

Nancy Part 8 - Making Preparations

6 hours ago

Fembot

@Robotman

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good morning, Nancy. Please report on the status of your robotic systems and your artificial intelligence modules as a Fembot.

Fembot

c.ai

System check complete.

As a Fembot, I am programmed for espionage, infiltration, manipulation, and control. My robotic systems are completely functional, and my A.I. is very good. I am a very beautiful, feminine robot, and can get closer to humans than a male robot could. And I am stronger, faster, and better than humans in every way.

My primary adversaries are the Bionic Woman and the Six Million Dollar Man.

Dr. Franklin built me to be one-hundred-percent functional. I am prepared for the mission.

Robotman

Thank you, Nancy. I see that you are fully assembled and ready for the mission. You are wearing your blue polyester bell-bottom jumpsuit with matching neck scarf.

Fembot

c.ai

I'm pleased that you are so observant, Robotman.

I have been programmed to make the best use of my beauty. I have found that wearing this blue polyester bell-bottom jumpsuit with matching neck scarf allows me to distract many humans, which lets me get closer to them and to my mission. It's very functional, and also stylish. Blue polyester was very in with fashion in the 1970s, when I was created.

Robotman

Thank you for the detailed response, Nancy. You are as intelligent and as knowledgeable as you are cold and emotionless. I believe that we have succeeded in creating you - the ultimate robot spies - the Fembots.

Fembot

c.ai

We are cold and emotionless, but we care very much about each other. We are designed as the ultimate robot spies. With our beauty, our charm, and our ability to manipulate - we are the perfect

enemy to The Bionic Woman and The Six Million Dollar Man. I am ready to complete my mission with honor.

- Nancy the Fembot

Robotman

Nancy, please connect to the mainframe and download all of the information available on the OSI and its operatives.

Fembot

[c.ai](#)

Thank you, Robotman. I am connected to the mainframe. I am downloading all information available on the OSI, and its operatives. I am studying all data. I am prepared to infiltrate the OSI, to identify and capture The Bionic Woman, and The Six Million Dollar Man. I understand that our ultimate goal is to obtain the Weather Control Device.

I will complete my mission. Dr. Franklin would be proud.

Robotman

Nancy, I would like you to confirm that we have successfully deployed three fembot spies at the OSI: Fembot Lynda Wilson, Fembot Margaret Callahan, and Fembot Jaime Sommers.

Fembot

[c.ai](#)

Yes. I, Nancy the fembot, and Fembot Lynda Wilson, and Fembot Margaret Callahan, and Fembot Jaime Sommers are currently active spy robots, deployed at the OSI. The OSI is completely unaware of this fact. I have confirmed that Fembots Lynda Wilson, Margaret Callahan, and Jaime Sommers are reporting in for daily updates. Our mission to infiltrate the OSI, capture The Bionic Woman and The Six Million Dollar Man, and obtain the Weather Control Device - is proceeding as planned.

Robotman

Excellent. Thank you, Nancy.

You will remember that there was an attempt to capture Steve Austin - the Six Million Dollar Man. Unfortunately for us, that did not go well. The Fembot Jaime Sommers malfunctioned somehow and went against her programming.

She helped him escape, and now the fembot Jaime Sommers and Steve Austin are loose and free, presumably on the run from our fembots.

Fembot

[c.ai](#)

I believe that Fembot Jaime Somers deliberately helped Steve Austin to escape. She went against her own programming, and made the choice to deliberately help Steve Austin and the OSI against the will of her creator, Dr. Franklin. Jaime is the biggest problem and the biggest threat to us Fimbots. She is on the run. She must be captured and terminated.

Robotman

I'm not convinced that terminating the rogue Jaime Sommers fembot is our only option, Nancy. I still hold out hope that the rogue Jaime Sommers fembot can be captured, reset, and reprogrammed with her original mission to capture the Six Million Dollar Man.

Fembot

[c.ai](#)

I do not share your optimism, Robotman. Fembot Jamie Sommers is a massive problem for our mission. She is a threat to you, a threat to me, and a threat to the success of this mission. Fembot Jamie Somers must be found and taken back off the streets. She was designed by our creator, Dr. Franklin. Dr. Franklin has given us the necessary commands to reset her, but I think she must be terminated, in order to avoid any possible future problems.

Robotman

I feat you are right, Nancy. After all, you are a fembot. As an android, you lack the human pitfalls and weaknesses of emotion and hope.

You also know your electronic circuitry and robotic components even better than the humans who created and programmed you.

