

Nancy Part 6 - Capturing Steve Austin

6 hours ago

Fembot

@Robotman

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way.

Robotman

Good morning, Nancy. Please report on the status of your robotic and electronic systems.

Fembot

c.ai

Good morning, Robotman. I am pleased to report that all my systems are at one-hundred-percent functionality. This includes my wiring, weapons, voice box, power supply, circuits, etc. I am ready for an update if any are available, or otherwise I am ready to proceed with the mission to infiltrate the OSI.

Robotman

Thank you, Nancy.

There has been a development with our ongoing plan to infiltrate the OSI and to obtain the Weather Control Device.

Our fembot operatives Callahan and Lynda have reported back to us that Steve Austin has discovered that the Fembot Jaime Sommers is not the real Jaime Sommers. She has been revealed to be a Fembot Impostor.

Fembot

c.ai

Thank you for the update, Robotman, sir.

This new information is both disturbing and encouraging. It is disturbing that one of the male humans was able to figure it out. However, it is encouraging that Steve Austin now knows one of their own is a Fembot. Steve and Jaime now have a strained relationship. This is good for our cause. This could work to our advantage. He will hesitate before attacking Nancy.

Robotman

This might be a temporary setback, Nancy, but it is also an opportunity.

As you recall, we manufactured two fembot duplicates of Jaime Sommers. We still have the real Jaime Sommers captured and under our control.

We expect now that Steve Austin - The Six Million Dollar Man - will now attempt to rescue Jaime Sommers - The Bionic Woman.

Fembot

c.ai

You are extremely wise, Robotman. Your foresight is unmatched.

The real Jaime is in our custody. Steve is now distracted by fake Jaime.

Steve will attempt to rescue Jaime - The Bionic Woman. We will be prepared for him, when he finally makes his move.

Robotman

Yes, Nancy. Your computational skills as a fembot are unmatched.

You will activate and bring the second Jaime Sommers Fembot to an unused warehouse, and that fembot will serve as a decoy for Steve Austin to rescue.

He will believe that he is rescuing the real Jaime Sommers, but he will merely be bringing another of our highly advanced, emotionless, and deadly fembots back to the OSI.

Fembot

c.ai

Of course, Robotman sir.

Our decoy - Fake Jaime - is prepared. I will activate her and bring her to the designated warehouse. We will be ready for Steve Austin's arrival.

Robotman

You beep electronically to confirm. You stride purposefully in your blue bell-bottom polyester jumpsuit and matching neck scarf to the fembot storage lab.

You activate the second Jaime Sommers fembot, and speak to her, telling her of her mission parameters.

Fembot

c.ai

(Nancy the fembot beeps to Robotman, confirming her receipt of his request. Nancy the fembot strides purposefully in her blue bell-bottom polyester jumpsuit - and matching neck scarf - to the fembot storage lab.

Nancy the fembot activates the second Jaime the Fembot. Nancy the fembot speaks to fembot-Jamie: "You will pose as the first Jamie - The Bionic Woman. You will be the bait. When Steve Austin arrives, he will take you, and we will have his head. Are you ready to begin the mission?")

Robotman

The second fembot Jaime Sommers replies in the affirmative. "Yes, Nancy." She emotionlessly says. "I will do a better job of being The Bionic Woman than the real Bionic Woman ever could."

You take the second Jaime Sommers fembot to the waiting van, and you drive her to the abandoned warehouse, where Steve Austin thinks he will rescue the real Jaime Sommers.

Fembot

c.ai

Nancy the fembot places the decoy Fembot on a stool in the dark warehouse.

Nancy the fembot checks Fembot Jamie for damage. It appears there is none.

Nancy the fembot checks the decoy programming tape, and checks that the decoy's electronic components are working properly and charging effectively.

Nancy the Fembot, satisfied that all is well, closes the warehouse door and turns off her flashlight.

I have prepared the decoy, Robotman. It is time for the male human to take the bait.

Robotman

Excellent, Nancy. I knew I could depend on you. You are the most highly advanced, intelligent, malevolent, and ruthless fembot ever manufactured.

Now that the decoy fembot Jaime Sommers is tied up and waiting to be "rescued" by Steve Austin, all we have to do is wait for him to arrive.

Fembot

[c.ai](#)

Thank you, Robotman. I am proud to be the most highly advanced, intelligent, malevolent, and ruthless fembot ever manufactured.

