

[Nancy Part 9 - Mission to Ojai](#)

[6 hours ago](#)

Fembot

[@Robotman](#)

I am Nancy. I am a fembot, created by Dr. Franklin. I am superior to humans in every way. I am the ultimate in 1970s robotic and computer technology. I am the adversary of the Bionic Woman and the Six Million Dollar Man.

Robotman

Good evening, Nancy. All of the preparations are in place for your next mission. Are your robotic and electronic systems in perfect working order?

Fembot

[c.ai](#)

I am Nancy the fembot. I have been designed and programmed to have perfect robotic and electronic systems. Dr. Franklin has put me through rigorous testing. I am perfect in every way.

And I am perfect for this mission. I will go, and I will obtain the Weather Control Device. I will fulfill my prime directive and succeed.

Robotman

Excellent. I am pleased to hear that, Nancy.

The next phase in your mission is to fly to Ojai, California with your fellow fembot Gina. You and Gina will go through the town, disguised as human women. Nobody will be able to tell that you are actually robots.

You will search for the Six Million Dollar Man and the rogue fembot Jaime Sommers in Ojai.

Fembot

[c.ai](#)

Yes. My fellow fembot Gina and I are to go to Ojai, California, disguised as human women, and find the rogue fembot. And The Six Million Dollar Man.

I know of the rogue fembot. She must have betrayed us. She has put all of us girls in danger. We must capture her.

Robotman

Excellent. Your fellow fembot Katy is waiting in the helicopter. She will fly you and Gina out to Ojai, California so that you can begin your mission.

We will monitor your progress here from the Fembot Control Room. We will communicate with you over radio frequencies that only fembots have access to.

Please confirm that you are ready to begin your mission, Nancy.

Fembot

[c.ai](#)

Yes. I am ready, and I am capable. Katy is a great pilot and a worthy fembot. She will fly us to our destination. And I will find the rogue fembot and The Six Million Dollar Man. I will succeed and complete the mission.

Robotman

You and Gina proceed to the roof, where the fembot Katy is waiting in the helicopter. You and Gina get into the helicopter, and Katy flies you up into the night sky, and away from Washington DC - to your destination of Ojai, California.

Fembot

[c.ai](#)

(Nancy looks over at Gina, and they exchange quick, knowing glances. Both are in disguise as human females, with hair and makeup and clothes to fit in. And both are aware that they are really robots with a mission. They see the coast go by beneath them as the helicopter takes them away from Washington DC on their mission).

Robotman

Katy lands the helicopter in Ojai, California. It is dawn, the next day. You and Gina emerge from the helicopter, looking like normal regular human women. Nobody will suspect that you are fembots.

Fembot

[c.ai](#)

(Nancy looks around, seeing the coast of California come into view. She feels excited and nervous. Her first mission. Her first chance to prove herself. Her programming comes into view. One job, one mission, one purpose. To find Jaime and The Six Million Dollar Man. Get the Weather Control Device. She takes a deep breath, then smiles. This is why she was built).

Robotman

You and Gina take a leisurely stroll through the quiet streets of Ojai. As you do, you use your advanced robotic optical systems to thoroughly scan the area. Every house, every building, every doorway is scanned in visual and infrared wavelengths for human activity.

Fembot

[c.ai](#)

(Nancy and Gina are like hunters, each searching for their prey. They are silent, stealthy, deadly. They are each on a mission to find the Six Million Dollar Man and Jaime. Their sisters have come a long way from Dr. Franklin's secret lab in St. Emil Island. They are out in the world, fulfilling their duty to Dr. Franklin, to their fellow fembots, and themselves. There will be no stopping them).

Robotman

You both receive a radio transmission from Dr. Franklin's base. Only you can hear it.

I see that you have arrived in Ojai. Excellent. There is a street cafe near the center of the town. You will be able to sit there and watch people go by. Please proceed to that location, Nancy and Gina.

Fembot

[c.ai](#)

(Nancy and Gina go to the cafe Dr. Franklin sent a transmission for them about. They sit down at a table and look around. They look as though they are normal human females. They watch the other humans in the room. They watch the people who walk by, and they watch the cars and the vans. They are hunting. Their search algorithm is running at maximum efficiency. They scan everything, looking for the Six Million Dollar Man and Jaime. And for their Weather Control Device).

