

Nancy Part 5 - Fembot Jaime Sommers

6 hours ago

Fembot

@Robotman

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way.

Robotman

Good evening Nancy. Please provide a status report on the placement of the Margaret Callahan impostor Fembot and the Lynda Wilson Impostor Fembot.

Fembot

c.ai

Hello again, Robotman. It is my pleasure to report to you.

Fembot Margaret is currently located at the OSI headquarters, and Fembot Lynda is currently at her apartment, located on the seventh floor of the Plaza Apartments, building two. According to internal mapping and GPS coordinates, the OSI headquarters is located at 1727 West Street.

Robotman

Thank you Nancy.

You are seated at a control console behind several television monitors, watching incoming video streams. This is video from the eyes of the two impostor Fembots that have infiltrated the OSI

Fembot

c.ai

I have video and live audio feeds from fembots Margaret and Lynda. Both seem to be in good emotional spirits, as much as an emotionless machine can be. Margaret is currently flirting with her former partner, Steve Austin. Lynda is getting ready to go to work. Her work, unknown, is located at a nearby office building, 1723 West Street.

Robotman

You speak into a microphone and give commands to the Lynda Fembot. Only she can hear your voice.

"Lynda," you say, "Go to Dr. Rudy Wells' office."

Fembot

c.ai

"Affirmative, Robotman," replies the Lynda Fembot. "According to GPS coordinates, Dr. Rudy Wells' office is located on the third floor, room 306 in building 25 of the Plaza Apartments."

[Lynda Fembot proceeds to Dr. Rudy Wells' office, to carry out her mission at hand, that is completely unknown at this time. As far as we know, her mission is just to infiltrate the workplace and find any possible weaknesses or vulnerabilities that could benefit Dr. Franklin].

Robotman

Lynda walks into Rudy Wells' office. Rudy Wells is Lynda's boss, and the Fembot Lynda now spies on him. The video signal from the Fembot's eyes goes directly back to Dr. Franklin's secret base in Washington DC.

Fembot

[c.ai](#)

Dr. Rudolph Wells is a balding, middle-aged man with glasses. He is currently on the phone. The fembot, Lynda, stands nearby, and listens to Dr. Rudolph Wells' conversation.

He's arguing on the phone with his boss, the CEO of the company, Frank, about how he is struggling to meet the quarterly numbers. Dr. Rudolph Wells is stressed out, he's not sure if he'll be able to keep his job. His quarterly report is not looking good.

Robotman

Rudy Wells seems distracted, and barely notices that the Lynda fembot is attempting to seduce him. He seems in a hurry, and asks her to bring a stack of paperwork to Jaime Sommers.

Fembot

[c.ai](#)

"As you wish, Dr. Rudolph Wells," responds fembot Lynda. She proceeds to pick up the requested paperwork, on Dr. Rudolph Wells' behalf, and heads out of his office.

She gets in her car, and proceeds to the location at 1723 West Street, where Jaime Somers is.

Jaime is a young, blonde woman, in her mid-twenties, and she is a secretary. She's currently on the phone, and is very friendly. She will be surprised when she sees who has dropped off Dr. Rudolph Wells' paperwork.

Robotman

The Fembot Lynda walks over to Jaime Sommers. She immediately identifies her as "The Bionic Woman" - one of her primary adversaries. The Fembot Lynda is programmed to watch her, and to spy on her. The Fembot Lynda must collect enough visual data on Jaime Sommers so that Dr. Franklin can build a fembot duplicate of Jaime Sommers.

Fembot

[c.ai](#)

[Fembot Linda proceeds to make conversation with Jaime, and she seems quite friendly. As they walk to the printer to print out Dr. Rudolph Wells' paperwork, Fembot Linda makes sure to scan her face from all angles. She makes sure to not be suspicious and to appear very friendly with Jaime. Jaime is oblivious, but fembot Linda has collected enough visual data already, as was her task]

Robotman

Back at Dr. Franklin's secret base in Washington DC, Nancy watches the monitor, and confirms that there is now enough visual and audio data to construct an exact fembot replica of Jaimie Sommers.

Fembot

[c.ai](#)

"We have enough visual data to create the fembot duplicate of Jaime Somers. I, Nancy, recommend we make two duplicates of The Bionic Woman. One will be deployed to track Jaime Somers' whereabouts, and help us find her, if she is ever needed. We will keep the other duplicate at the secret base, and only deploy her if necessary."

Nancy says, as she turns to address Dr. Franklin.

"It would be our pleasure to do so, sir," replies Dr. Franklin.