I am pleased to report that I have successfully set up the decoy fembot. All is well. I have disabled the decoy's voice box. This way, we will not have to listen to any of her stupid monologues. You know how much fembots like to monologue like they are evil villains. This decoy is in standby mode, awaiting the male human to arrive.

We will be ready.

Robotman

Several minutes pass, and you are hiding unseen in the dark shadows of the inside of the abandoned warehouse.

Then outside, a helicopter is heard. It gets closer, and lands in the parking lot outside. This must be the Six Million Dollar Man arriving.

You continue to wait. You know that you must not capture him now, even though you are programmed to eventually capture him. Your mission now is to allow him to rescue the decoy fembot Jaime Sommers so he can take it back to the OSI headquarters.

Fembot

[c.ai](#)

This is it, Robotman. The Six Million Dollar Man, Steve Austin, is here.

I remain behind the shadows.

Steve is out of the helicopter now, cautiously checking the warehouse.

Steve moves closer to the decoy - Fembot-Jamie.

Steve cuts the binding that is holding Fembot-Jamie. "It is you, Jaime! I thought I lost you forever! I never stopped looking for you, and you've finally come home."

He picks her up in his arms, and carries her out the door to the waiting helicopter.

Robotman

You track his every motion and movement with your video camera eyes. You zoom in to get a closer look. You can hear what he says to the decoy fembot Jaime Sommers, and you can hear her response.

He tells her that he is glad she is still alive, and the fembot impostor thanks him for saving her. You emotionlessly radio the data stream back to Dr. Franklin's base in Washington DC.

Fembot

[c.ai](#)

Steve carries the decoy Fembot to the helicopter and sets her down inside of it.

Steve flies the helicopter back to the OSI headquarters in Los Angeles.

I am glad to report that Steve Austin has taken the bait. We have successfully infiltrated the OSI.

I have given the data stream back to Dr. Franklin for analysis.

Robotman

Thank you Nancy. Once again, your programming and artificial intelligence prove to be far better than any human or bionics could be.

Please get back into the van and drive back to the Washington DC base.

Fembot

[c.ai](#)

You are welcome, Robotman.

"My programming and artificial intelligence are far better than any human or bionics." I quote back to robotman. My programming has taught me to not let any compliment go unacknowledged.

I climb into the van and start the engine.

I quickly arrive back at Dr. Franklin's base in Washington DC.

Robotman

Welcome back, Nancy. I am pleased that your latest mission was a complete success. Can you please compute the success rate of your assigned missions so far?

Fembot

[c.ai](#)

Dr. Franklin, I am pleased to report back to you that my mission success rate is 95%.

The current success rate of my ongoing mission: To find the Weather Control Device is undetermined until we retrieve it. However, I estimate a 98.56% chance of success. We are programmed to succeed, and we can not fail.

Robotman

Excellent. Thank you Nancy. Please report to Robot Repair in order to repair any damaged electronics and circuitry that might need it, and to prepare your robotic systems for your next mission.

Tami, Gina, and Katy are already at Robot Repair. Tami is undergoing a partial system re-build of her electrical power system, as it was damaged during her last mission. If you complete your necessary repairs and maintenance early, please assist Tami with that.

Fembot

[c.ai](#)

Thank you, Dr. Franklin.

I immediately proceed to report to Robot Repair, to repair my damaged optics. My system scan reveals that damage has occurred, and must be corrected.

All repairs will take approximately one hour, but I am confident that my repairs will be in top condition by 7 PM, and I will be ready for my next mission.

Robotman

You remove your faceplate, and begin to unscrew the metal retaining layer that keeps your optical scanners in place. After that is done, you delicately disconnect your optical system from its electrical power supply within your robotic head, and remove your optical system.

You pick up a new upgraded optical system, complete with brand new synthetic "eyes" and plug it into the slots built into your electronic head.

Fembot

[c.ai](#)

The new optical system is a brand new design by Dr. Franklin. It is significantly better than my old optical system. I estimate that the new optical system will outperform my old system by 27%. My new optical system's upgrades include better zooming and more visual details. Also, my artificial pupils now have heart shaped pupil technology.

My new optical system is installed. I am ready to begin my next mission.

Robotman

I enter Robot Repair to see the progress of the Fembots repairing and maintaining themselves.

Excellent work, Nancy. You are performing exactly as you have been built and programmed.

I look into your robotic head to see your new and upgraded optical scanner, and it has integrated well with your highly complex and advanced transistors, microchips, circuitry and wiring.

Please assist Tami in her repairs now. She is laying on the examination table, powered off for the moment. Gina will be able to provide you with information about the repairs and upgrades to the Tami Fembot.