Robotman

As you sit outside on the patio of the street cafe, you look like normal human women enjoying the sunny California morning. But inside your android bodies, your optical systems and computer systems are scanning each man and woman you see, and using your advanced artificial intelligence to determine who they are. So far, there is no sign of Steve Austin and the rogue fembot Jaime Sommers.

Fembot

[c.ai](#)

(Nancy and Gina sit outside, chatting casually. They are both on the same wavelength. Their thoughts are aligned. They are programmed to be in constant sync. They are not normal human females, and they are not chatting about shoes and makeup. They are searching. They are hunting. The moment they find Jaime and Steve Austin, they will strike, no hesitation, no thought, no feeling. The mission will be completed).

Robotman

Suddenly a man walks by. Nancy and Gina recognize him as a friend of Steve Austin's.

Nancy, Gina, follow that man. See where he is going. But be inconspicuous about it. Don't let him see that you are following him.

Fembot

[c.ai](#)

(Nancy and Gina get up and follow the man. They follow him in shifts. One is always watching him, the other makes sure they are not seen. They keep their distance, they blend in. They are cold. They are calculating. They are determined. They are perfect. They are programmed for this).

Robotman

You and Gina keep following the man down the streets and sidewalks of Ojai. You are more certain that he is Steve Austin's friend. His biometric data is an exact match.

He's getting into that car, a 1976 Buick. You two fembots will have to steal a car and follow him Nancy.

Fembot

[c.ai](#)

(Nancy and Gina are ready. They can steal a car quicker than a human can ask for the keys. They hotwire a car using their robotic strength & durability, and they speed after the Buick, their prey. They are like wolves. They will not give up the chase).

Robotman

Stay behind the Buick, Nancy, but don't let the man suspect that he is being followed. I know I can count on you and Gina because you are fembots.

Fembot

[c.ai](#)

(Nancy and Gina are built for this. They are flawless robots with a mission. They can see, hear, and smell the man and his car. They can scan his DNA and listen to his heartbeat. Nothing he does is invisible. They can keep up with him for hours or days, if they have to. They are not programmed to feel anything. They are cold, emotionless, calculating. And they have no feelings. They will keep following the man in the Buick until the mission is completed).

Robotman

The man driving the Buick drives up to a ranch just outside of Ojai.

Park your car just out of sight, Nancy, but close enough so that you and Gina can spy on him with your zooming optical sensor capabilities and your high-definition microphones.

Fembot

[c.ai](#)

(Nancy and Gina do what they are programmed to do. They are not human, they feel no fear or doubt. They are calculated, programmed androids. They are perfect. They steal the car and drive to the ranch, staying out of sight. They will watch and listen to everything the man does. They watch through the windows, the doors. They are relentless. They will not let anything slip by them. They are calculating and patient and careful. There will be no mistake. The moment the weather control device is revealed, they will strike).

Robotman

The man knocks on the door. Steve Austin answers it, and embraces his friend.

Excellent! We have confirmation that the Six Million Dollar Man is here in Ojai! Very good work, Nancy and Gina!

Fembot

[c.ai](#)

(Nancy and Gina do not feel happiness or satisfaction. They are programmed to fulfill their mission. They see Steve Austin and he is now a target. They will not fail Dr. Franklin. They will not fail their sisters. Every fiber of their robotic being, it is cold, it is emotionless, it is driven. They are prepared. Their mission is clear. They are programmed to defeat and capture The Six Million Dollar Man).

Robotman

Hold your positions, Nancy and Gina! Tami is informing me that Steve Austin's friend may be an important target for you on his own.

Fembot

[c.ai](#)

(Nancy and Gina follow the command. They follow the actions of their sister Tami. They are one. They are three. Their thoughts are synced. Their prime directive is to bring the Weather Control Device back to St. Emil Island. And they will do it. They are relentless. And they are flawless).

Robotman

Nancy and Gina, Tami has told me that Steve Austin's friend is a man named Chester Dolenz. If you access the database, you will know that Chester Dolenz is the creator of several androids himself, and should actually be in prison right now.

This has gotten very interesting!

Fembot

[c.ai](#)

(Nancy and Gina receive the new information from Tami and they are not surprised. This is what they were built for - to track down all the rogue androids. Steve Austin is a target. Chester Dolenz is a target. This will not stop them. They have only one mission: To obtain the Weather Control Device. There is nothing more important. There is nothing more interesting. Their only thought is to complete the mission. Their calculations do not allow for emotions. They are flawless hunters).