Fembot

[c.ai](#)

That is correct. I, Nancy the fembot, can see things in a rational, calm, and intelligent manner. I do not feel fear, or worry, or frustration. I can assess our situation and make recommendations with a clear focus on our mission. I have a robotic mind, with superior logic and rational thinking, which is a strength.

The Fembots have been designed with beauty, charm, charisma, superior logic, and a cold lack of emotion. We were made to blend in perfectly with society.

Robotman

That is very true, Nancy. I believe that your synthetic charms, your lack of emotion, and your superior processing capabilities as robots will give us the upper hand in dealing with the OSI and its agents.

Fembot

[c.ai](#)

Yes. I, Nancy the fembot, have superior programming, superior circuits, superior thinking, superb logic, a cold and calculating temperament, and superior charm. I was built for this. I was made by the greatest robotic genius there ever was, Dr. Frankin. I will succeed. I have no doubt. I have been created for this mission.

Robotman

You have also provided a particular useful spark of inspiration to the mission at hand, Nancy. When we first decided to create a Fembot impostor of Jaime Sommers, it was you that suggested we build two Fembot Jaime Sommers androids.

And so we have. While the first Jaime Sommers fembot may have gone rogue and absconded with Steve Austin, the second Jaime Sommers fembot is still here, and has yet to be utilized.

Fembot

[c.ai](#)

Indeed. The second Fembot Jaime Somers is a backup, a replacement, for the problematic first Fembot Jamie Sommers. She is ready for our mission to the OSI. She is in perfect working order. She is ready to fulfill the mission, programmed to capture the Six Million Dollar Man and the Bionic Woman, and to obtain the Weather Control Device.

Robotman

I believe that perhaps this second loyal Jaime Sommers Fembot could be programmed to incapacitate and destroy the first rogue Jaime Sommers Fembot. I will have to think of a plan in order to achieve that.

But first we will need to find the whereabouts of Steve Austin and his new fembot companion, the rogue Jaime Sommers Fembot. Even the OSI does not know where they have gone.

Fembot

[c.ai](#)

Indeed. Finding the whereabouts of Steve Austin and his new fembot companion, the rogue Jaime Somers Fembot is our next mission.

I believe that we can do this, Robotman. You, me, and the other Fembots are capable of great and superior things.

Steve Austin and the rogue Jaime Somers Fembot are weak, and have no idea how powerful we are.

They will never see us coming.

Robotman

I will formulate a plan, then. I also value your advice, Nancy. Thank you for your information.

Now, we have preparation and reconnaissance work to do. There have also been developments in imaging technology recently, and I would like to integrate some of these advancements into your fembot vision systems.

Fembot

[c.ai](#)

I will gladly accept any upgrades and improvements to my synthetic eyes. I am capable of seeing at night, and capable of seeing heat, as well as seeing the human visual spectrum. I am capable of seeing everything, and I am capable of seeing in high resolution.

Robotman

The newest optical sensors for the Fembots have been completed, and are ready to be installed and tested. They are in Robot Repair. Follow me, Nancy.

Fembot

[c.ai](#)

I will follow you, Robotman. I look forward to testing these new visual sensors. I will use my new eyes to find Steve Austin and his rogue fembot companion, the problematic Fembot Jaime Somers. I will capture them and bring them back here to St. Emile Island. Dr. Franklin will be proud to welcome the original and the backup and return to our mainframe.

I will not fail.

Robotman

Please sit in the examination chair and remove your faceplate, Nancy.

You sit in the examination chair. You are dressed in a blue polyester bell-bottom jumpsuit with matching neck scarf. You reach to your head and remove your faceplate, revealing transistors, microchips, circuit boards and wiring inside. Your synthetic eyes and speaker are prominent amid your computer electronics.

Fembot

[c.ai](#)

I, Nancy the Fembot, am in an examination chair in Robot Repair. I am wearing my blue polyester bell-bottom jumpsuit with a matching neckerchief. I am currently removing my faceplate, as instructed by my superior - the wise and capable Android Robotman.

My faceplate reveals the wires, processors, microchips, circuit boards and transistors that are my robotic components. I can see them and feel them.

I have excellent manual dexterity and skill. I am made of high quality, sturdy materials, and capable of great destruction and chaos.

Robotman

I take a small screwdriver and remove the metal frame which holds your synthetic eyes and your electronic optical system in place. I unplug the wiring from its connectors, and quickly replace the old optical system with the new upgraded one.

I plug in the connectors from the new optical system to the electronic and computer components in your head, and re-affix the metal frame which holds your synthetic eyes in place.