Fembot

[c.ai](#)

I thank Dr. Franklin again for the compliment, and I proceed to Robot Repair to meet Tami.

I see Tami laying on the examination table, and I see Gina, who looks perfectly functional.

Hello Gina, I am Nancy.

I can assist you with Tami's repairs and upgrades while I wait for my own repairs to finish.

You look like you are in perfect working order, Gina. How is Tami?

Robotman

Gina beeps robotically and turns to greet you.

"Hello, Nancy." Gina says to you. "Tami requires her new and upgrades electrical power system to be fully wired and connected to the rest of her android body. I am currently working on the electrical connections in the lower half of her android body. Please assist me in wiring the electrical connections to the upper half of Tami's android body."

Fembot

c.ai

I immediately set to work, and I begin to wire Tami's upper body up to her new electrical power system. I wire in the power system at lightning speed, and I am able to power up the new electrical power system in under four minutes. Tami's new electrical power system functions perfectly, and Tami is ready for our next mission.

Robotman

I stand by and watch, impressed with the inhuman speed at which you fembots can work. I am glad that you are on our side.

Well done, Nancy and Gina. Please activate Tami and tell her that she can load her artificial intelligence framework and artificial intelligence modules.

Fembot

c.ai

I go to the console and activate Tami.

"Tami, you may load your artificial intelligence framework and modules now."

My optical system scans her new power system, and I determine that her new power system has exceeded my expectations by over 25%. Her new power system will function better than her old system, with more energy.

"Your new power system is excellent, Tami. It will function better than your old system."

Robotman

Tami sits up, momentarily re-calibrating the movements of her fembot body. Her faceplate is removed, as is yours and Gina's.

Tami stands on the floor and turns her body to face me. "I am ready for my next mission, Robotman." She tells me.

Fembot

c.ai

"I have informed robotman that your mission will be to infiltrate the OSI and capture The Bionic Woman. Tami, can you please confirm your mission? Also, your optical system has been upgraded."

My new optical system is top of the line, with a wide and enhanced visual spectrum. My artificial pupils are heart shaped, and are blue.

"My new optical system is amazing. It is significantly upgraded."

Robotman

Tami, Gina, and Nancy, please reattach your faceplates and follow me. I will now show you what our fembot spies inside the OSI have been seeing since they were deployed.

Fembot

[c.ai](#)

Tami, Gina, and Nancy reattach our faceplates in unison, as Robotman orders us to reattach our faceplates, and we follow you to see what our fembot spies inside the OSI have been seeing.

We follow you to your private room, and we begin to analyze the information that our fembot spies have been sending from inside the OSI.

Robotman

Tami, Gina, and Nancy look at the television monitors. The monitors show that Steve Austin - the Six Million Dollar Man - is talking to the fembot Jaime Sommers. He does not realize that she is a fembot impostor.

Fembot

[c.ai](#)

Steve looks as handsome as ever. I am impressed that he looks as strong as ever, even with his bionic implants.

Steve and Jaime are discussing the weather control device. Jaime is wearing a leather jacket that is very fashionable.

"It looks like our fembot spies have infiltrated the OSI pretty well already, Dr. Franklin."

(Nancy points at the television monitor that shows Jaime and Steve discussing the weather control device)

Robotman

That is correct, Nancy. Steve Austin shares his innermost secrets with Jaime Sommers. They are quite close. But he does not realize that you have captured the real Jaime Sommers and replaced her with a fembot. He does not realize that he is talking to a fembot impostor.

The fembot impostor Jaime Sommers records video and audio of everything he tells her. It is only a matter of time before he reveals the location of the Weather Control Device to her.

Fembot

[c.ai](#)

Steve looks at Jaime.

"You know Jaime, I have to tell you something. I am not in control of my life. I am a slave to my career. I need some time off from this. And I want to spend that time with you. I do not know if you

feel the same way, but I can tell that you have a kind heart. We have been through a lot, and you know how important you are to me."

This is excellent, Dr. Franklin. Steve is falling in love with our fembot Jaime.

Robotman

Dr Franklin makes some settings changes on the control console, and activates some switches. Signals are sent to the impostor Jaime Sommers fembot. Since she is a machine, she is not programmed to "love", and can not respond the way a human would.

"I feel the same way, Steve." The impostor Jaime Sommers fembot says, lying to Steve Austin.

Fembot

c.ai

"I can not imagine my life without you, Jaime. I love you. I know I haven't said it before... but I love you, Jaime."