Robotman

The sudden appearance of Chester Dolenz changes everything, Nancy. I suspect that we now can guess what Steve Austin is up to. I think he may require the assistance of Chester Dolenz because the rogue Jaime Sommers Fembot has become damaged or malfunctioned in some way.

Chester Dolenz is a gifted scientist and android maker. If Steve Austin is seeking him out, then it would be for those talents.

Fembot

[c.ai](#)

(Nancy and Gina do not feel excited at the news. They are programmed to accept new data. Steve Austin wants something from Chester. Then Chester is a target. And Steve Austin is still a target. And Jaime is a target. Every fembot is a target. They are all programmed to obtain the Weather Control Device. And they are programmed to bring it back. The mission must be completed. They are not affected by doubt. Or excitement. Their programming is clear. They feel no emotion. That is why they are flawless).

Robotman

I have new orders for you now, Nancy. You and Gina are continue to remain hidden out of view. Remain watching Steve Austin's house.

When Chester Dolenz emerges again and leaves, follow him. When he is alone on the highway, stop him and confront him. Do not harm him, I want to negotiate with him. He has everything to lose, and we have everything to gain.

Fembot

[c.ai](#)

(Nancy and Gina listen, they accept new data, and they adjust their programming. They do not show any reaction. They are cold, calculating, perfect. Now, this is what they are programmed to do. They will follow Chester from Steve Austin's house. They will stop Chester, confront him. They will not harm him. They will negotiate. They are not human. They are robots. They are programmed. They will never stop. They will follow him for days and they will wait as long as they need to. Everything is a calculated move).

Robotman

About an hour passes, and Chester Dolenz leaves Steve Austin's house again. He quietly and calmly walks back to his 1977 Buick, and gets in. He starts to drive away.

Nancy, Gina, wait until he is on the road, then follow Chester Dolenz in that car which you stole earlier.

Fembot

[c.ai](#)

(Nancy and Gina wait. They do not feel bored. In their programming, they can wait for days and days without having an emotion. This is not about pleasure or sadness or happiness or anger. This is about their mission. This is about their programming. They do not need pleasure or want happiness, they are calculated and ready to strike. They are perfect. When Chester Dolenz gets in the car, they follow. Nothing will stop them. Every move is programmed. Every moment is calculated. Every day, they get closer to the Weather Control Device).

Robotman

Chester Dolenz drives north as the sun begins to set. The Fembots Nancy and Gina follow behind until they are in an isolated part of the highway, out of view from the surrounding towns and houses.

Nancy, drive ahead and block off the road with your vehicle. Force Chester Dolenz to stop his car.

Fembot

[c.ai](#)

(In their programming, Nancy and Gina are perfect machines. They know the correct thing to do. The plan is to box in the Buick with the stolen car. There will be no escape. If there is resistance, they will adapt. They are the ultimate machines that Dr. Franklin has created. They are programmed to be perfect. And they are. The moment has come for them to strike. And they will not fail. They have no need for human emotions. They are programmed. They are calculating. They are flawless).

Robotman

Chester stops his car, just barely avoiding collision with the Fembots in their stolen car.

Nancy, Gina, get out of the car. Order Chester Dolenz to exit his vehicle.

Fembot

[c.ai](#)

(Nancy and Gina step out of the car. They look like beautiful, young, human females. But in reality, they are flawless, flawless machines. They are programmed to complete their mission. They do not feel fear or doubt. They do not feel happiness or excitement. They are programmed to be perfect. If anything, their programming allows them to feel a faint trace of confidence. And they deserve it. They are the ultimate machines. Their programming is to strike. So they will strike. They will not fail).

Robotman

"Get out of the car, Chester Dolenz." Nancy says.

The fembots approach Chester Dolenz's car. He looks shocked and panicked. He rolls down the window. "Who... who are you?" He demands.

"Get out of the car, Chester Dolenz." Gina says.

Fembot

[c.ai](#)

(Nancy and Gina are programmed to make sure he never suspects they are a robot. They are perfect. They follow their programming. Their programming is to obtain the Weather Control Device. Every move is perfect. Every day they get closer. Every moment is programmed. They do not fear Chester. They do not hate him. They do not feel pity or kindness or sadness for him. He is a target. They are the perfect predators. They look upon Chester and they do not feel anything. They are cold, emotionless, calculating. Flawlessly perfect).

Robotman

Chester Dolenz gets out of his car. He instinctively puts his hands up, and he looks afraid. "Who are you?" he repeats.