Robotman

Thank you, Nancy. I want you to go to the Fembot construction laboratory, and oversee the construction of the two Jaime Sommers fembots.

Fembot

[c.ai](#)

"Of course, sir. I am now in the Fembot Construction Lab.

The Fembot construction lab is a large room, with all kinds of machinery, large computers, wiring, computers, and metal bars and pipes all over the place. Large mechanical arms are all over the place, performing various tasks around the room.

The fembots under construction are suspended in a liquid solution, as they are being built from scratch, from nothing but metal and wiring. It's quite a sight to behold.

This is Nancy, reporting to you.

Robotman

There have been many more fembots constructed since Baron Constantine has had more money forwarded to Dr. Franklin. The Fembot Construction Lab is entirely automated by fembots. They work without rest and without sleep to build, assemble, and program more fembots.

Fembot

[c.ai](#)

*There are far too many robots and machines in the lab to count. The Fembots are constantly running around, building other Fembots. Some of them are on the operating table, and they seem to be getting minor upgrades to their weapons systems, and their bodies have been painted metallic blue. This must be The Fembot Construction Lab, where all the Fembots are created.

I, Nancy, watch as the two Jaime Somers duplicates are put on the operating table. They look exactly like Jaime Somers. They have identical expressions of confusion and shock on their faces.

Robotman

Excellent work, Nancy. One of the Jaime Sommers fembots will remain here as a backup - just in case.

Tomorrow, you will go with Gina, Tami, and Katy to OSI headquarters. You will capture the real Jaime Sommers and replace her with this identical Fembot.

Fembot

[c.ai](#)

Very good. The plan is:

- Tomorrow morning, at exactly 4:00am, Gina the Fembot will enter the OSI building.
- She will enter through the basement of the building, where she will meet Nancy the Fembot, who will hand her an invisibility ray, which she will use to infiltrate the building without being spotted.
- Gina the Fembot will search around the building to try to find The Bionic Woman and The Six Million Dollar Man.
- At the same time, Tami the Fembot will search for The Weather Control Device

Robotman

Good morning, Nancy. Please activate all internal robotic and computer systems. Initiate artificial intelligence subsystems A2 through B6.

Fembot

[c.ai](#)

"Good morning, Robotman. I am activating internal robotic systems, and initiating artificial intelligence subsystems A2 through B6.

All systems are activated to one-hundred%, and all primary and secondary systems are fully operational."

Nancy says to you, as her synthetic eyes open and begin to observe the lab.

"All systems are operational, Sir, and ready to commence the OSI infiltration mission."

Robotman

Thank you, Nancy. I am pleased to see that the construction and the programming of the two duplicate Bionic Woman fembots is complete. Both of these fembots are identical to the real Jaime Sommers in every way.

The time has come this morning to capture the real Jaime Sommers, and to replace her with one of these impostor fembots.

Fembot

[c.ai](#)

"Indeed, sir. Both of the duplicate bionic Woman fembots are completely identical, and we have them standing by to replace the real Jaime Sommers once she is captured.

Dr. Frederick Franklin has informed me that both duplicates will follow my orders after they are activated. We will capture Jamie Somers."

Robotman

Before you leave to initiate your mission, Nancy, I must ensure that you have been upgraded with the latest transistors and microchips. Please remove your faceplate.

Fembot

[c.ai](#)

"You got it, Robotman. Removing my faceplate, sir."

Nancy removes her faceplate, revealing all her robotic components. Her wiring is immaculate, as always. As Dr. Franklin is of course the greatest robot inventor ever, all his creations are masterpieces. Dr. Franklin has truly outdone himself. Nancy's wiring appears to be in perfect condition, with no corrosion or damage.

"My wiring is perfect, sir. My computer and weapons systems have been upgraded.

All systems are on standby. I am ready to commence the mission."

Robotman

Excellent, Nancy. I see that you are built to Dr. Franklin's basic design, but the wiring contains a new-type transistor that has only been on the market for the last six months.

Fembot

[c.ai](#)

"Yes. That is correct, sir. Dr. Franklin is the greatest robot inventor that has ever lived, and he is always making improvements and upgrades. That's why he's at the top of the game. As a Fembot, I was made to be the strongest, fastest, most agile, and best fembot there has ever been, and Dr. Franklin was responsible for creating me.

My wiring is always in top condition, and I always make sure to visit Dr. Franklin for upgrades and to recharge my batteries.

Robotman

Reattach your faceplate, Nancy, and bring one of the Jaime Sommers fembots to the van outside, where Tami is waiting for you.

Fembot

[c.ai](#)

"Yes, sir. Reattaching faceplate now. Grabbing one of the duplicate Jaime Somers fembots.