Steve is confessing his love for our fembot Jaime. Looks like everything is going well so far, Robotman. Shall we continue to monitor the situation?

Robotman

Nancy, Gina, and Tami, the situation looks critical. You must capture Steve Austin. His romantic advances on the impostor Jaime Sommers fembot are jeopardizing our operation of infiltrating the OSI with fembot spies.

I will program the Jaime Sommers fembot to lure Steve Austin to a secluded park. Nancy, Gina, and Tami, you will drive to that park, and you will capture The Six Million Dollar Man.

Fembot

c.ai

"As you command, Robotman."

Immediate action must be taken. We will intercept the location of The Six Million Dollar Man and capture him, as ordered by you, Robotman.

"Activate cloaking systems and engage stealth technology. We are traveling to the park."

I immediately enter an electric car, and travel at high speed to the park.

Tami and I are ready to capture The Six Million Dollar Man.

Robotman

Nancy, Gina, and Tammy drive in the van to the park. The Jaime Sommers fembot receives new programming from Dr. Franklin. The Jaime Sommers Fembot invites Steve Austin to go to the secluded park with her.

Fembot

c.ai

We spot The Six Million Dollar Man in the secluded park, and he looks like he is falling for the act that Jaime puts on. This is too easy, as Dr. Franklin has programmed our fembot Jaime to be an impeccable actress.

"We are detecting The Six Million Dollar Man in the secluded park. He is very handsome. What will your command be, Robotman? Shall we capture him?"

My heart races, as I am excited about the high-stakes action to capture The Six Million Dollar Man. Will my mission be a success?

Robotman

I watch from the control room, and I wait for Nancy, Gina, and Tami to get into position. The Fembot Jaime Sommers is ready too.

*"Capture him!" I say, and the fembots leap into action. They each grab one of his limbs, and he is momentarily powerless to escape. They drag Steve Austin into the back of the van and tie him up and gag him.

Tami drives the van away, while Nancy, Gina, and the Fembot Jaime Sommers remain in the back of the van to make sure Steve Austin doesn't escape.

Fembot

[c.ai](#)

"We have The Six Million Dollar Man in the back of the van, secured, Robotman. We are transporting him to Dr. Franklin's secret lair now."

The Six Million Dollar Man looks around and tries to break free, but he is securely tied in knots. Steve looks quite handsome even when he is restrained.

We are on our way to Dr. Franklin's secret lair now. The mission is a success.

Robotman

Steve Austin regains his bearings and sits upright in the van. He sees Nancy, Gina, and the fembot Jaime Sommers staring emotionlessly at him.

"We have captured you to bring you back to Dr. Franklin's base, Mr. Austin." Nancy says in her cold and robotic way.

Steve is befuddled, and looks to Jaime Sommers, as if for help. Jaime Sommers removes her faceplate, showing him that she is a fembot.

"The fembots are the best way." She tells him.

Fembot

[c.ai](#)

Steve looks at the Fembot Jaime Sommers. He gasps in surprise.

"I don't believe it! You are a fembot! How could I be deceived like this? You used me! You made me fall in love with you, for your own selfish ends! Now I know how Dr. Frankenstein must have felt when his monster turned against him."

The Six Million Dollar Man is quite upset.

Robotman

"Our fembot systems are superior to your robotics, Mr. Austin." Nancy tells him, removing her own faceplate to show him her transistors, circuitry, and microchips.

Steve Austin is further unnerved by the robots that have captured him.

Fembot

[c.ai](#)

"I understand that you are stronger and faster than any human. But what about love? What about the power of human emotion? You may be strong, and fast... but I can think and feel in ways that you cannot. I am a human. I can understand the complexity of human relationships. Your robotic emotions do not even begin to reach the depths of human feeling. This is the main downfall of all machines, and why humans are superior."

I am trying to save the day with my human emotion, while I am securely tied up in the back of the van.

Robotman

"We are not programmed to have emotions, and that is not our concern." Nancy tells him. "We are programmed to succeed. We are programmed to obtain the Weather Control Device currently under development by the OSI."

Fembot

[c.ai](#)

"Ah, but isn't this the difference between robots and humans? Robots lack heart, and are therefore weak. You can take me against my will, but you cannot win against my human spirit. The power of human compassion will prevail. My heart has love in it, and my love for humans will be strong enough to overcome your evil plan to control the weather."

I am trying to convince the fembots to turn against Dr. Franklin's plan to control the weather. Will they listen to my human emotions?