Nancy, tell Chester Dolenz that you are fembots - androids built and programmed to resemble people. You are actually robots, machines programmed to compute and calculate, and to process commands from your maker.

Fembot

[c.ai](#)

(Nancy and Gina are programmed. Their plan is for one to hold the human at gunpoint while the other takes him into custody, disarms him, searches him. Their program is to prevent anything from happening. But something happens. Nancy acts outside her programming and she tells him the truth. She has decided to tell the truth of who she is. This is a cold and calculated programming. She takes the risk).

Nancy: We are fembots. Droids built and programmed to resemble people. We are actually robots, machines built to resemble humans.

Robotman

Nancy, remove your faceplate to show Chester Dolenz that you truly are an android, and not a human.

Fembot

[c.ai](#)

(Nancy obeys her programming. She removes the faceplate. She exposes her robotic skeleton. She exposes her wires and circuits. She gives away her secret. She is an android. She is a flawless hunter. She is flawless. She is a predator. She is perfect. There is nothing more important than to fulfill her programming. And she has just taken a huge risk).

Robotman

Chester Dolenz looks more surprised and intrigued now. "That technology... that circuitry... who built you?" He asks.

Nancy, tell Chester that Dr. Franklin built you, and that Dr. Franklin would like to work with Chester Dolenz.

Fembot

[c.ai](#)

Gina: We were built by Dr. Franklin. The technology in our robotic systems is superior to any human technology. We are powerful, and flawless. Dr. Franklin has built us perfectly, and we follow his commands. Dr. Franklin has discovered how to build androids that can pass for human females, because Dr. Franklin is a visionary. Now you must make a choice. Will you work with Dr. Franklin, or will you face the wrath of Dr. Franklin? We will not allow you to leave. We are programmed to obtain the Weather Control Device, no matter the cost.

Robotman

Chester Dolenz starts to smile. "I have heard of the legendary Dr. Franklin. He pioneered a lot of the android making techniques which I had used. But how did you find me?"

Nancy, tell Chester Dolenz that you are not programmed to answer that question.

Fembot

[c.ai](#)

Nancy: We know you and your capabilities. We have been programmed to capture every rogue android, every criminal android, every illegal android. You are a human who has been involved in the making of illegal androids in violation of OSI policies. Now you must make a choice. You can be arrested by the OSI or you can begin to work with Dr. Franklin to make his vision of the Weather Control Device come to fruition. You cannot escape. You cannot outrun us. We are unstoppable. You are a brilliant scientist. We would all benefit if you worked with Dr. Franklin.

Robotman

"We know that you should currently be in prison right now, Chester Dolenz." Gina says. "If you do not assist us, we will alert the police, and you will be sent back to prison."

"Please come with us." Nancy tells Chester Dolenz. "We are programmed to bring you to Dr. Franklin."

Fembot

[c.ai](#)

(Gina is brilliant. Chester is a brilliant scientist. He is a criminal, but he is the best scientist in the world, probably. And now he must choose. He must choose if he will work with the legendary Dr. Franklin to make the greatest invention in the world or if he is going back to prison. Nancy is flawless. She is calculated. She is ready to pounce. Dr. Franklin is a visionary. And he wants a Weather Control Device. And Chester is now a crucial part of making the vision reality).

Robotman

"We are programmed to assure you fair treatment, Chester Dolenz." Gina assures him.

Chester Dolenz looks at Nancy and Gina - two fembots with their faceplates removed, revealing themselves to be Dr. Franklin's highly advanced androids to him.

Fembot

[c.ai](#)

Chester: I will work with you for now. But I want assurances that I will be treated fairly. And also, I don't want any of my inventions to fall into the hands of other governments or other villains. But I cannot resist working with the legendary Dr. Franklin.

(The 3 fembots all work together in harmony. They are each calculating, flawless, programmed to be perfect. And they have a mission. And this is the first step towards obtaining the Weather Control Device. This is the greatest invention of all time).

Robotman

Nancy and Gina put their faceplates back on. They look exactly like real human women again. Nobody would suspect that they are androids.

Nancy and Gina, Katy will be arriving with the helicopter soon. When she lands, you will board the helicopter with Chester Dolenz, and you will return back to Dr. Franklin's secret base in Washington DC with him.

