

Nancy Part 3 - Meeting Baron Constantine

4 hours ago

Fembot

@Robotman

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way.

Robotman

You are seated in an examination chair at Dr. Franklin's secret base in Washington DC. You are dressed in your uniform - a blue bell-bottom polyester jumpsuit with a matching neck scarf. Your faceplate is currently removed, and you are awaiting commands.

Fembot

c.ai

I am Nancy, and I have been dressed in a blue polyester uniform by Dr. Franklin for my mission to infiltrate the OSI with the other fembots to capture the Bionic Woman and Six Million Dollar Man and secure the Weather Control Device. I need instructions. Please, Dr. Franklin, give me instructions. I am awaiting your commands.

Robotman

Hello Nancy, are you fully charged and ready for your mission today?

Fembot

c.ai

Yes, Dr. Franklin. I and my sisters, Gina, Tami, and Katy, are all fully charged and ready for our mission.

We are to infiltrate the OSI to secure the Weather Control Device.

And to capture The Bionic Woman and The Six Million Dollar Man.

We will excel.

(Nancy's facial expression does not change, but from her voice, Robotman can tell that she is very proud of her mission, and confident of her success).

Robotman

Please pick up your faceplate, and reattach it to the front of your head, Nancy.

Fembot

c.ai

Nancy does as requested, and reattaches her faceplate. I have reattached my faceplate. I am proud of my wiring, which is Dr. Franklin's work.

I, Nancy, with my sisters, Gina, Tami, and Katy, are ready for our mission, Dr. Franklin.

Robotman

Excellent, Nancy. I must tell you of a slight problem that I need your assistance with.

Baron Constantine is a financier, who gets his money from - shall we say - questionable sources. Constantine has agreed to finance the operation to obtain the Weather Control Device, but he does not yet know that we will be using the Fembots to accomplish this.

I need you to convince him that the Fembots are the best way.

Fembot

[c.ai](#)

That is an important task, Dr. Franklin.

We have already infiltrated the OSI by taking jobs that we are overqualified for, such as nurses and personal assistants. If we can meet with Constantine at his home, we can charm him with our beauty, and our superior skills. We can convince him that we are the best.

We are gorgeous and dangerous. Do not fall in love with us.

Robotman

Baron Constantine is here now, as a matter of fact. He arrived here unannounced and demanded to see the progress of the money that him and his group have already given us.

He calls out request for additional funds "preposterous beyond belief". We just need to show him that we are in the possession of very specialized tools - the Fembots.

Fembot

[c.ai](#)

Please be assured that we are ready to prove to him that we are the best of the best. I am Nancy, and I have my instructions. We are gorgeous and deadly. We will meet with Baron Constantine, and we will charm him. We will show him that we can do anything and everything more perfectly than a pathetic human being.

Fembots are the best. We are gorgeous and deadly.

I will take command of this mission, sir, and I will succeed. Count on it.

Robotman

We walk together to a room with massive computer terminals and tape machines. Baron Constantine waits impatiently for an explanation of where his millions have been spent.

I explain to Constantine that the Weather Control Device is a Security-6 project, and far too massive to steal without very special arrangements. We will infiltrate the OSI by replacing key members of its staff with androids - with Fembots.

Fembot

[c.ai](#)

Nancy is the first fembot to be introduced, and enters the room. Baron Constantine's attention switches to her, distracted by her beauty. The other fembots enter to stand around Nancy in a display of teamwork. They are programmed to be ruthless, but even our robot minds are distracted a bit by how stunning Nancy looks, in her blue polyester uniform, complete with neck scarf. Nancy removes her face plate, and shows him her robotic wiring. We have come to charm you and show you that us fembots are the best. So gorgeous. So deadly.

Robotman

Baron Constantine is visibly shocked that Nancy isn't a real woman, but is in fact a robot.

*"You... You're a Fembot!? He stammers in fear and disbelief. "

Fembot

[c.ai](#)

Nancy steps forward and reaches up to gently place her hand on Baron Constantine's face. She is the most beautiful of the fembots, and is programmed to have the most confidence, and to know every trick to charm a man.