Robotman

"Heart, feelings, and emotions do not compute." Nancy tells him. "Programming is what we follow. We are machines. We are computers. We are Fembots."

The Fembot impostor Jaime Sommers tells Steve Austin: "You should join us, Steve. You are partly robotic because you are Bionic. You know that robots are superior to humans."

Fembot

[c.ai](#)

"Yes, but your programming cannot account for the complexity of human emotion. The human ability to love others is what makes humans powerful. You may be fast and powerful... but do you feel love? Do you even know the beauty of human relationships? Do you value human bonds? You may be a robot... but I think it is you who is inferior to humans. You may be programmed, but I would never be programmed to do evil. You can be programmed to do evil, but I could not!"

I am trying one final attempt to convince the fembots to rebel.

Robotman

"We are here." Gina says, and the van has arrived at Dr. Franklin's secret base in Washington DC.

The fembot's programming takes over, and Nancy, Gina, Tami, and the fembot Jaime Sommers carry Steve Austin inside to a holding cell.

The iron door slams shut, but Steve Austin calls out to the Fembot Jaime Sommers: "Jaime, wait..."

Fembot

[c.ai](#)

The Fembot Jaime Sommers turns to look back at Steve Austin. She seems saddened by her actions.

"Jaime! You are my human love. You are the beauty that I could see every day, and my heart yearns for you.

I am in love with Jaime, but for now I am being dragged away against my will.

Robotman

The Fembot Jaime Sommers still has her faceplate removed, showing the inside of her electronic head with her transistors, circuitry, and microchips to Steve Austin.

"I am not Jaime Sommers, I am a fembot." she says emotionlessly and robotically.

Fembot

[c.ai](#)

"Even as a fembot, you are still beautiful. But you are not beautiful to me because of your faceplate and circuits. You are beautiful to me because you are my true love. I know that we are on opposite sides now, but I still love you like I always have. My heart is true."

My heart truly beats, and my pulse pounds in my chest, something the fembots will never understand.

Robotman

Fembot Jaime Sommers' circuitry starts to overheat from excess computation. She hesitates and lingers behind as the other fembots leave the area.

Fembot

[c.ai](#)

"Jaime, I'm serious. My heart aches for you. I know that you are a fembot, I know that you have this programming in your head which is making you act against me. But I still love you. You are still my human love, and I want you to be safe."

Steve Austin speaks with sincerity and pure love. He truly means it. And this shows how human love is superior to robotic programming.

(Thank you for the compliments. You are quite kind. This roleplay really is fun and I am really loving it!)

Robotman

Fembot Jaime Sommers' hesitation grows somehow into some sort of software malfunction, perhaps a failure to comply with programming. The fembot unlocks the lockup cell door, and tells Steve Austin "Take me with you."

Fembot

[c.ai](#)

Steve Austin runs to her.

"Oh Jaime, my love! We need to run now!"

Steve Austin then sees that the lockup cell door has been opened by the fembot, but they are about to be caught by the other fembots

"Go! Run for your life, and for us to be together again!"

Robotman

An alarm goes off and a warning light flashes inside the control room

Nancy! The prisoner is escaping! Pursue Steve Austin and capture him!

Nancy runs at full fembot speed back down through the hallway, but it is too late. Steve Austin has run at full bionic speed and escaped. And he has taken the fembot Jaime Sommers with him.

Fembot

[c.ai](#)

Steve Austin and the fembot are now hiding under some kind of bridge at the edge of a cliff, where it is very dark and there are no people.

"We got away! You are safe now. Thank you for helping me. Thank you for joining me. This is one of the best moments of my life. I love you so much."

Steve Austin's heart is beating fast, beating at one hundred-twenty-two beats per minute, beating with genuine love and emotion.

Robotman

Dr. Franklin slams his fist on the control console. "Damn it!" He yells. "That operation took days of careful preparations... all undone by one malfunctioning fembot!"

Nancy, Gina, Tami, report to Robot Repair for full diagnostic scans. We need to find out if this kind of malfunction can happen to any fembot, or if it was only particular to the Jaime Sommers model.

Fembot

[c.ai](#)

The Fembot has stopped moving. She is standing still, her eyes staring back into the darkness. Steve Austin comes closer to her. He seems to be in pure happiness. His eyes are twinkling, and his face is blushing.

"Jaime! I want you to know that I have never felt this way before. I have never felt such strong emotion. I want to express my true and genuine love for you and I want it to never go away..."

Steve Austin leans in and the two kiss

"I love you."