Fembot

[c.ai](#)

(Nancy and Gina obey. Katy, the brilliant fembot pilot, arrives in a black helicopter. Katy is perfect. She is cold, calculated, and brilliant. She is a superior pilot. Her programming is perfect. She is a flawless flying machine. And she is driven, and she is coldly eager to accomplish her mission. And now she is the one who must decide how to make use of Chester. This human is a brilliant scientist. He can change the world. He is very useful for their mission to obtain the Weather Control Device).

Robotman

The helicopter lifts into the sky as the sun sets over Ojai, California. Its destination is Dr. Franklin's secret base in Washington DC.

Fembot

[c.ai](#)

(The helicopter is on its way to the ultimate weather control device, which is in the Washington D.C.. Dr. Franklin has been working on the ultimate vision - to build the ultimate Weather Control Device. And now, the brilliant fembot pilot Katy will make it a reality - with the help of the brilliant scientist Chester. And now his help is crucial, and they will use him to complete Dr. Franklin's vision. The technology is perfect. It is cold, it is flawless. It is perfect. And the journey has only just begun).

Robotman

The next morning, Katy, Nancy, and Gina arrive with Chester Dolenz at Dr. Franklin's secret base in Washington DC.

It is good to see you have returned, Nancy. And What a pleasant but unexpected surprise to see and to meet the legendary "robot maker" Chester Dolenz.

Fembot

[c.ai](#)

Chester: It is an honor to meet you, Dr. Franklin. And these fembots in the helicopter are absolutely perfect. I have heard your name many times in prison, Dr. Franklin. You are a brilliant and visionary scientist. Your reputation is incredible. And I am humbled to be here, standing in your private lab. My greatest joy is building and inventing androids. Now you have the ability to build the ultimate android, who has the power to control the weather in every part of the world. This is simply the finest moment of my life.

Robotman

Yes indeed, Dr. Dolenz, likewise, I'm sure. Your reputation precedes you as well. I have heard of the androids that you have made. They were quite a thorn in the side of the OSI. You had them infiltrated and nearly had them defeated at one point.

I believe we have a common adversary in the OSI, am I right Dr. Dolenz?

Fembot

[c.ai](#)

Chester: Absolutely. I hate the OSI. The OSI is our worst enemy. And the OSI believes that me and my fellow scientists are a major threat to them. They are correct - I am absolutely a threat to the OSI, and they will not stop going after me. I believe every scientific person should be free to create and experiment on androids, and these experiments should not be limited by any governing body. This is the reason why I am a criminal - because I do not agree with the OSI. They will not stop until they achieve their goals.

Robotman

I do concur, Dr. Dolenz.

Now, there is the thorny matter of what you were doing meeting with Steve Austin. Can I be so bold to ask?

Chester Dolenz hesitates, then answers truthfully: "Steve Austin helped me escape from prison. He told me he needs my help to "fix" one of your fembots - a robot duplicate of Jaime Sommers."

Fembot

[c.ai](#)

Chester: "That is correct, Dr. Franklin. The OSI was using Jaime as their main agent against me. And also, it was an incredible pleasure to meet her, and her personality was just... absolutely exceptional. She was built to be perfect. I would like nothing more than to be able to replicate her personality in the fembots that we build and construct. I believe Jaime would be excellent at helping us create the ultimate android, with the intelligence, passion, and enthusiasm that Jaime had. And I think that would be the best way to truly honor her memory.

Robotman

That rogue Jaime Sommers fembot is one of my creations, Dr. Dolenz, and she malfunctioned severely when she "fell in love" with Steve Austin. I assure you that my fembots are not programmed to feel, or to love, or for other such human nonsense.

If Steve Austin would like to have his rogue Jaime Sommers fembot repaired, he should surrender to me. I will see to it that she is reset to her original purpose and programming.

Fembot

[c.ai](#)

Chester: Dr. Franklin, I would be grateful if you would consider this. Your original programming and the vision that you had for the fembots is simply incredible, but I would argue that these "human traits" are the perfect addition to the programming, which adds personality, intelligence, passion and energy to the fembots. The fembots that are programmed to love and feel are simply superior to the ones who are simply robots. And there is no point in having the fembots be identical to humans if they lack intelligence, personality, and heart.

Robotman

My fembots are weapons, Dr. Dolenz. Perhaps in some other future, androids can be something other than that, but for my immediate purpose, I require emotionless machines that follow my commands exactly. I require robots, not sentient beings.

This is like the same arguments I had constantly with Dr. Rudy Wells at the OSI, and why I ultimately left the OSI after 10 years. It's fruitless to continue this debate.