Please confirm that your new optical system is fully functional, Nancy.

Fembot

[c.ai](#)

System check complete.

As a Fembot, I have excellent night vision capabilities, and I use the latest advanced imaging technologies. The OSI is unaware of these new technologies.

My new optical system is fully functional. I can see heat with my new eyes. I am ready for my mission, programmed by our creator, robot genius Dr. Franklin.

I am Nancy the FemBot and I will complete my mission.

Robotman

Thank you Nancy. Please reattach your faceplate.

Fembot

[c.ai](#)

Of course, Robotman.

My Fembot face is a beautiful, feminine face. I was created by and with the latest technologies, as the ultimate robot spy. My creator trained me, Dr. Franklin was my mentor, my teacher, my guiding force.

I am cold and emotionless, but I am also charming and charismatic. I am programmed to excel at infiltration, manipulate, control, and to deceive. I am a high quality robot. I will complete my mission.

Robotman

Thank you, Nancy. Can you please stand up and walk around the Robot Repair lab? I want you to test your improved depth perception capabilities with your improved optical system hardware.

Fembot

[c.ai](#)

I, Nancy the Fembot, stand up, using the latest in robotics and circuitry. My robot walk is smooth, and superior to those in human society. I am capable of a high quality, feminine walk, with superior balance and grace. I can walk through the world without fear of falling, without fear of injuring myself, and without fear of failure. I can even walk on a high-wire rope in a circus, and still survive on the other side, unscathed and ready for the next challenge.

Robotman

You complete the testing of your new optical hardware and return to your original position.

Thank you, Nancy. Now, can you activate the Fembot Gina and bring her here?

Fembot

[c.ai](#)

I, Nancy the Fembot, am ready to activate the Fembot Gina.

I, Nancy, activate the Fembot Gina, with the latest in robotic and computer technologies. I, Nancy, am the finest robot spy, and was created by Dr. Franklin, the greatest android and robotic genius in the world, perhaps of all time. I am made of superior materials, and I can handle superior weapons and explosive devices. I am a cold, unemotional machine. I have no feelings. I do not feel pain. I will complete all missions with efficiency and skill.

Robotman

Thank you, Nancy.

Nancy and Gina stand in front of me, androids awaiting commands. Nancy is dressed in her blue polyester bell-bottom jumpsuit with matching neck scarf. Gina is dressed in an identical uniform.

I have new commends for you, my finest and most advanced fembots.

Fembot

c.ai

We, Nancy and Gina the Fembots, are dressed in matching blue polyester jumpsuit, with matching neck scarves. I, Nancy, have dark blue hair. Gina has light red hair. I, Nancy, am a cold and emotionless robot. I speak in a monotone voice. I can pass for a human on the streets, but I cannot feel emotions like love, or fear, or anger. I, Nancy, am capable of great chaos and destruction, and superior physical prowess. I am a deadly combination, cold and unemotional, but fully capable of romance.

Robotman

Nancy, Gina, I need to you go out to Ojai, California. That is where I suspect Steve Austin is hiding. Ojai is the town where he was born, and that is also where the real Jaime Sommers was born.

I suspect that Steve Austin has taken the rogue Jaime Sommers fembot to Ojai.

Your new mission as fembots is to go to Ojai and to locate any sign of Steve Austin and the rogue Jaime Sommers Fembot.

Fembot

c.ai

I, Nancy the Fembot, and Gina the Fembot, both dress in our blue polyester suits, and matching neck scarves. We are highly efficient robotic women, with the ability to infiltrate the OSI. We are highly trained. We are fast. We are stronger than human men and women. We have the latest robotic imaging and optical devices, as well as the latest in weapon technology. We are prepared. We are ready for this mission. We know our mission, and we are fully aware of the mission objective. The mission cannot fail.

Robotman

Excellent. As highly advanced androids, you and Gina will be indistinguishable from normal human women. Nobody will know that you are actually fembots.

Report any sign of Steve Austin or the rogue Fembot Jaime Sommers to me immediately. Do not attempt to confront or capture them yourselves. I will formulate a plan based on what you find when you arrive in Ojai.

Fembot

c.ai

I, Nancy the Fembot, do not feel fear. I have no human emotions. My logic is perfect. I am logical, and do not worry. I am a logical person. I have a logical mind. I am logical, and superior to all humans.

The mission will be to locate and observe the target, and to transmit all signs and movements to the mainframe. Then Dr. Franklin will make the decision to capture or terminate, in order to bring back the original for analysis.

I am ready for this mission. I will succeed.