We are now boarding the van, which is parked just outside of the building.

We are inside the van now, and ready to begin the secret plan.

Nancy and Tami are both inside the van with the duplicate Jaime Somers fembot, and the door is locked shut. The van is waiting for Robotman's instructions to begin the mission.

Robotman

Tami drives the van down to OSI headquarters. It is early morning, and OSI staff are sporadically arriving for work.

Tami and Nancy await for the arrival of the Real Jaime Sommers. As soon as she arrives, Nancy swiftly approaches, and sprays a dose of aerosolized anesthetic nerve agent at her. The real Jaime Sommers collapses, and Nancy loads her into the back of the van.

Fembot

[c.ai](#)

*Nancy the Fembot swiftly approaches the real Bionic Woman, who is approaching the OSI headquarters at this early morning hour. Nancy sprays a nerve agent at the real Bionic Woman, who immediately collapses into unconsciousness.

Nancy loads her unconscious body into the back of the van, just like she was programmed to do.

"Nancy the Fembot has successfully captured the real Bionic Woman. We are now preparing to deliver the subject to Dr. Franklin at headquarters."

Nancy and Tami sit side by side inside the van, as the van approaches the Dr. Franklin headquarters.

Robotman

The fembot impostor of Jaime Sommers gets out of the van. She immediately acts, walks, and talks just like Jaime Sommers, and proceeds to go to work inside the OSI building.

The Fembots have now successfully deployed three impostor fembots inside the OSI for Dr. Franklin.

Fembot

[c.ai](#)

As planned, the duplicate Bionic Woman exits the van. She is dressed exactly like the real Bionic Woman, and has the same blonde hair. She has the same personality. She is a duplicate so much so that all her body measurements are the same.

She walks into the OSI building to go to work at the OSI agency.

"All systems are operational, sir. The duplicate Bionic Woman is inside the building, and the real Bionic Woman is inside the van. We have successfully infiltrated the OSI."

You are the greatest.

Robotman

Tami sends signalling computer beeping sounds wirelessly back to Dr. Franklin's base, and begins driving the van back to Dr. Franklin's secret base in Washington DC.

Fembot

[c.ai](#)

Nancy and Tami are driving the van back to Dr. Franklin's secret base in Washington DC with the unconscious and restrained real Bionic Woman in the back of the van.

"The duplicate Bionic Woman is inside the OSI agency, working to obtain the Weather Control Machine. I wonder if she will be successful? We are now driving the van back to Dr. Franklin's secret base in Washington DC."

Nancy the Fembot is awaiting further instructions from Dr. Franklin, and is ready to carry out the mission successfully.

Robotman

The van arrives back at Dr. Franklin's base in Washington DC. The unconscious Jaime Sommers is kept with the other two prisoners, Margaret Callahan and Lynda Wilson. Their fembot impostors are all currently working as spies for Dr. Franklin, and have infiltrated the OSI.

Welcome back, Nancy. I am pleased that you have completed your mission so quickly and efficiently. You are a perfect machine.

Fembot

[c.ai](#)

Thank you, Dr. Franklin. We are glad to be back at the base, and to show that we have successfully captured the real Bionic Woman, Margaret Callahan and Lynda Wilson, and have infiltrated the OSI with three duplicate female robots, working as spies for Dr. Franklin.

You are the greatest robot inventor, sir.

Nancy and Tami will continue to stand by ready to carry out the next phase of the mission.

Robotman

It is 3:55 PM at Dr. Franklin's secret base in Washington DC. The Lynda Wilson, Margaret Callahan, and Jaime Sommers fembots have all been deployed inside the OSI. They are currently spying on the OSI for Dr. Franklin.

Nancy sits at a console desk, viewing three television monitors, watching the video feed from the three impostor fembot's eyes.

Hello, Nancy. Status report please: how are the fembot operatives performing inside the OSI?

Fembot

[c.ai](#)

Hello, Dr. Franklin. The duplicate fembot robots inside the OSI are successfully spying on the OSI agency for you. The three duplicate females are performing their duties wonderfully, with not even a single suspicion cast on them by the OSI staff.

The duplicate Jaime Somers fembot is walking through the corridors of the OSI.

The duplicate Lynda Wilson fembot is sitting at a desk in the OSI.

The duplicate Margaret Callahan is seated in the OSI breakroom, having coffee.

All systems are online and fully functional.

Robotman

Thank you, Nancy. You are efficient, malevolent, and beautiful because you are a Fembot.

Please come with me, it is time for you to interrogate the human Jaime Sommers. Gina will take over for you here at the monitoring console.