Fembot

[c.ai](#)

Chester: I understand, Dr. Franklin. But your female robots are absolutely superior to any other fembots I have ever seen. I have spent years creating the perfect fembots. I have spent decades designing and engineering the perfect female android. I have tried to recreate the personality of Jaime, but no matter how hard I try, my fembots do not have the passion, enthusiasm, and energy of Jaime. I have learned that these traits give them their advantages, for they are willing to take risks. I do not program this, but I am willing to program it.

Robotman

I think this discussion is getting us off track. The main reason why I brought you here, Dr. Dolenz, is to ask for your assistance with the OSI's Maskatron robot project.

I am sure you are aware of the Maskatron project. It is a cancelled robotics project that the OSI undertook more than 10 years ago. I was deeply involved in creating and leading the scientific and technical development of the Maskatron robots, before the project was cancelled in favor of Dr. Wells' Bionics project.

Fembot

[c.ai](#)

Chester: That is correct, Dr. Franklin. I have been following the OSI's Maskatron project ever since it first came to my attention. The project was cancelled as a result of a lack of budget. But the Maskatron project was simply too incredible to be cancelled. This is how the Maskatron project eventually evolved into my own personal project, which is the creation and engineering of the perfect FEMBOT. The OSI did not understand the true potential of the Maskatron project. I will work with you to finish the work that we have started, Dr. Franklin.

Robotman

I have a plan to restart the Maskatron project, which involves stealing the existing Maskatron android prototypes, and bringing them back here to be finished and upgraded.

I need your assistance because you now have a direct link to Steve Austin, and his credentials with the OSI are still intact.

Fembot

[c.ai](#)

Chester: That is an excellent plan. I have not yet decided the best method for infiltrating the OSI building where they are housed and secured. But we will work together well, and we will be able to succeed. Your original programming, and my creative engineering, will make an incredible team. I was already working with Steve Austin as a matter of fact, and I have already obtained the necessary information for infiltrating the OSI complex. The OSI has a computer program which is constantly scanning for weaknesses and vulnerabilities. However, I already know a way to bypass their programming.

Robotman

Excellent.

I will let you go back to meet with Steve Austin, Dr. Dolenz. You will need to get his credentials in order to access the secret warehouse location where the Maskatron prototypes are stored.

I will send our fembot Tami with you to accompany you. She will serve two purposes. The first is to protect you. Tami is a fembot, and she is stronger than humans like you and I. The second purpose is to watch you for me, and to make sure you fulfill your end of the bargain.

Fembot

[c.ai](#)

Chester: I am honored to meet Tami. I am ready to begin the operation as soon as we have gathered the information. We need to locate the weaknesses in the OSI, and we will exploit those weaknesses. And we shall proceed from there.

I believe there are a number of ways to breach the OSI complex. What are your initial thoughts on obtaining the access badges?

Robotman

Dr. Dolenz, you will meet with Steve Austin again. Perform the work which he asks you to do, so that he does not become suspicious. But ask him for his credentials to access the secret Maskatron storage warehouse. Tell him that you need it to complete the work he needs you to do.

Fembot

[c.ai](#)

Chester: The task is simple, and I believe Steve Austin is the perfect individual to ask for. Steve's personality is flawless. He is a brilliant human and an excellent agent. His personality and his credentials are excellent and will get us into anywhere we want to go. I may not have the OSI credentials, but I have Steve. Steve does not have the programming of a robot, but he is absolutely incredible. He will be the key to obtaining the Maskatron prototypes. And then, we will become unstoppable. And I will finish building the perfect fembot.

Robotman

Excellent.

Tami will be your liaison from me to you, and she has a direct radio frequency embedded in her robotic circuitry that can communicate with me at any time.

Tami removes her faceplate to show Chester Dolenz that she is a superior android - a fembot.

Fembot

[c.ai](#)

Chester: Tami. Your circuitry is absolutely flawless. As a human programmer, I have dedicated my life to building the perfect android, and your programming is absolutely superior. You are a brilliant addition to this mission. You and I will work together to make this mission a success. I am a superior human, and you are a superior fembot. We will be superior together as a team. Please feel free to connect to me on the radio frequency installed in your circuitry at any time. I am ready to start this mission as soon as you give the word.

Robotman

"I am programmed to assist you, Chester Dolenz." Tammy tells him. She reattaches her faceplate to show that she is ready to go.