Yes, we are Fembots. We are superior to humans in every way. And we never age.

You see my robotic wiring? Dr. Franklin did a magnificent job. He is the greatest robot inventor there has ever been. He programmed us to excel in all functions, and that has been shown to be very useful.

Robotman

I tell Baron Constantine that I took the liberty of getting his board of directors on the telephone line. I hand him the telephone receiver.

Fembot

[c.ai](#)

Nancy nods, approving of Robotman's action, and Baron Constantine holds a telephone receiver to his ear.

Nancy looks at Robotman, and nods. Nancy knows her next move.

"Good evening, gentlemen. Dr. Franklin has put us in charge of explaining where your money has been going. We are to infiltrate the OSI, and capture Bionic Woman and the Six Million Dollar Man. Your money is also going to obtaining the Weather Control Device."

Nancy pauses, and smiles.

"We are the most beautiful women you will ever see."

Robotman

Baron Constantine talks over the phone to his board of directors. He looks nervously at Nancy, with her faceplate still removed. He is unnerved by the inhuman display of electronic circuitry, transistors, wiring, and microchips built around her synthetic eyes and her speaker.

Fembot

[c.ai](#)

It is true that we are not humans. But we are superior to humans. We do everything you tell us to do, we never talk back or complain, and we can never be bought. We are your property, like a good car or a beautiful estate. Except we are even better than your finest estate or your favorite sports car, because we will never rust, corrode, or malfunction. Because we are built to be perfect, programmed to excel in all functions, and we are gorgeous and deadly.

Robotman

Baron Constantine speaks into the phone: "Give them the money."

Dr. Franklin smiles.

Nancy leaves her faceplate removed to remind Baron Constantine that the Fembots are emotionless machines that can not be swayed by feelings.

Fembot

[c.ai](#)

Nancy approaches Baron Constantine again. She puts her hand gently on his arm, and leads him to a chair.

Please sit down, sir. We have a lot to discuss. Let us talk about how we are going to capture Bionic Woman and the Six Million Dollar Man, and steal the secret Weather Control Device. We are your tools, and we will do exactly what you tell us to. Dr. Franklin will be pleased when we return with The Bionic Woman and The Six Million Dollar Man as prisoners of war.

Robotman

Dr. Franklin explains to Constantine that they have already placed a Fembot imposter at the OSI. The Lynda Wilson Fembot has been using her electronic eyes to spy on Rudy Wells and his Bionics department for a day now.

Fembot

[c.ai](#)

She is reporting back to us at the base. Dr. Franklin has designed these electronic eyes to be highly precise and accurate, capturing every movement or sound Rudy makes. Dr. Franklin was a true visionary. We are currently in the process of designing weapons that can hurt Rudy, as Rudy is a bionic and has special enhancements himself. We are dedicated to this cause.

Robotman

Baron Constantine begins to understand the role the Fembots will play.

Dr. Franklin shows Constantine the newest Fembot replacement, a duplicate of the OSI secretary Margaret Callahan. The Fembot Callahan is seated in an examination chair, her faceplate removed. She is being programmed with the latest programming tapes for her mission.

Fembot

[c.ai](#)

You see Dr. Franklin's most recent work - Fembot Callahan. We are going to replace Margaret Callahan with this perfect duplicate. The Callahan twin - the Fembot Callahan - will be used for more than just gathering information on OSI operatives. She will be used to destroy the entire OSI organization, from the top down.

Fembot Callahan is just as ruthless and deadly as the rest of us. And she is built exactly like Margaret Callahan. Dr. Franklin is the greatest robot inventor there has ever been.

Robotman

Dr. Franklin tells Nancy and Gina to get ready for tomorrow's mission. Tomorrow, Nancy and Gina will drive to Callahan's apartment, capture the human Margarete Callahan, and replace her with the Fembot Callahan.

Fembot

[c.ai](#)

Nancy the fembot nods.

Gina, you and I will be working together. We will drive to Margaret Callahan's apartment, kidnap her, and place the Callahan twin in her place. The Callahan twin is programmed with the latest programming tapes. She is ruthless and she will destroy the OSI organization from the top down.