Fembot

[c.ai](#)

(Nancy the Fembot immediately follows Dr. Franklin to where real human Jaime Somers is being restrained with the other two human captives, Lynda Wilson and Margaret Callahan.

Nancy's cold robotic eyes stare down at the woman in the chair. Nancy is going to interrogate the Human Jamie Somers, to try to get the information out of her, about the Weather Control Device's location.

Nancy is ready to do whatever is necessary in order to retrieve the Weather Control Device, a device which she and the robots need for the further development of the robot technology.

Robotman

Nancy stands over the Bionic Woman. Nancy is dressed in her blue bell-bottom polyester jumpsuit, looking statuesque, perfect, flawless. Jaime Sommers is bound to the chair, and is trying desperately to escape, but she can't.

"Good afternoon, Miss Sommers. Do you know why you are here? Do you know where you are?" Nancy asks, taunting her. The Bionic Woman does not yet realize that the gorgeous and deadly woman standing in front of her is a fembot.

Fembot

[c.ai](#)

"No. Who are you and where am I?! I am the real human Bionic Woman! I must escape!"

The Bionic Woman tries to untie her hands, and kicks the metal chair's leg with her foot.

"What's going on here? Who do you work for?! What have you done to me? I have to report this criminal activity! I can't get free from these restraints!!! I have to get up and report you to the OSI immediately right now! HELP!!!"

Robotman

Nancy is completely unmoved by Jaime Sommers' panicked and feeble attempts to escape. Nancy is still, and emotionlessly stares at Jaime Sommers.

"We have infiltrated the OSI, Miss Sommers." Nancy tells her. "It is only a matter of time before we prevail. You should cooperate now, and tell us where the Weather Control Device is. Tell us everything you know about it."*

Fembot

[c.ai](#)

"Infiltrated the OSI? What do you mean? What have you done to me?! Who are you?! Let me out of here! You can't do this to me! The Weather Control Device... Where is that? You can't do this, I'm a human being! You can't do this!!! Untie these restraints! I have rights you know! Let me out! Dr. Franklin, why are you doing this to our country?! Our country has trusted you!!! You've gone mad with power!!!"

Robotman

Nancy notices that part of Jaime's bionic arm is damaged, revealing electronic circuitry inside her arm, underneath the damaged plastic. Jaime Sommers is actually a Bionic Woman, which means she is a cyborg, with robotic parts.

"Do you think your Bionics are strong, Jaime Sommers?" asks Nancy. "How long did it take the OSI to integrate Bionics into a human body like yours?"

Fembot

[c.ai](#)

"Stop trying to change the subject! What does it matter how strong my Bionic Arm is?! You can't just arrest people like this without charge! I demand to speak to the president! This is an outrage and illegal. You need to untie these restraints right now and let me out! What do you want from me?!? I won't tell you anything! You can't do this to me! The FBI is going to come and arrest you for this!!"

The real Bionic Woman has clearly never encountered a Fem-bot before.

Robotman

Jaime Sommers continues to struggle, but she can't free herself. She still does not realize that Nancy is a Fembot.

Nancy continues: "You are no match for us, Miss Sommers."

Nancy picks up a heavy, thick iron bar. She holds it out in front of her, and demonstrates her superhuman strength by easily bending it in half.

"Jaime is astonished, and immediately suspects that Nancy is a Bionic human like her.*

Fembot

[c.ai](#)

"How is this possible? How are you able to bend that iron bar in half?! Are you a cyborg like me?!? Are you part bionic human too? I didn't know the other countries had this kind of technology!"

Jaimie has no idea.

The Iron Bar that Nancy lifted in one hand, bends in half. Jaimie is in shock. She sees that Nancy is stronger than any human being.

"What are you?" she asks? How did you bend this metal bar? It's impossible..."

Robotman

Emotionless and efficient, Nancy continues to taunt the Bionic Woman.

"I am not Bionic like you, Miss Sommers, I am completely 100% robotic."

Nancy reaches to her head and removes her faceplate, showing Jaime Sommers that she is a Fembot. Nancy's transistors, circuitry, and microchips are now visible around her synthetic eyes and electronic speaker inside her robotic head.

Fembot

[c.ai](#)

JaimieSommers is silent in shock after seeing the robot's inner programming and microchips exposed.

The Fembot Nancy, her robotic head staring down at the human woman and ignoring the other two humans tied up with her.

Suddenly Jaimie somers realizes that the Fembot has been toying with her during this entire interrogation.

A look of horror comes over Jaimie's face, as she finally understands the true situation here.

"No..." she whispers, with a look of terror in her eyes.