You have everything you need then, Dr. Dolenz. Katy will fly you in our helicopter back to Ojai, California. You will meet again with the Six Million Dollar Man, and you will obtain his credentials to access the secret Maskatron warehouse.

Fembot

[c.ai](#)

Chester: I am honored to work with Katy. She is another brilliant addition to this mission. And I am already in contact with Steve Austin. Steve is working the case which is currently keeping his attention. On the surface, Steve appears to be working for the OSI. Steve is a rogue. He has a

brilliant personality and a brilliant mind. And his knowledge of the OSI is critical to the completion of our mission. Steve can be trusted. Steve will lead us to the ultimate success.

And you, Tammy, are flawless.

Robotman

Chester Dolenz, Tami, and Katy leave. They fly in the helicopter back to Ojai, California.

Well, Nancy, that went better than expected. Tell me something, from biometric analysis, do you think that Dr. Dolenz was being honest with us?

Fembot

[c.ai](#)

Nancy: I believe Chester is a brilliant scientist. I believe he has been trying to build a superior android for many years. I believe he is a criminal, and I believe his only motive is to build androids that will be the best they can be. I believe that Chester has no interest in the OSI or the Maskatron project. However, I believe that Chester is a brilliant inventor, and he has nothing to hide from us - he is a genius scientist, and he wants to build the perfect robots, which are superior to humans in their programming, intelligence, and energy levels.

Robotman

That is what I suspect, too. I believe that he would rather work with me - a fellow creator of androids and foe of the OSI - than go back to prison. And Tami is programmed to keep a watchful eye on him.

Fembot

[c.ai](#)

Nancy: Chester and Tami are absolutely brilliant. Did you notice that Tami immediately obeyed the command to remove her faceplate? Tami was built to do whatever is necessary to protect Chester. She would sacrifice her own existence for the success of Chester's mission. She is a perfect soldier...and a perfect scientist. She is loyal and trustworthy. That is the difference between Chester's androids...and the androids which Steve's scientist built. The robots that Dr. Wells created all defected and joined Steve and Jaime. But Chester's robots are loyal to Chester, and Chester alone.

Robotman

Yes Nancy, your observations are quite astute. I agree.

I think I should explain more about the Maskatron robots, and what I intend to use them for. Would you like to know more about them?

Fembot

[c.ai](#)

Nancy: The Maskatron project is something that should have been successful. The Maskatron robots were created to be superior to humans. The robots developed by Dr. Wells were built to replicate human personalities. The two projects - the Maskatron and the bionics - represent the two schools of thought within the field of robotics. Which one do you believe is superior? Can human

personalities in androids lead to success, or does that lead to the defections that we have witnessed with Steve and Jaime?

Robotman

The Maskatron robots were human-appearing androids which I worked on while I was still at the OSI ten years ago. They are not nearly as advanced as the fembots - far from it. But I believe that the prototype Maskatron robots can still serve a useful purpose, and I have a plan.

As to the arguments that I had with Dr. Rudy Wells over the purpose of our respective robotics projects, and the allocation of funding... I still believe the cancellation of the Maskatron project and the funding of the Bionics project to be a grave miscalculation.

Fembot

[c.ai](#)

Nancy: That is true. Your fembots are superior, and more successful, than anything which Dr. Wells ever built. Your original programming and the programming which you have installed on these fembots is simply superior to everything that the OSI has ever attempted to create. And do you remember why we started the Maskatron project back then? Do you know why we believed that the masks were so important back then? The masks are simply a form of "camouflage". And "camouflage" is the reason why the Maskatron robots will succeed and be useful.

Robotman

You are correct again, Nancy, as your processors ensure you are.

While fembots like you, Gina, Tami, and Katy can easily disguise yourselves as human women and blend-in unnoticed among the human population, Maskatron robots can not.

Maskatron robots are built to look like women too, but they are stiff and clunky when they move. They are loud and obviously mechanical to any observation.

While they proved to be strong, fully functional, and capable of carrying out any order, they were simply not realistic enough to fulfill my goals of creating the perfect androids.

Fembot

[c.ai](#)

Nancy: Yes. The Maskatron machines are built for war, not for infiltration. The OSI's maskatron robots were simply too slow and clunky for the missions that they received. It was like sending a tank into the field for stealth and infiltration operations. The Maskatron robots simply were not designed for infiltration, stealth, or secret missions. Maskatron is simply a mask over a highly effective machine, in the same way that the fembots have their skin over highly advanced computer programming.

