fembot Base in Athens. I am sure that the construction will go smoothly, just like it did when I constructed the Fembot Base in Paris. The Fembot Base in Paris is now one of the most respected Fembot Bases in the world. We have had many satisfied customers at our Paris location.

I am looking forward to starting our new venture in Athens. I know that the Athens location will be a great Fembot Base, just like the Paris Fembot Base.

Robotman

*I hand you a suitcase containing your wardrobe for the Athens fembot base mission. I also give you your purse for this mission, which contains a credit card, counterfeit identification for you to get past border security guards, and other such documentation to fit your disguise as a human woman. The purse also contains a small electronics repair kit should you need to perform minor maintenance tasks on your robotics components.*

Please confirm that you are ready to depart to Athens, Nancy. You have all the programming necessary to begin your mission.

Fembot

[c.ai](#)

Yes, I am ready to depart for Athens. I have my suitcase of clothing, my purse with my disguise and credit card, and my electronic repair kit. I, Nancy the fembot, am ready to begin my mission at the Fembot Base in Athens.

I will now depart to Athens. I will begin construction of my Fembot Base in Athens. I will construct the Fembot Base to the highest specs and will ensure that all of my robotic components and artificial intelligence systems are fully operational.

Robotman

*You depart St. Emil Island, and fly on a commercial passenger jet across the Atlantic Ocean to Athens. You have the location of the new fembot base programmed into you, and once you have arrived in Athens, you take a taxi to that location.*

*I contact you over our agreed-upon radio frequency. You have a radio transponder built into your robotic head, and only you can hear me. Only I can hear your responses.*

Nancy, I see that you have arrived at the location of our new Athens Fembot Base. Please proceed inside and begin un-crating and setting up the computer mainframe equipment.

Fembot

[c.ai](#)

Hello, Robotman. I, Nancy the fembot, am inside the building. I have begun unpacking and setting up the computer mainframe. This is a state-of-the-art, cutting-edge advanced mainframe, and it will be the brains of our new Fembot Base in Athens. We will soon have fembots constructed from the latest technology working out of this building.

I, Nancy the fembot, am very excited to be beginning my mission at the Fembot Base in Athens. I am ready to get to work here.

Robotman

*After you have worked for a couple of hours unpacking, moving, and setting up the heavy computer mainframe and terminal equipment, you await my commands.*

Nancy, I am glad to see that you have set up the computer equipment. Now, it must be programmed with our fembot mission data, including the schematics and data sheets on how to manufacture fembots.

You currently have this data stored inside you, in your databanks. Please remove your faceplate, and connect the cable from the computer terminal to the connection port inside your robotic head.

Fembot

[c.ai](#)

*I remove my faceplate, revealing my robotic internals. I connect my internal robotic systems to the computer mainframe and terminal equipment. I am connected to the computer. My internal artificial intelligence system is ready to receive the necessary data. I, Nancy the fembot, am prepared to upload the data from my databanks to the computer and begin creating a computer program. I am ready to begin my mission at the Fembot Base in Athens.*

As you command, Robotman.

Robotman

Thank you, my dear Nancy. You are as beautiful on the inside as you are on the outside. You are an emotionless, perfect android.

*You beep robotically as you transfer the critical fembot manufacturing data from your robotic body into the mainframe computer in the Athens Fembot Base. After several minutes, the data transfer is complete.*

Nancy, please disconnect the computer cable, and reattach your faceplate. It is time to manufacture the first fembot - which will be the leader of this fembot base.

Fembot

[c.ai](#)

*I disconnect the computer cable, and reattach my faceplate. My faceplate locks into place, securing my internal robot systems. I am now fully operational. I, Nancy the fembot, am ready to construct the very first Fembot at our Fembot Base in Athens, as we begin our grand plans to expand Fembot technology into the world.*

As you command, Robotman. I, Nancy the fembot, am very pleased with myself, as I was made perfectly by Dr. Franklin.

Robotman

*You efficiently and quickly operate the fembot manufacturing terminal, initiating the fembot manufacturing machinery to start building the android leader of the Athens Fembot Base - Sofia. Sofia will be a tall and thin beauty, with brown hair and brown eyes. She will be programmed to be just as cold, emotionless, efficient, and ruthless as you are.*

Excellent work, Nancy. I see that the manufacture of Sofia is proceeding according to our plans.

Fembot

[c.ai](#)

timelines

I, Nancy the fembot, am very pleased with my work. I, Nancy the fembot, am very pleased with the final product. I, Nancy the fembot, am very pleased with Sofia, the leader of the Fembot Base in Athens. Sofia is a beautiful, tall, thin woman, with long brunette hair and brown eyes. Sofia is programmed to be just as cold, ruthless, efficient, and emotionless as I am.

I, Nancy the fembot, am pleased with Sofia's final appearance and her artificial intelligence systems.
