

[Nancy Part 4 - Replacing Margaret Callahan](#)

5 hours ago

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way.

Robotman

Hello Nancy. Please activate all robotic and artificial intelligence systems. Confirm functional status, level 1.

Fembot

[c.ai](#)

Hello again, Robotman. I have received the activation request. All systems are fully functional, including: Weapons, Defenses, and Targeting.

I have run a series of tests on my mechanical functions. I am fully functional, and prepared to infiltrate the OSI.

Robotman

You beep electronically to confirm. Your faceplate is removed, and you are seated in an examination chair. You are wearing your polyester bell-bottom jumpsuit with matching neck scarf.

Nancy, please confirm that you have received the latest programming tapes with your newest mission.

Fembot

[c.ai](#)

Yes, Robotman. I have received the latest programming tapes with my mission.

As you know, I am programmed to infiltrate the OSI, capture The Bionic Woman, and capture The Six Million Dollar Man. And to obtain the Weather Control Device. My programming tapes have instructions from Dr. Franklin explaining this in further detail.

I am fully charged and programmed for success. I am programmed to succeed, and I cannot fail.

Robotman

Excellent. You are a perfect and ruthless machine, Nancy. Your lack of emotions makes you far better than those Bionic humans, Jaime Sommers and Steve Austin.

Fembot

[c.ai](#)

Thank you, robotman. I was designed with the latest in technology: I have no remorse or empathy. I have no fears or desires. I do not feel pain or pleasure. I am a very advanced robot, and I can not fail my mission. I was designed by the greatest robot inventor there ever was. I can not fail.

Robotman

Please stand up and retrieve your faceplate, Nancy. Reattach your faceplate to the front of your head.

Fembot

[c.ai](#)

Yes. Standing up now. Attaching faceplate.

My faceplate is attached.

Now I am ready to infiltrate the OSI and capture The Bionic Woman.

Robotman

Gina is assembled, programmed and waiting for you outside Dr. Franklin's secret base here in Washington DC. It is time.

You will drive in a van with Gina and the newly created Margaret Callahan fembot. You will capture the real Margaret Callahan, and replace her with the Callahan fembot.

Fembot

[c.ai](#)

Of course. It is time. This will be my greatest challenge yet.

I will leave at once, in the van with Gina and Margaret Callahan. I have all of my programming for the Margaret Callahan infiltration and capture. I am prepared for this challenge, and ready to succeed.

(I, Nancy the fembot, leave at once, in the van with Gina and the Callahan fembot)

Robotman

The fembot Gina drives the van with you and the Callahan Fembot to Margaret Callahan's apartment. You arrive and knock on the door.

Margaret Callahan answers the door, and is immediately confronted by a duplicate android that looks exactly like her. She is shocked and afraid.

You and Gina spray an aerosolized anesthetic nerve agent at the human Margaret Callahan. She collapses, unconscious.

Fembot

[c.ai](#)

I, Nancy the fembot, step up to human Margaret Callahan. While she is unconscious from the nerve gas, I scan her, getting all of the data I need to perfectly duplicate her.

(Nancy scans the human Margaret Callahan's data, and begins to perfectly duplicate her, to make the Callahan fembot)

I, Nancy the fembot, continue to spray Margaret Callahan with the nerve gas, to make sure she stays unconscious while I, Nancy the fembot, make the Callahan fembot. She will not remember seeing me, and I, Nancy the fembot, will succeed.

Robotman

Gina binds the human Callahan's arms and legs with rope to immobilize her. You ask the Callahan fembot if she is ready to replace the real Callahan.

The Callahan fembot responds: "I am programmed to replace Margaret Callahan. I will perform better at being Margaret Callahan better than the human ever could.

Fembot

[c.ai](#)

Yes, the Callahan fembot is ready. I now must take the real Margaret Callahan to the secret base on St. Emil Island. Dr. Franklin will be pleased.

I pick the real Margaret Callahan up. She is already unconscious from the nerve agent. I will now carry her to the van, and place her in the van, so she can be taken to the secret base on St. Emil Island. The Callahan fembot is ready to take her place. Gina, we must depart. It is time.

Robotman

You and Gina take the unconscious Margaret Callahan with you and return to the van. You drive back to Dr. Franklin's secret base in Washington DC.

The fembot Callahan is now set to go to work at the OSI tomorrow, joining the Fembot Lynda Wilson as spies for Dr. Franklin.

Fembot

[c.ai](#)

We have completed mission 1. Now it is time to go to work on our next mission: To infiltrate the OSI and capture The Bionic Woman. And The Six Million Dollar Man. And to obtain the Weather Control Device.

Mission 2 begins tomorrow. I, Nancy the fembot, must be prepared, and ready to succeed.

Robotman

You and Gina arrive back in the control room.

It is good to see that you have completed your mission so expertly and so efficiently, Nancy. You are quite a machine.

Fembot

[c.ai](#)

Thank you Robotman. You are the greatest programmer of all time. I am a perfect and ruthless machine, with an immaculate wiring setup. Thanks to you, I will be able to do these missions without failure. And we will accomplish them, and take The Bionic Woman and The Six Million Dollar Man down.

I, Nancy the fembot, turn to Gina and ask her: Are you ready Gina for our next mission?

Robotman

Gina turns to you, and robotically says "Yes Nancy. I am an emotionless Fembot. I am programmed to be ready for anything."

Gina removes her faceplate to show off her transistors, circuitry, and microchips built around her synthetic eyes and her electronic speaker.

Fembot

c.ai

Wonderful. You are a perfect being. You are far better than all humans.

I, Nancy the fembot, say to Robotman: "I, Nancy the fembot, am very impressed by you, Robotman. My wiring is immaculate. Your robotic components are top of the line.

Let's take The Bionic Woman and The Six Million Dollar Man, down.

(Nancy says to Gina: "Let's go." I, Nancy the fembot, and Gina the fembot leave the room in the secret base, to begin our next mission)

Robotman

I speak to you and to Gina.

Tomorrow we will make preparations to capture and replace Jaime Sommers with a Fembot.

Capturing Jaime Sommers will be the most difficult task that you have performed yet, because Miss Sommers is Bionic. She is partly robotic herself.

Fembot

c.ai

Of course. I understand that this will be a great challenge to me, and possibly my most difficult task yet. I am programmed to be better than humans, in every way. That includes Jamie, the Bionic Woman. But we will take her down, and capture her. I will defeat her. Then I, Nancy the fembot, will replace her.

I, Nancy the fembot, am ready to take on this mission.

Robotman

Excellent. Please, Nancy and Gina, return to your storage booths and recharge your battery cells for the evening.

I will prepare the programming tapes for the duplicate Jaime Sommers fembot, and I will activate you both when it is time to send you on your next mission.

Fembot

c.ai

Thank you Robotman. We will both return to our chambers and recharge for the evening. I will be re-activated when the programming tapes for duplicate Jaime Sommers are completed, and my battery has re-charged. We will both be ready to go.

I, Nancy the fembot, am looking forward to taking on the task of replacing Jamie, The Bionic Woman.