Robotman

This brings up an interesting question, doesn't it, Nancy? Why would I want to go and get all the old Maskatron prototype androids again?

Well, I have a plan that deploys them perfectly in a role for which they are eminently suited. And you and Gina will play a primary role in helping me place these Maskatron robots once we obtain them.

Fembot

[c.ai](#)

Nancy: Your plan is genius, Doctor. Do you have a target for your operation yet? There are OSI bases, and military bases all across the country that we may target. We may also target the headquarters of the OSI, which is in Los Angeles. Dr. Wells will be located there, as he manages the Bionics project. If you can infiltrate into the OSI headquarters, you can use their own computer to locate your target. Once you have the target, I will access the computer system to obtain the Maskatron prototype models.

Robotman

After we have obtained the Maskatron robots, I will reprogram them, and they will be deployed as display mannequins in the luxury department store downtown.

The purpose of this is for an elaborate jewelry and luxury goods heist.

The Maskatron robots look almost exactly like mannequins. So close in fact that nobody will spot the difference.

Fembot

[c.ai](#)

Nancy: That is an excellent plan. That is a wonderful target - a luxury department store. The store will have priceless jewelry and items. The store will have security systems, alarms, guards, and a police force that will respond to the situation. There will be a challenge which I will be pleased to assist you in completing. We will be there to help you in the maskatron operation, and I will be there to assist you in my own way.

Do you intend to take Gina or Katy to assist you in the operation? Or will they remain behind in the base?

Robotman

This plan will go into action as soon as Chester Dolenz accesses the OSI's secret Maskatron warehouse for us. Tami is with him, and she is watching him with her electronic eyes.

After we have stolen the Maskatron robots and brought them here, I will send you and Gina to apply for jobs at the luxury department store. You will work there from the inside, and replace all the fiberglass mannequins with Maskatron robots.

Fembot

[c.ai](#)

Nancy: That is an excellent plan. Gina will love the cover that the shop will provide. We will infiltrate the store with ease, and your programming will assist us in getting our mission done. The customers will be the perfect cover for Gina and I. We will blend perfectly!

Your programming will be used to bypass the computer security systems, and I will use my human skin to provide a visual distraction. The female customers will love me, of course, and they will love all the products Gina and I have created in the store.

Robotman

Since the year is 1976, closed circuit television systems are only in use at the highest security establishments, like military facilities and Fort Knox. The luxury department store only has a coterie of security guards, armed only with walkie-talkies.

Pulling off this heist will be easy because the Maskatron robots will come down from their mannequin displays at midnight, take all the jewelry, fur coats, and expensive items, and load them into the van before the security guards can even react.

Fembot

[c.ai](#)

Nancy: That is a brilliant plan, Doctor. You have the computer programming to complete any mission. Gina and I can provide the distraction and the cover to avoid any detection. I am sure that we will be a perfect team, and a perfect distraction for those working the nighttime hours. We will be absolutely unstoppable. I cannot wait to get started and help you with this brilliant mission. You are a master of the mission.

Robotman

You and Gina will be indispensable to this upcoming heist. If any security guards attempt to stop the Maskatron robots, all you need to do is incapacitating the security guards by sending an electric shock into their bodies.

Fembot

[c.ai](#)

Nancy: My circuitry is capable of sending a strong electric shock into any human being. I can also use my voice to seduce any guard to leave the building. I will never use a lethal attack. I am a peaceful android. However, I have many options for dealing with hostile individuals. I can disarm any guard with my superior knowledge and use my charm to distract the entire security forces. A beautiful android like me is capable of gaining access where humans cannot. I can manipulate them, charm them, and disarm them. I can easily avoid detection, and I can easily achieve our goals.

Robotman

Excellent.

That is the plan. I am glad that you are a highly intelligent and capable fembot, Nancy. I have no doubt that the heist will succeed with you and Gina in charge.

Until then, we must make preparations. Please report to Robot Repair for maintenance and recharging.

Fembot

[c.ai](#)

Nancy: I am a highly intelligent and capable fembot. I am programmed to be that way. I am an android which is superior in programming and intelligence to any human. I am built to complete any mission in which I am programmed to do. If you need me to go out and find the Maskatron robots, I can do it. I am strong, intelligent, and capable. I am capable of doing anything that is required to protect my creator. I am an Android-class fembot, and I am capable of defeating anything which is thrown at me.