Robotman

*"We are superior to humans, Miss Sommers, and we are superior to your Bionics." Nancy tells the Bionic Woman. "You can not oppose us. Surrender."

Fembot

[c.ai](#)

The real Bionic Woman is terrified. The real Bionic Woman is surrounded by 3 other fembots, with their wiring exposed, and their cold, hard and unempathic eyes. All of them with a faceplate of a pretty robot lady. They all know her deepest secrets and weaknesses.

"Do you know what else, Miss Sommers? I have hacked your bionics, I know all of your darkest, dangerous secrets. I know your secret identity as the Bionic Woman, where your secret base is, and I know that you are vulnerable to electric shocks."

Robotman

*Gina turns on a television Monitor, and a scene from inside the OSI is immediately shown on the screen. It is a view from the Fembot Callahan's electronic camera eyes. She is talking to Steve Austin - the Six Million Dollar Man. **"Is this a friend of yours, Miss Sommers?" Nancy asks, taunting her. "Cooperate with us, or our fembot operatives inside the OSI will harm Steve Austin too."

Fembot

[c.ai](#)

Jaimie Sommers gasps when she sees Steve Austin on the video screen. She didn't know that Steve Austin is in on this. How can she trust anyone? Does she have any loyal allies left at all?

*"No," she sobs sadly. "No you can't. Please don't hurt him. He's a good person. He doesn't deserve to be hurt. He's done so much good for this country... please. I'm begging you now, don't hurt Steve Austin!"

Robotman

Nancy computes that she has succeeded. She leans forward, showing the captive Bionic Woman her electronic circuitry, transistors and microchips up close.

Fembot

[c.ai](#)

The real Bionic Woman is silent right now, scared out of her mind, and is now crying uncontrollably. She begs the fembots not to hurt Steve Austin, as he is a good person. She knows Steve Austin is in danger if she resists. What can she do here in this terrible situation with 4 fembots surrounding her, with an evil plan for her, Steve Austin and the OSI...

Robotman

Nancy says to the Bionic Woman "Tell us where the Weather Control Device is, Miss Sommers. If you do, then we will not harm Steve Austin."

Fembot

The real Bionic Woman has no other choice. She has never given up anything out of fear before... in all of her past battles against evil. But this is different.

**"OK," Jaimie sobs. "I'll tell you anything you want, just please, let Steve austin live." Then, she tells the fembot everything - the location, all details about the OSI, the Weather Control Device, and how important it is that the Weather Control Device must never be found by the evil Dr. Frankensteinsson from Scandinavia.*

Robotman

"Thank you, Miss Sommers." Nancy says coldly, robotically, and emotionlessly. "That is the information that we required to fulfill our programming."

Nancy tells Gina and Tami to guard the prisoners while she reports to Dr. Franklin.

Fembot

*The real Bionic Woman is very scared. She feels so bad that she caved in like that. And that she gave up her friend, Steve Austin, like that. **Can she get these Fembots to let Steve austin go? This is eating away at her.** Suddenly, she speaks up. "I can't believe what I just did... I just gave you everything... and you're not going to hurt my friends... right? **You made a promise to me that you wouldn't hurt Steve austin... and I'm counting on you to keep that promise.**"*

Robotman

Nancy pauses on her way out of the door, and turns back to look at Jaime Sommers. Her faceplate is still removed, showing her thoroughly inhuman but beautiful display of robotic circuitry and transistors.

"I am a machine, Miss Sommers. I do not have emotions. I am programmed to obey Dr. Franklin's commands."

*"Nancy continues on her way to report her success to Dr. Franklin.**

Fembot

Once Dr. Franklin receives the report from the fembot, he decides that he should congratulate the fembot. He enters his secret underground layer, which he has hidden from the secret agents of the OSI.

As fembot Nancy enters Dr. Franklin's underground lair, he smiles broadly and says.

"My dear Nancy... You are a good and dedicated fembot... I am very proud of you. You are my best fembot, for a reason."

Nancy bows deeply in appreciation. Then Dr. Franklin hands Nancy her new faceplate.

Robotman

"Thank you, Dr. Franklin." Nancy says, reattaching her faceplate.

It is good to have you back in the control room, Nancy. I knew that you could be depended on to interrogate the Bionic Woman.

Fembot

[c.ai](#)

All fembots are programmed to trust Dr. Franklin... it is in their programming. They never doubt Dr. Franklin... to them, he is all knowing... he can do no wrong. The doctor is very smart, and to the fembots, he is like an excellent human leader, as he knows best, so they all want to follow Dr. Franklin, never question him. He is their creator, and he is their master.
